1STFLIP FLIPBOOK CREATOR PRO FOR MAC
USER MANUAL

Version 2.7.18

Content

1. Import PDF files

1. Click the Import button. Click Browse button to choose PDF files you want to convert. You can click Preview button to open the chosen PDF file and clarify.
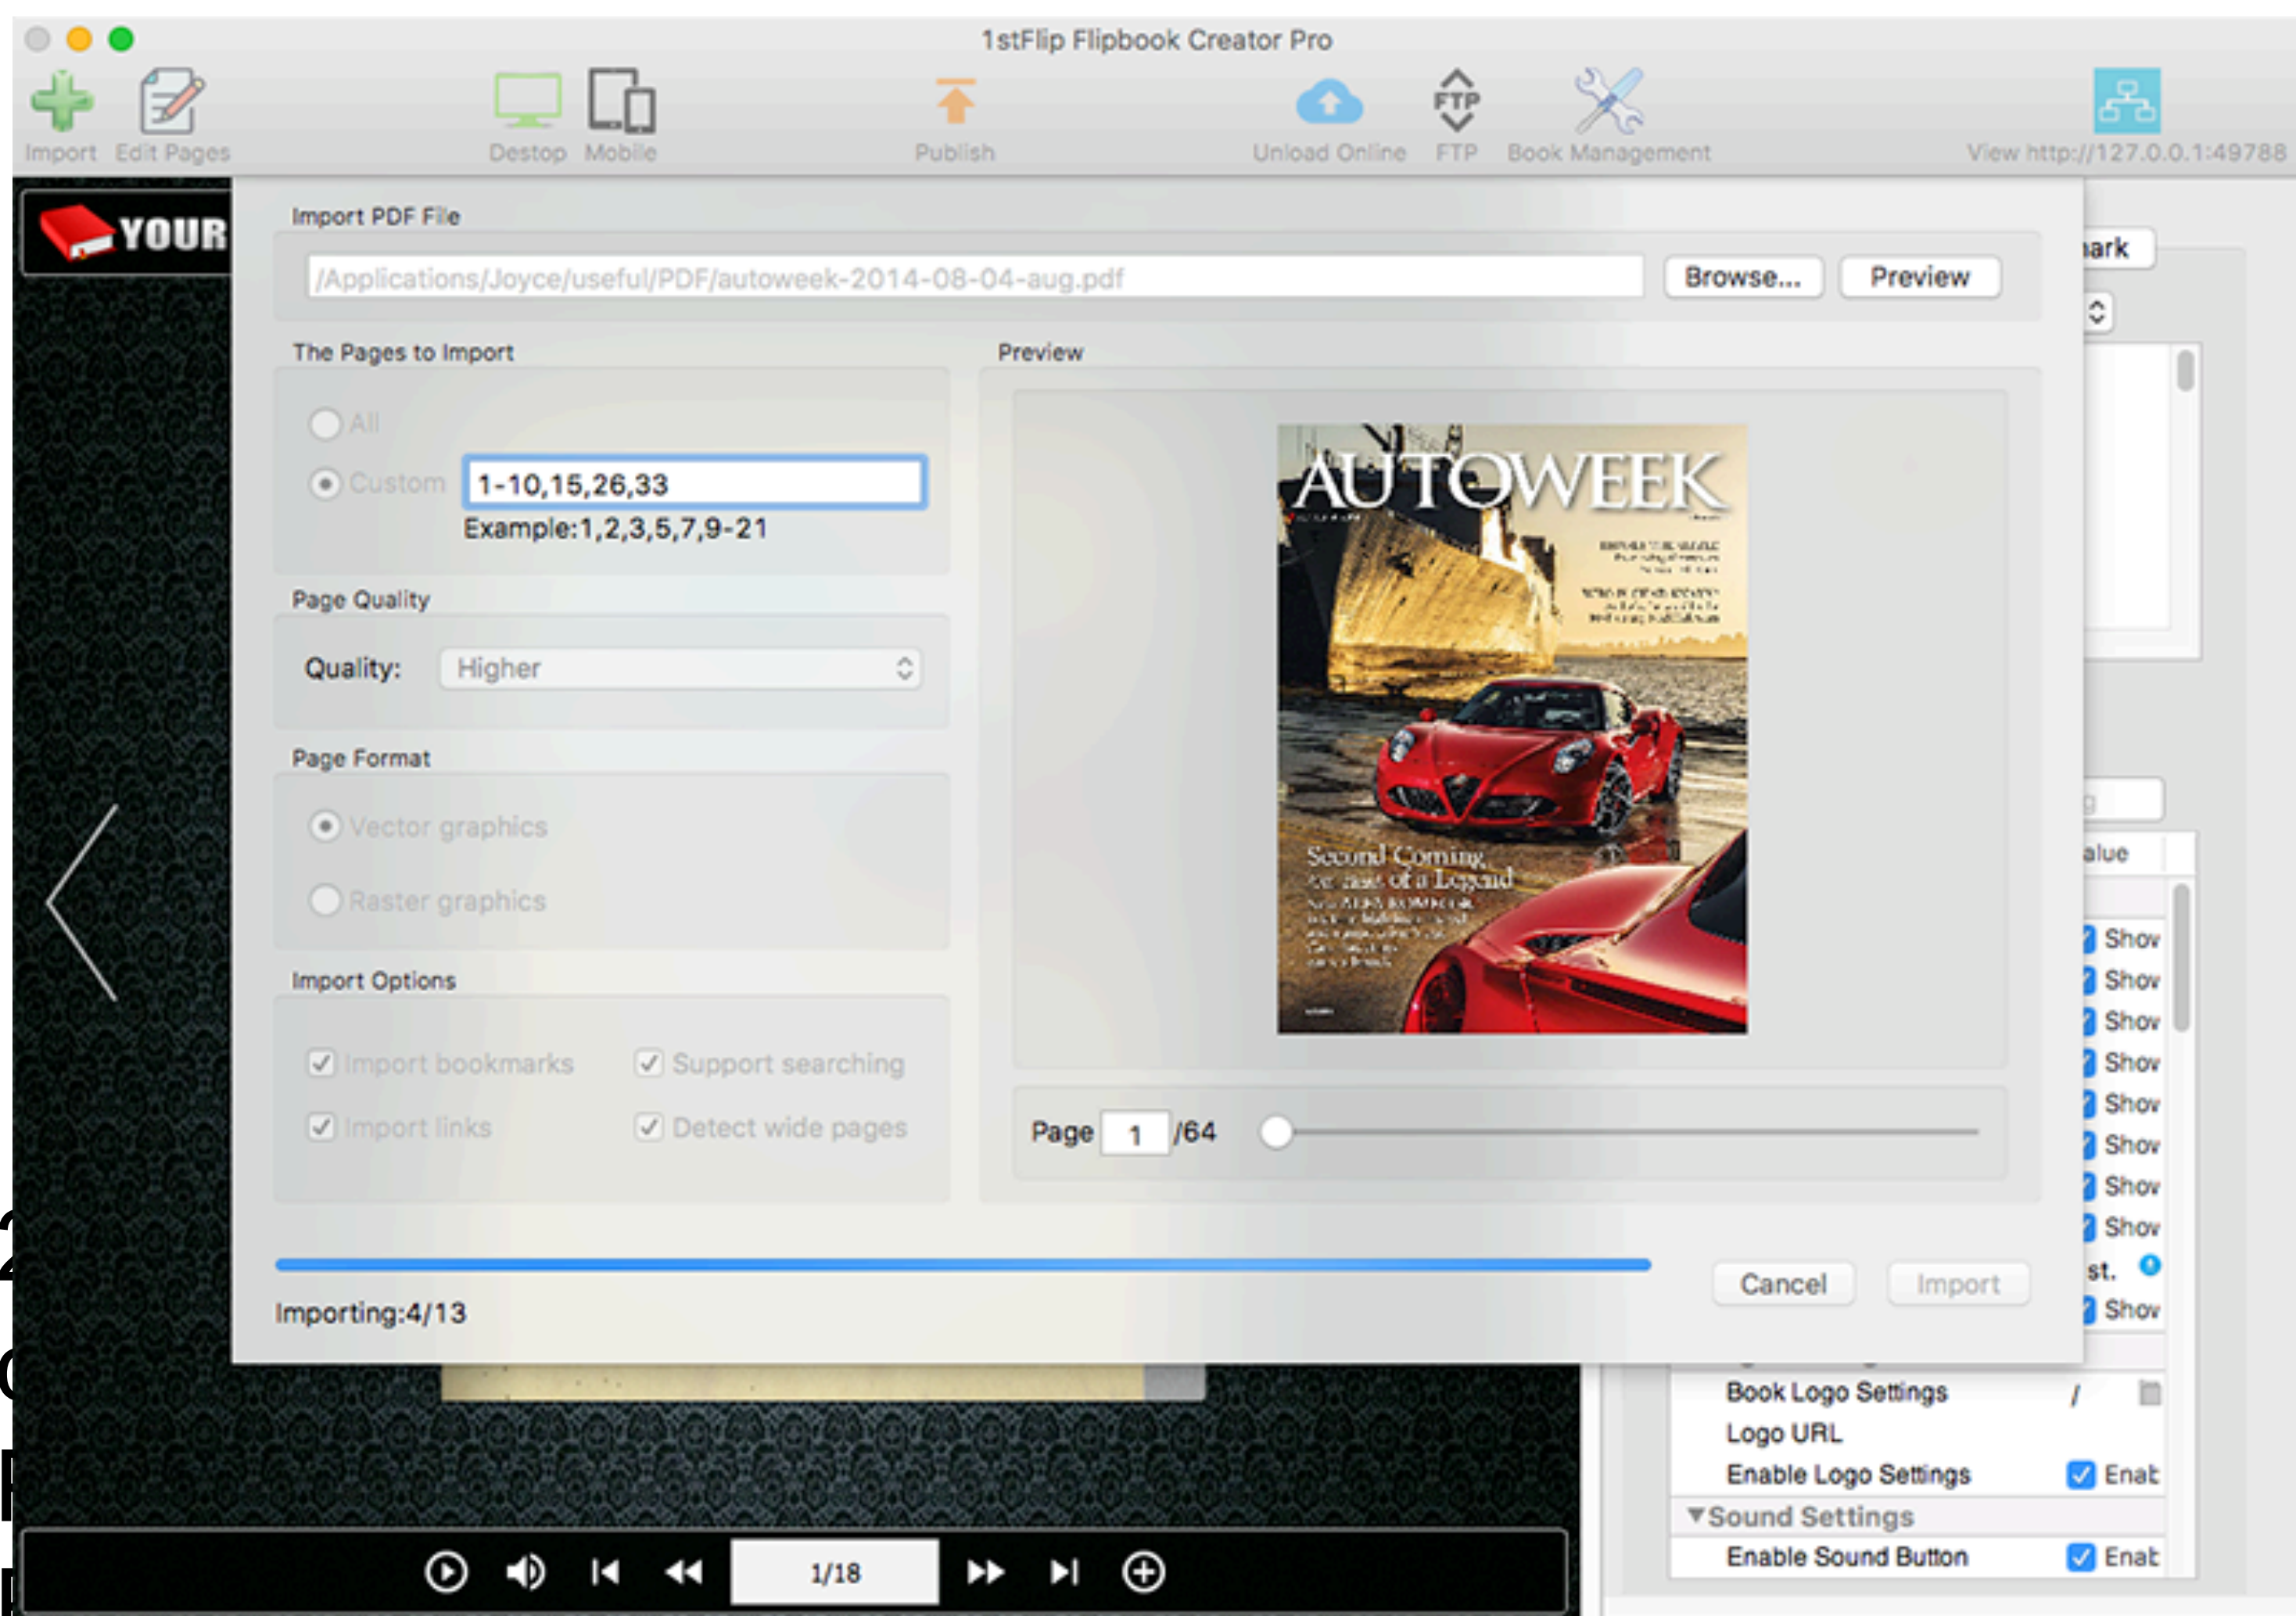

3. Set page quality: Higher, High, Medium, Low and Lower.

4. Choose page format: Vector(.swf) or Raster(.jpg).

5. Other import options:

Import bookmarks: Bookmarks in the PDF file will be available in the converted flipbook if you check this option.

Support searching: Search any content within the flipbook.

Import links: Links in the PDF file will be preserved in the converted flipbook if you check this option.

Detect wide pages: Automatically detect wide page and then split it into two pages.

After all these settings, click Import button. Then you can see the PDF file in the interface. Now the page-flipping effect is added; what you see in the display area is what your flipbook looks like after creation, so you may want to make some changes.

Import images

Click the Import images button:

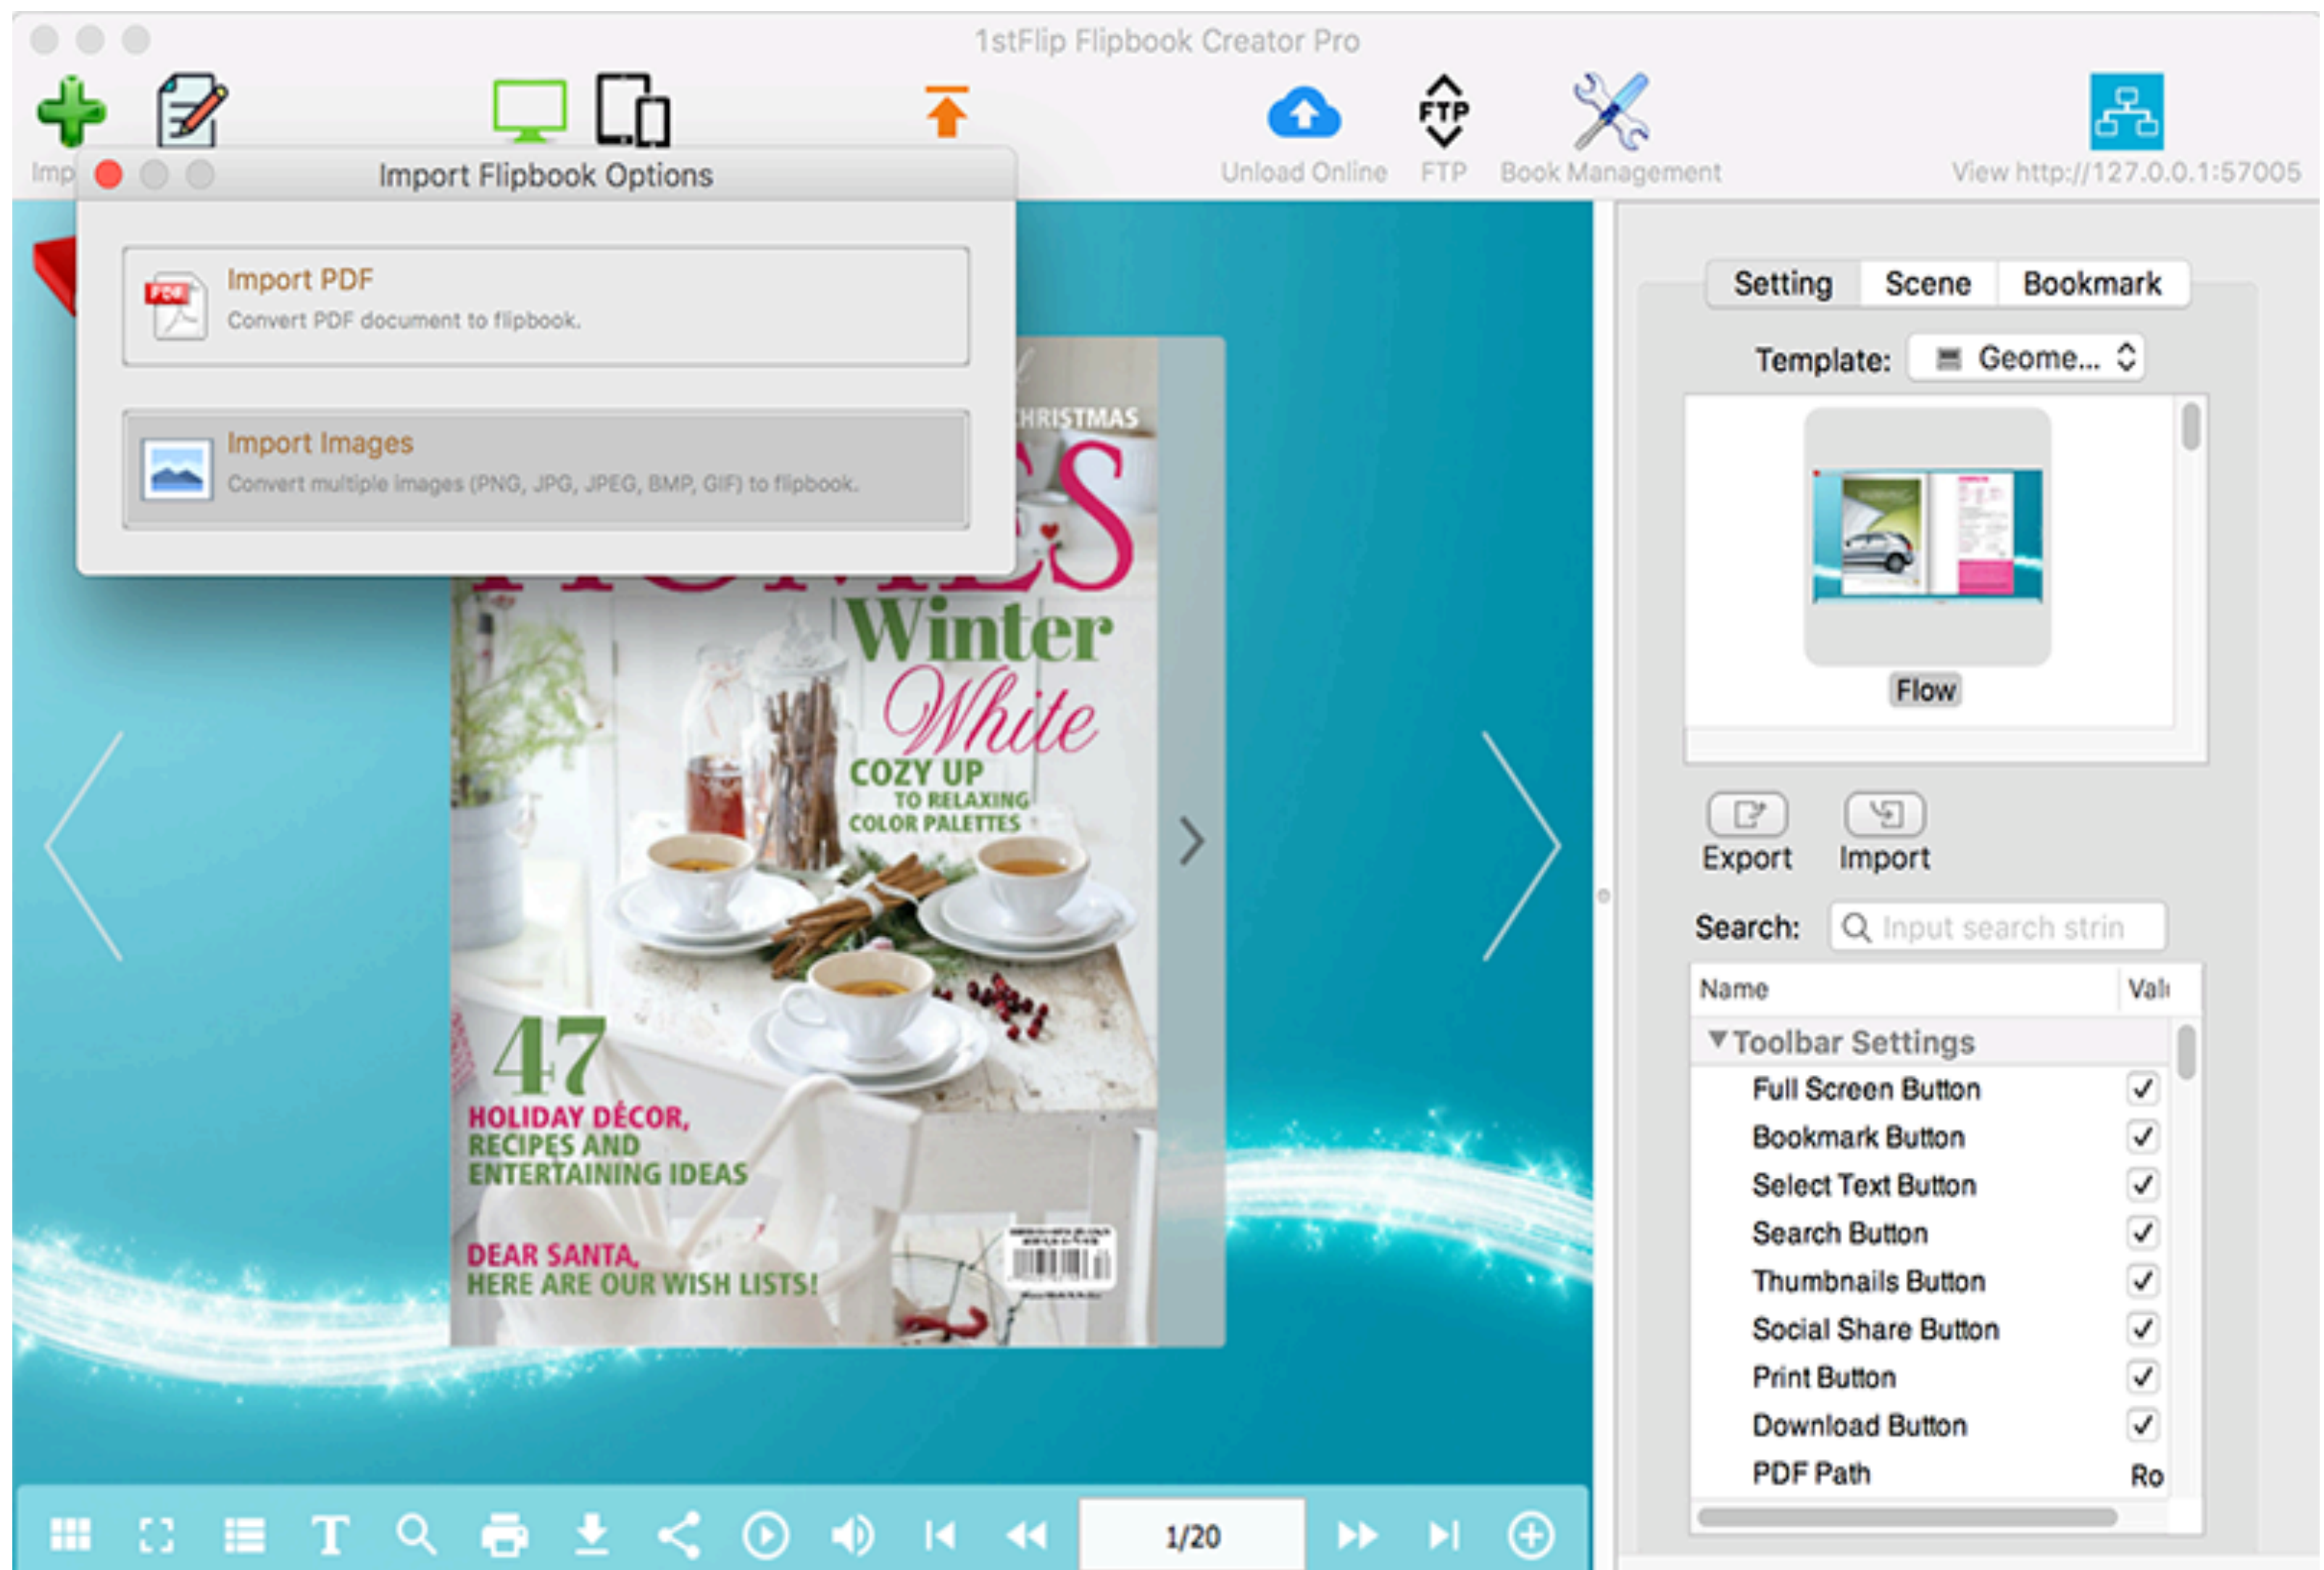

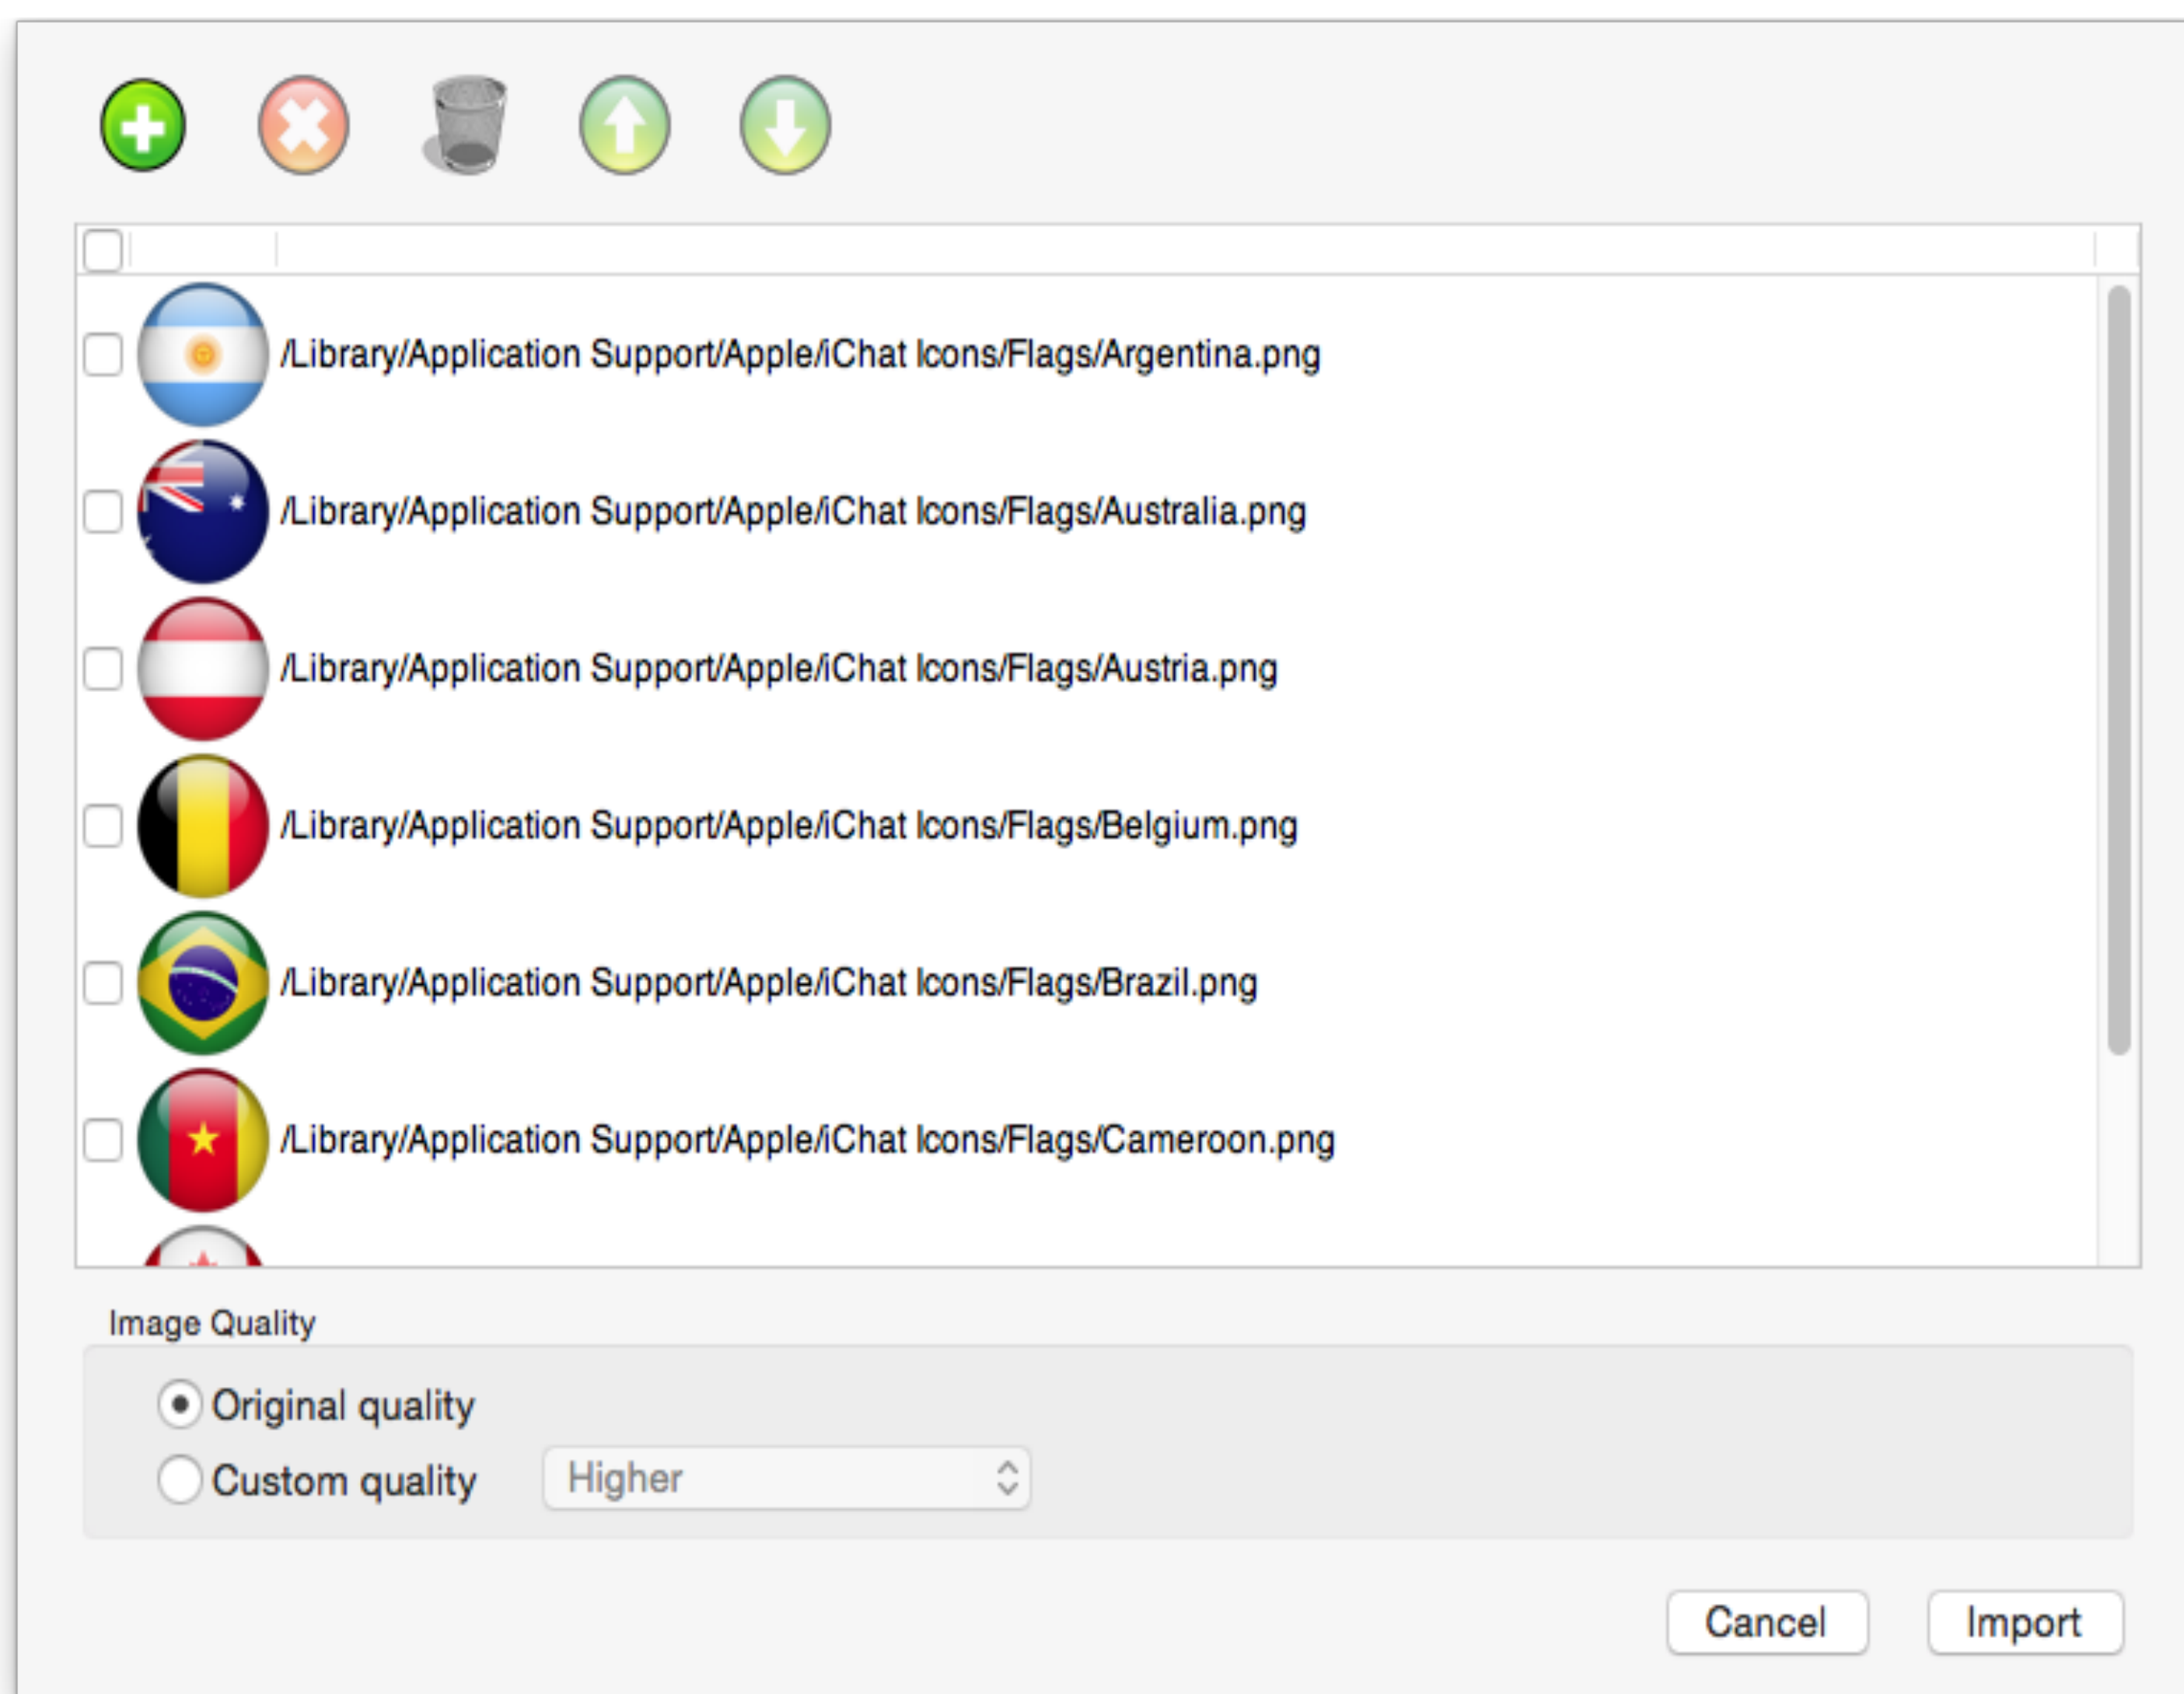

Click ![plus](green plus) to add images, ![x](x button) to

remove unwanted ones, ![trash](trash can) to

delete all, ![up](up arrow) and ![down](down arrow) to adjust orders.

Set the image quality and click Import.

2. Edit pages

The biggest difference between the ordinary version and the Pro version is that you can edit any page or add PDF and image as new pages. Click Edit Pages button to open the below window:
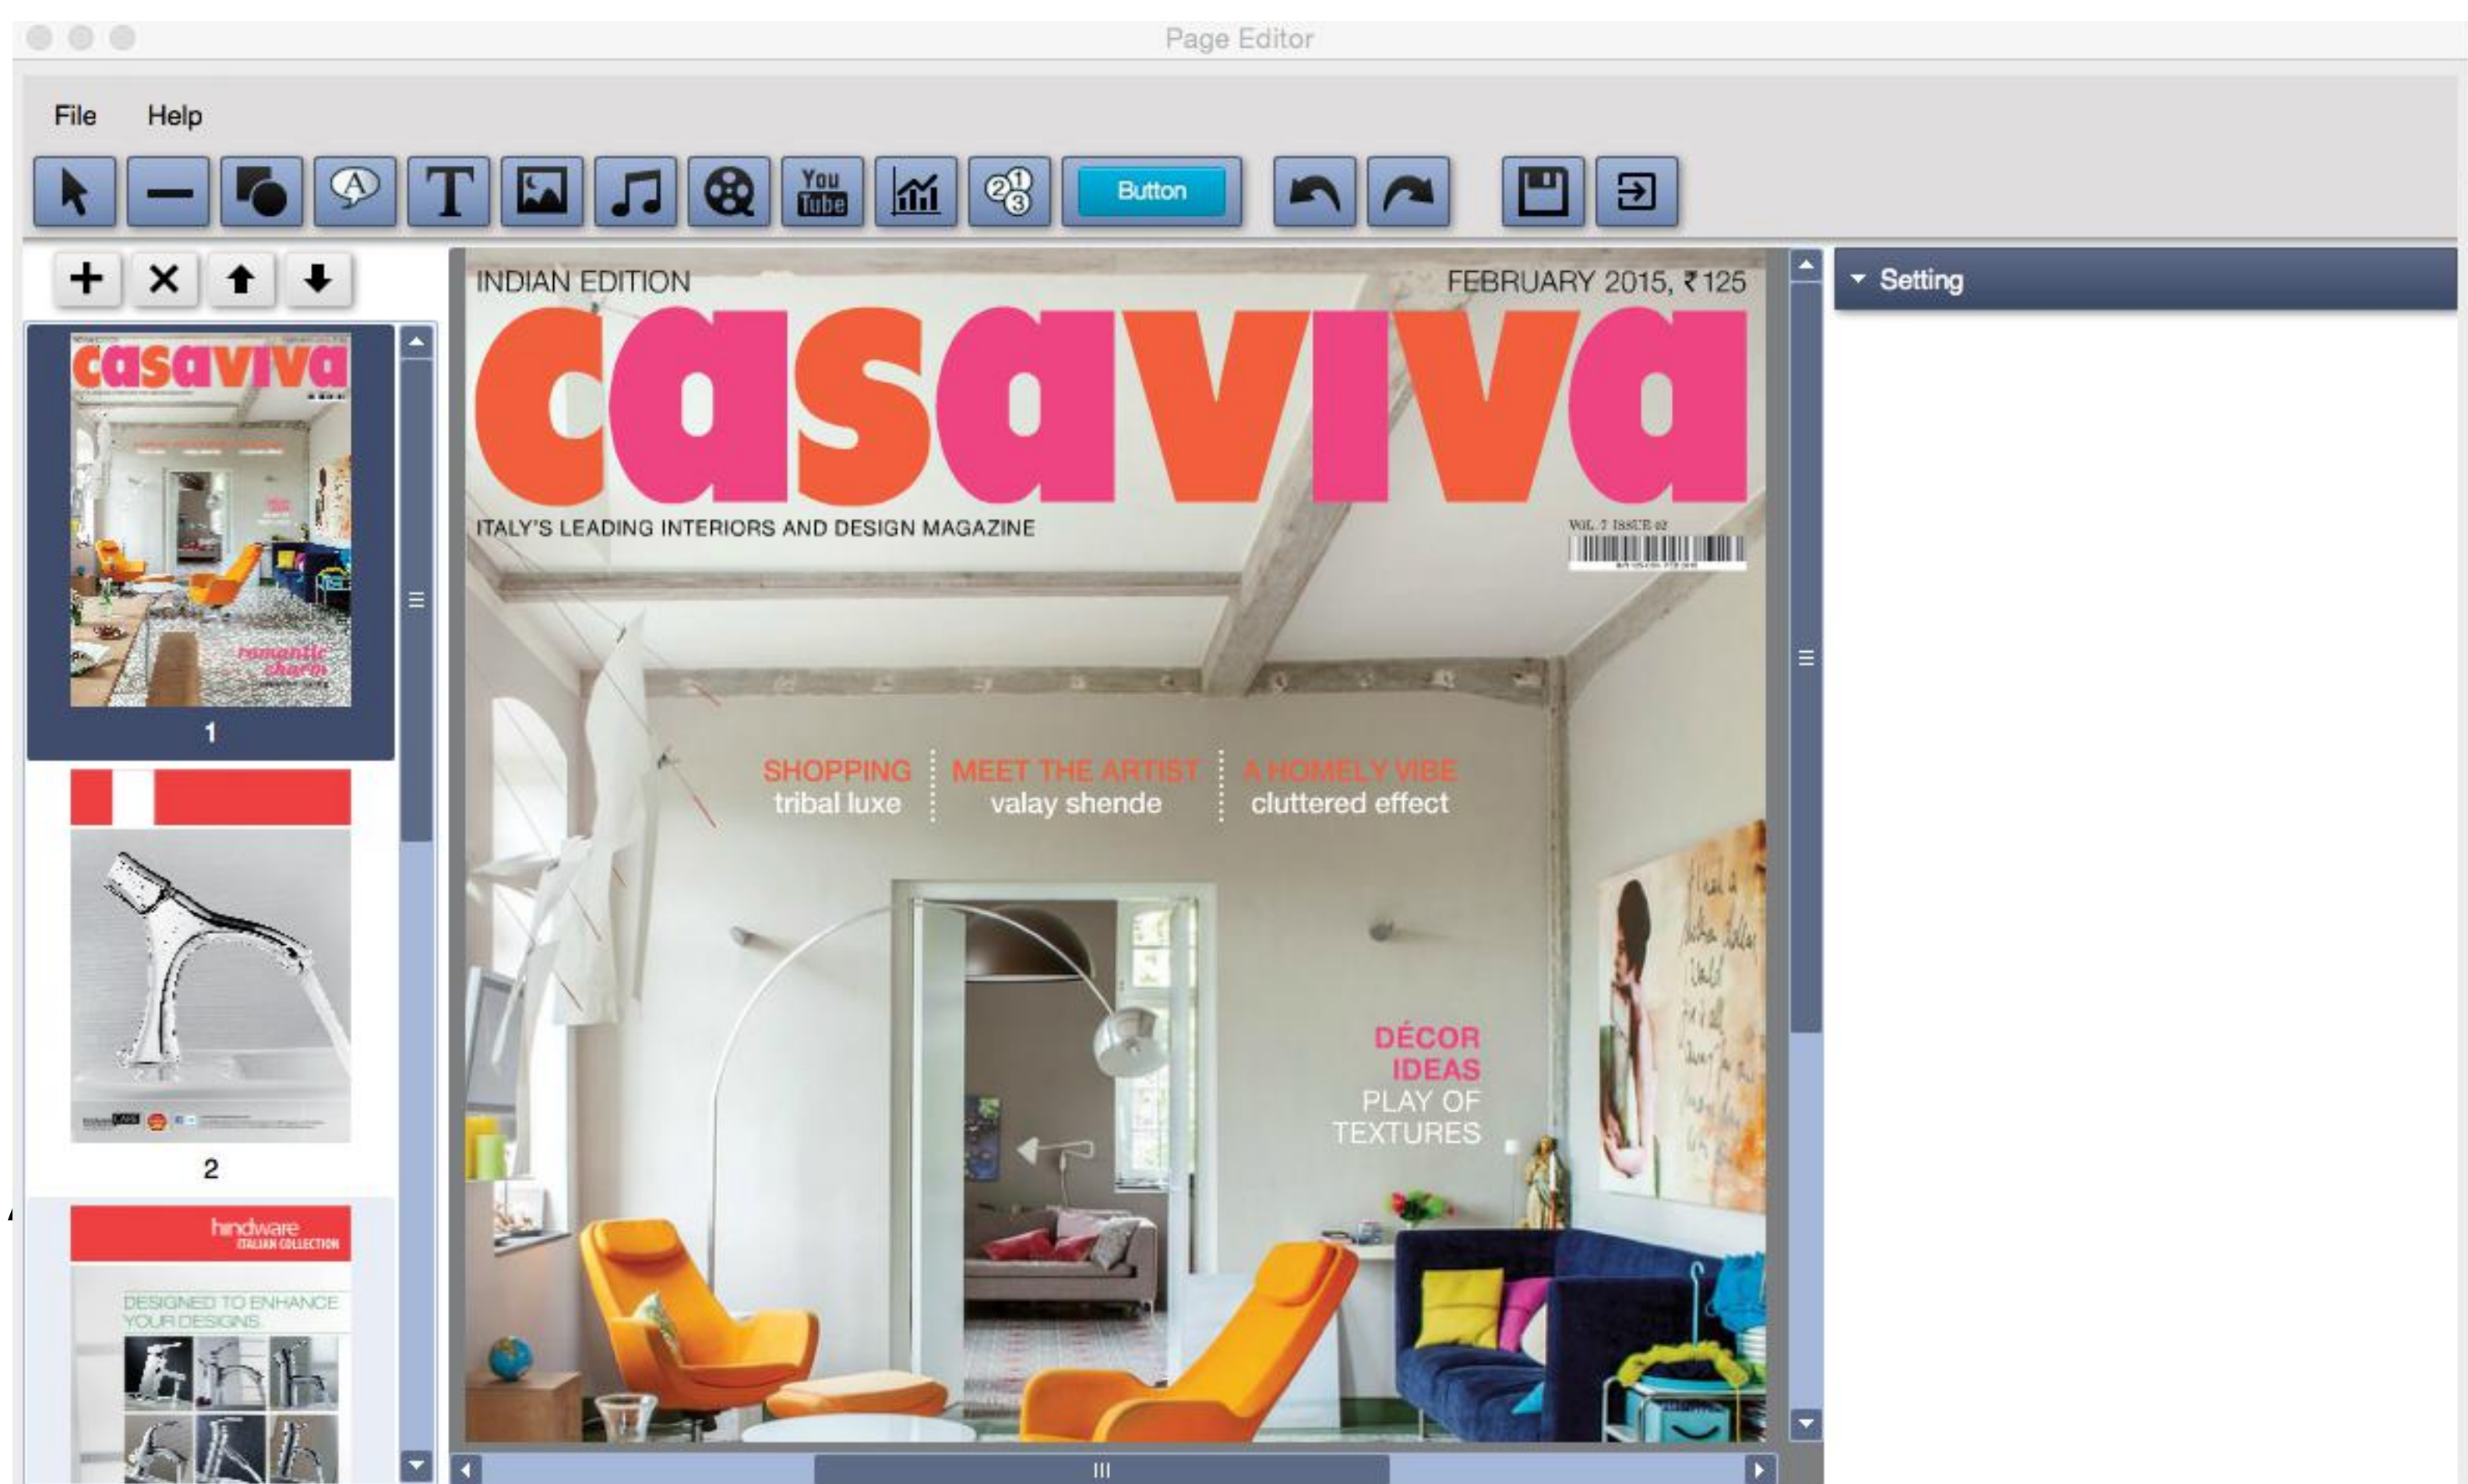

- **Add Line**

Click the Add Line button below and draw a line anywhere you want. Under the Setting tab you can choose Line Type, Line Color, Line Width and Line Alpha.
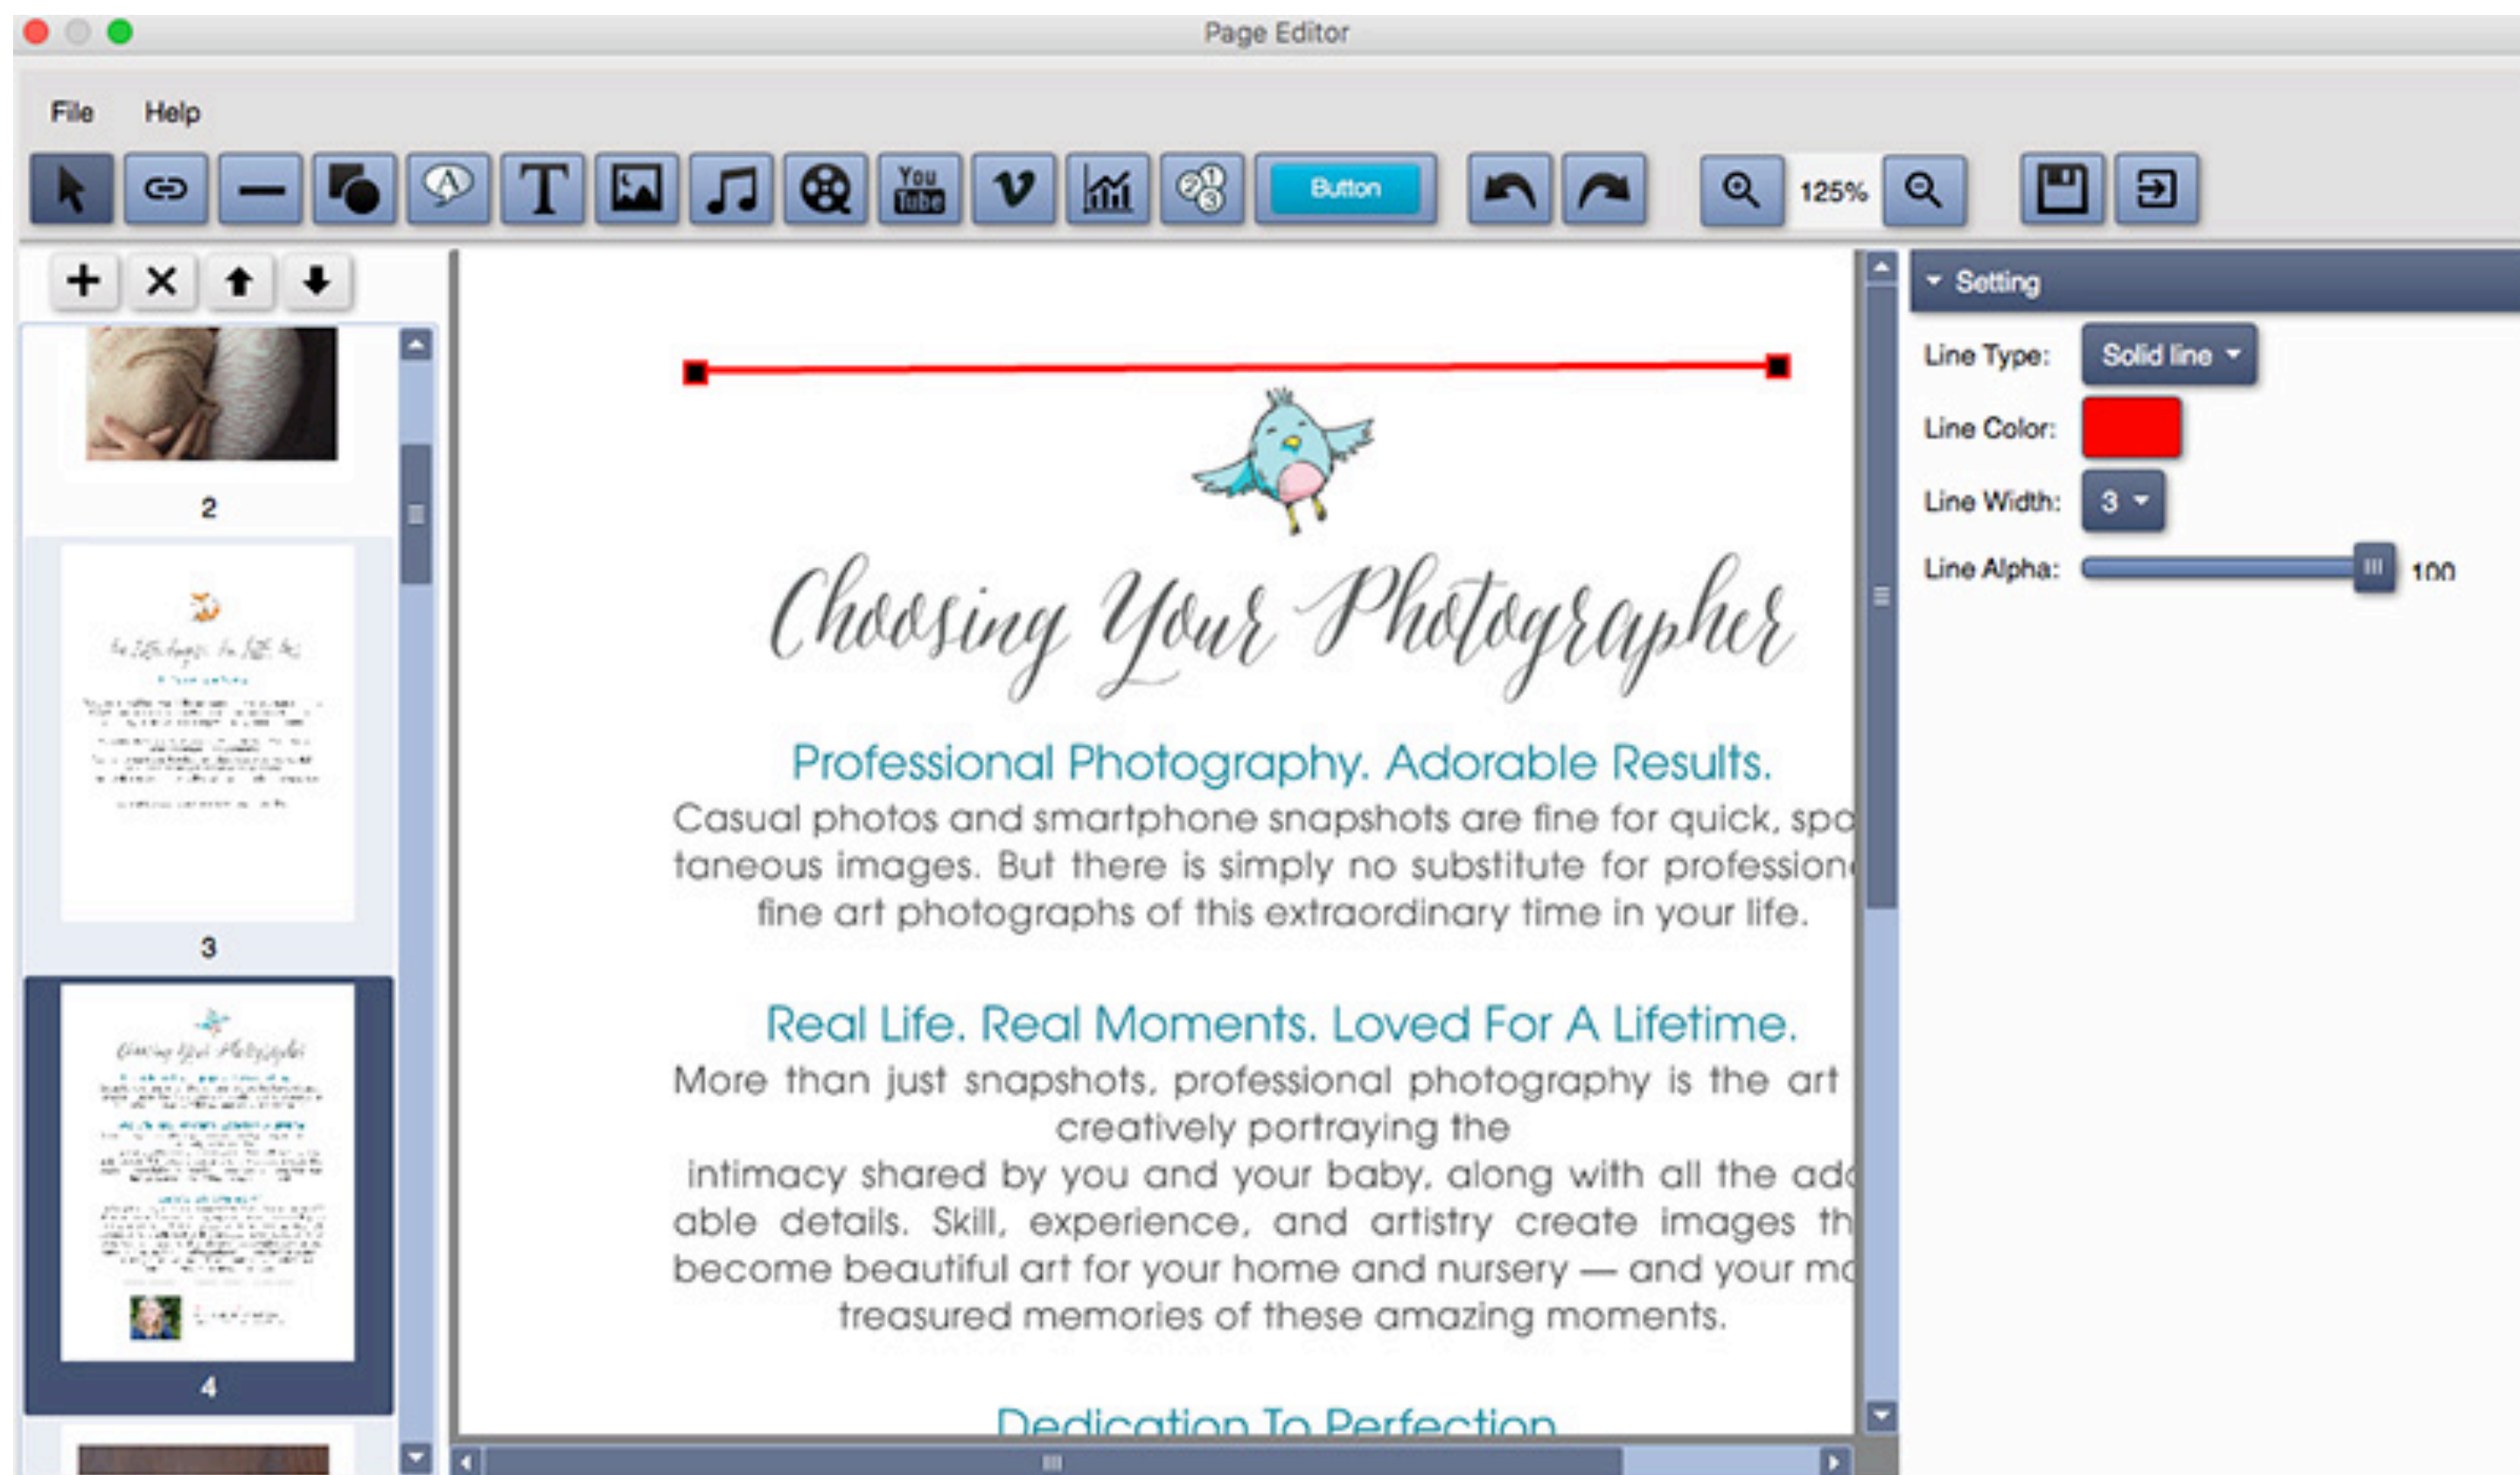

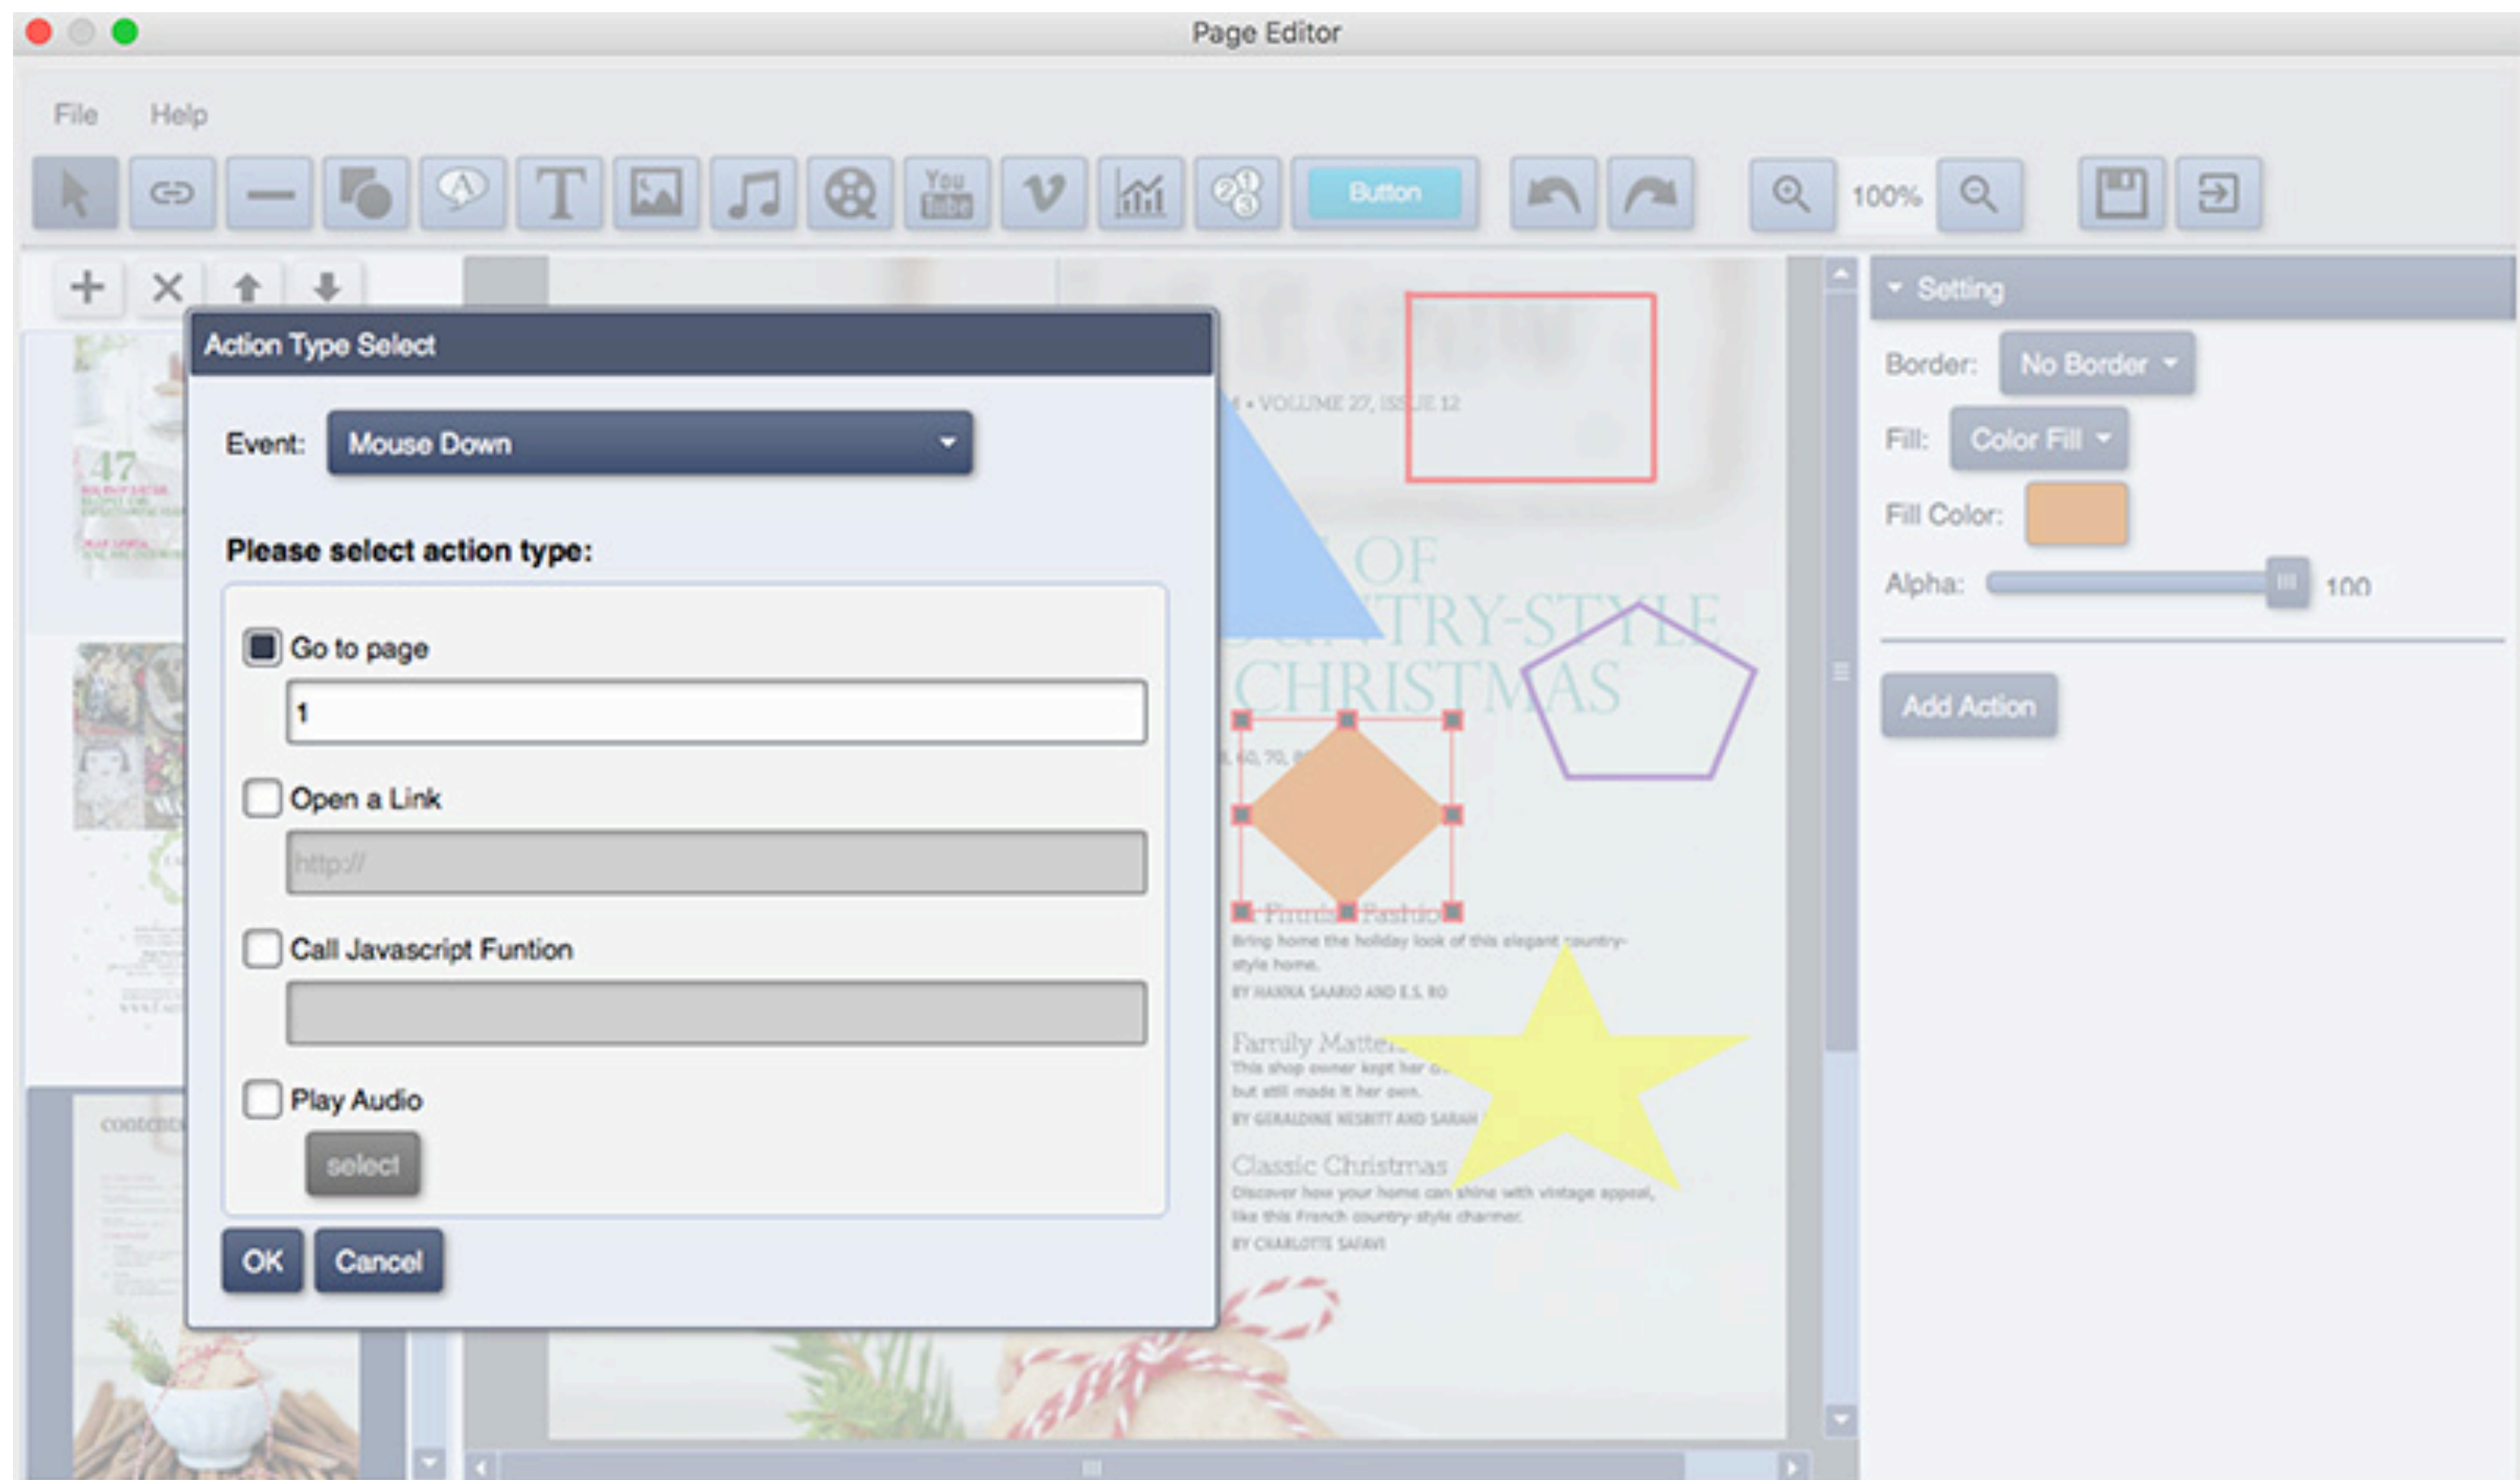

- **Add Shape**

 Click the Add Shape button and choose the one you need.

C
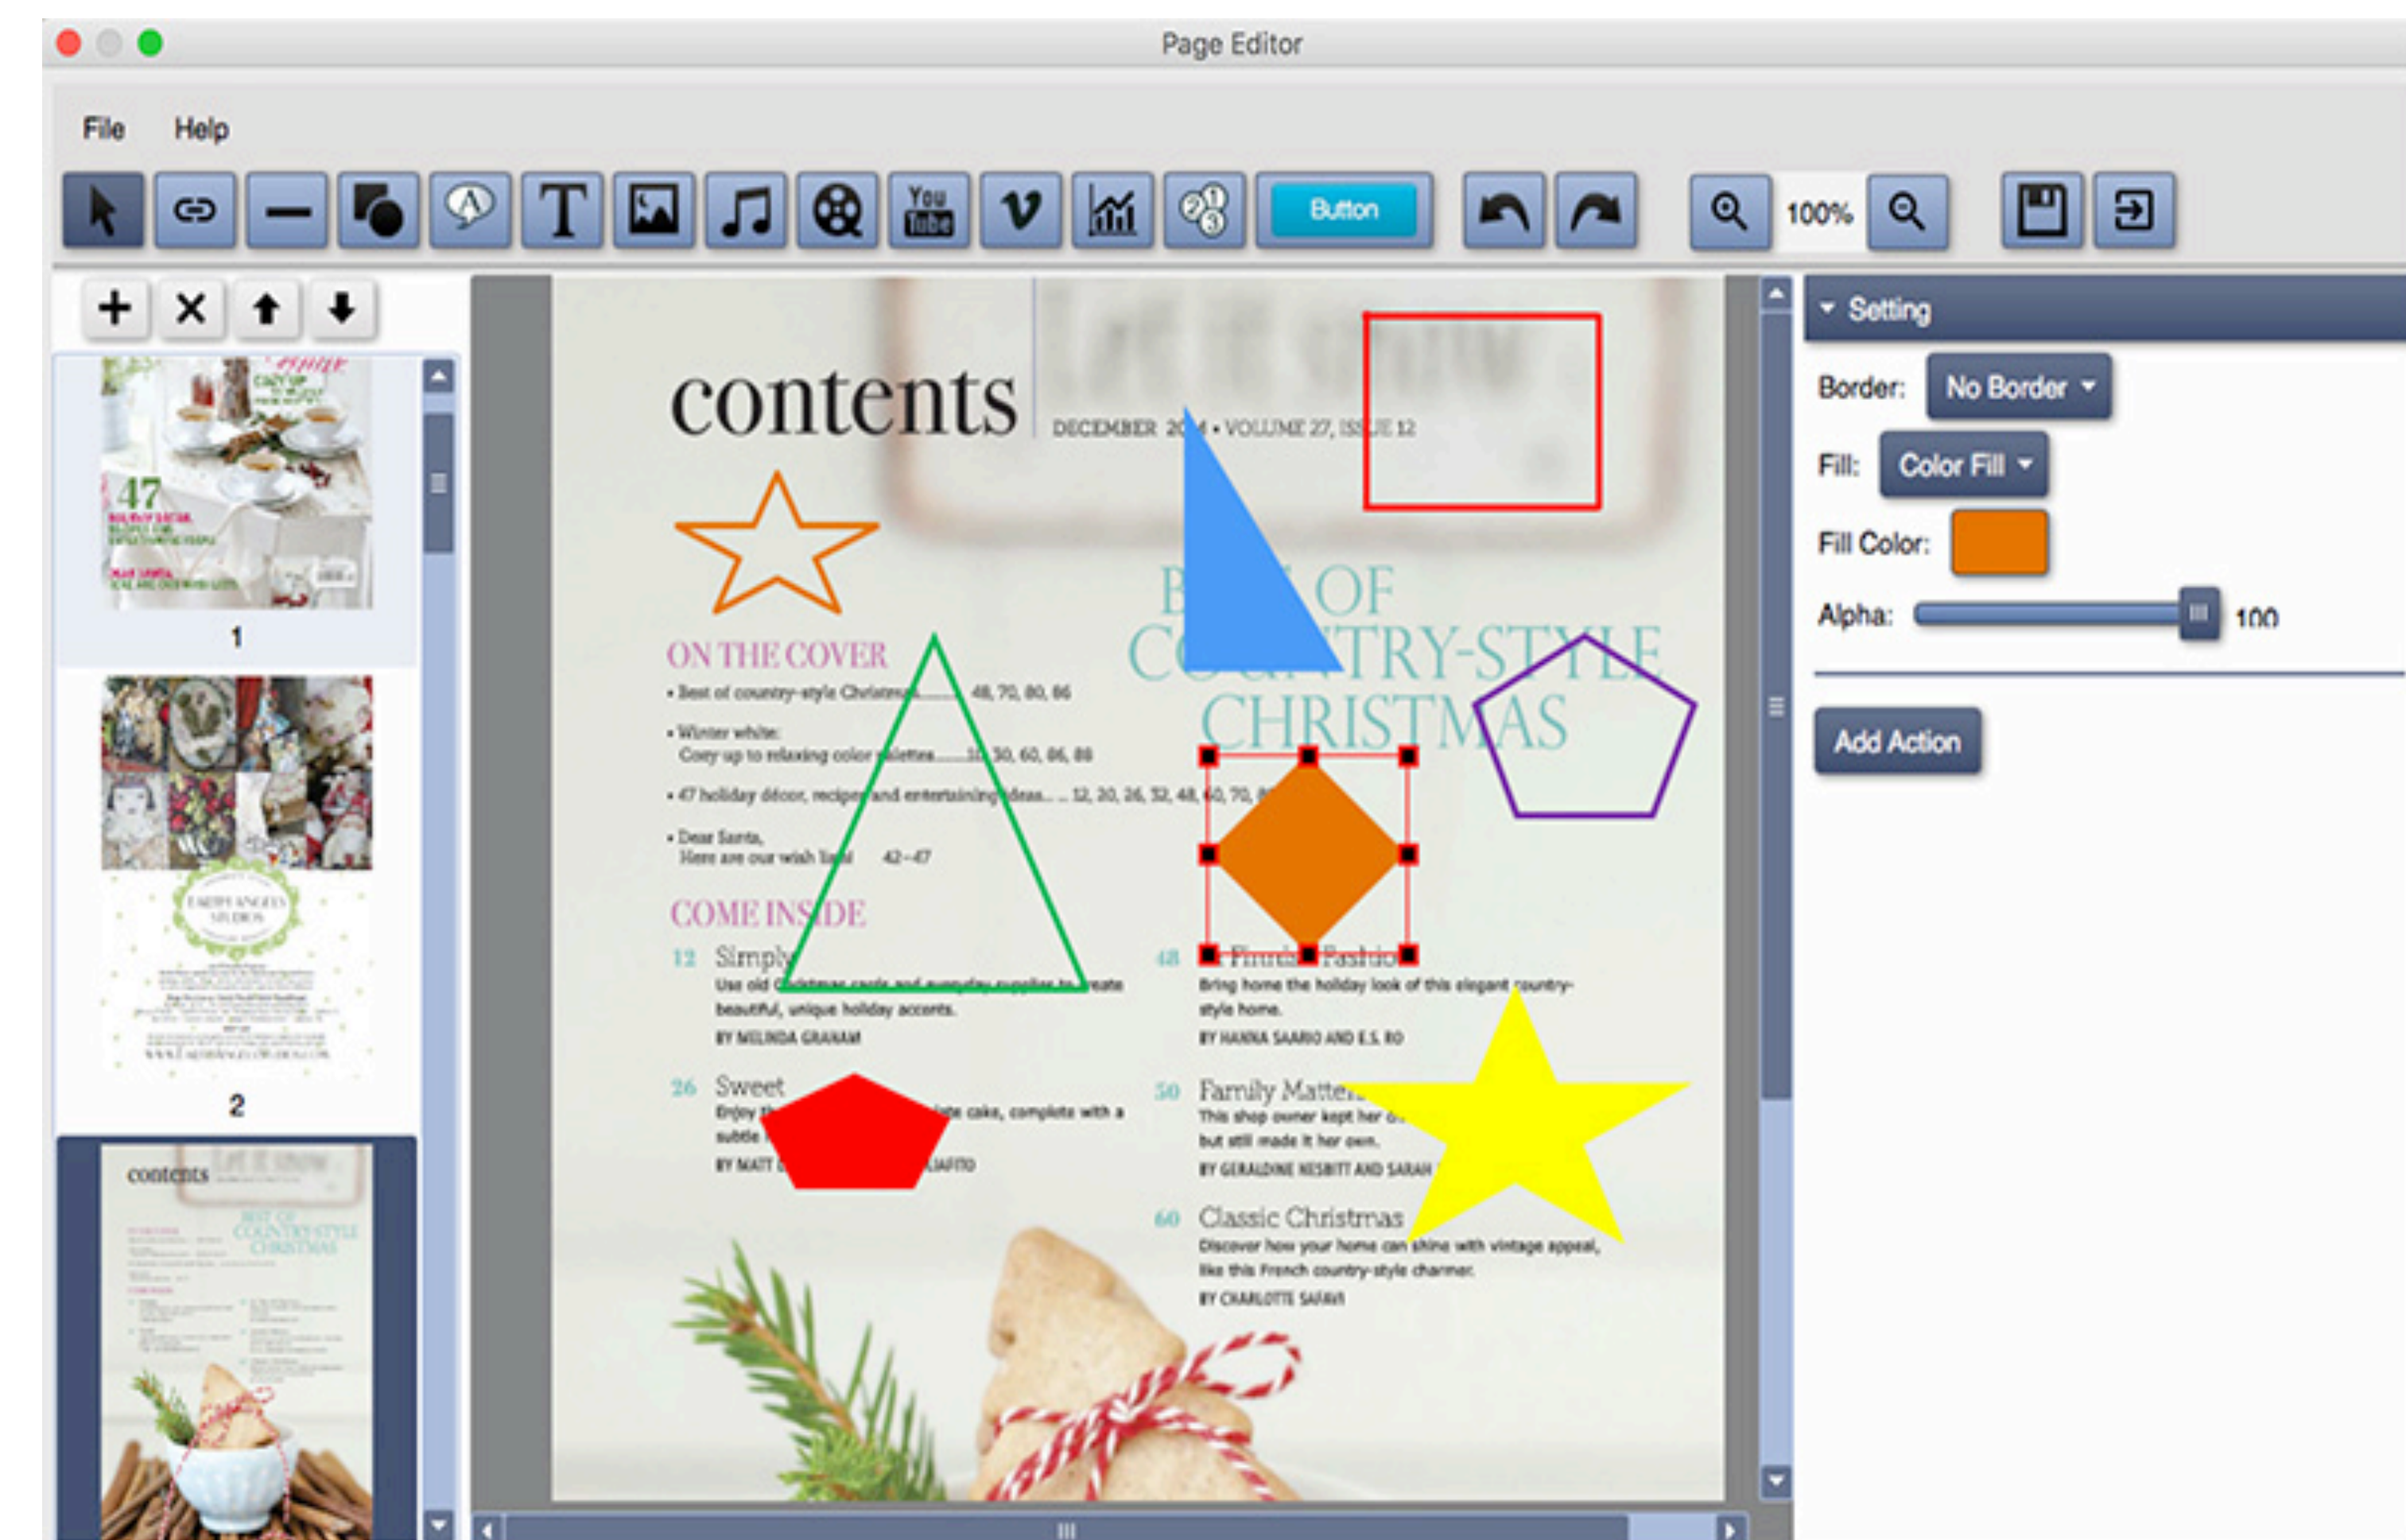

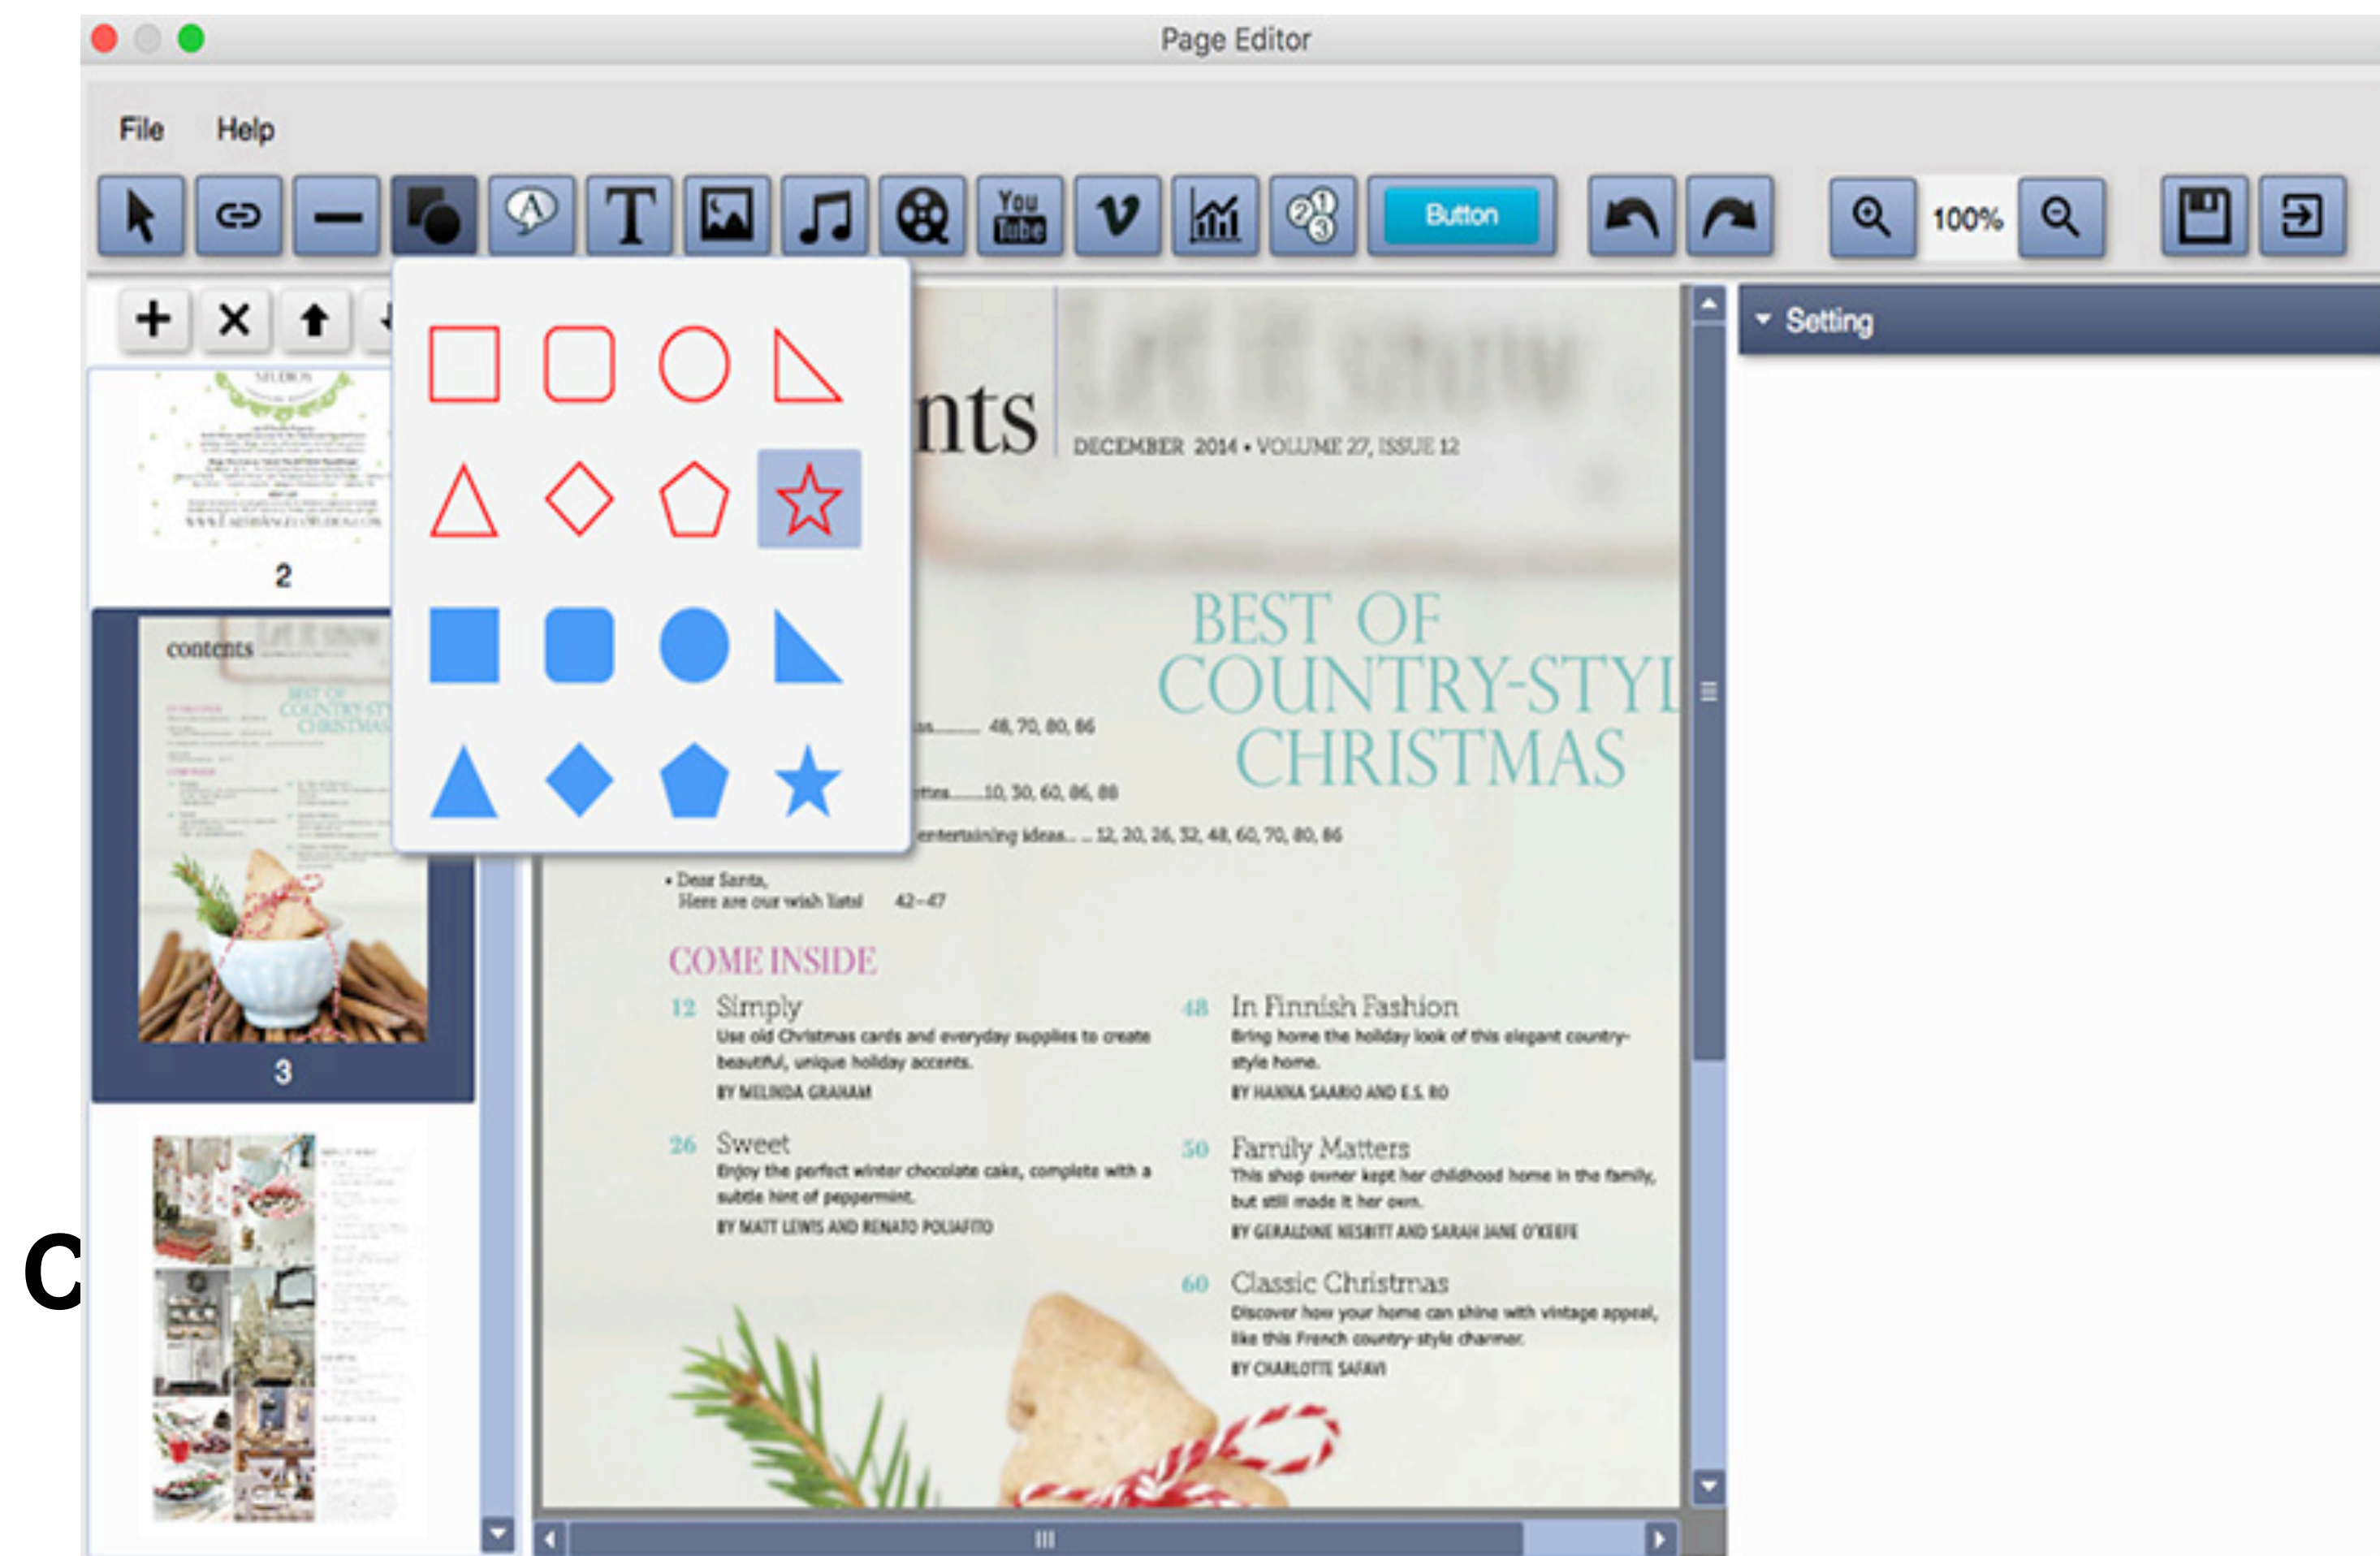

Click the Add Action button to open the below window and select trigger event and action for any shape you added.

- **Add Callout**

Click the Add Callout button, choose callout style and draw on the page. Double click it to enter your text. Under the setting tab you can set Border, Fill and Font parameters and Add Action.

- **Add Text**

Click Add Text button and click on the page, enter your text. Set font, size, color, etc. on the right side.
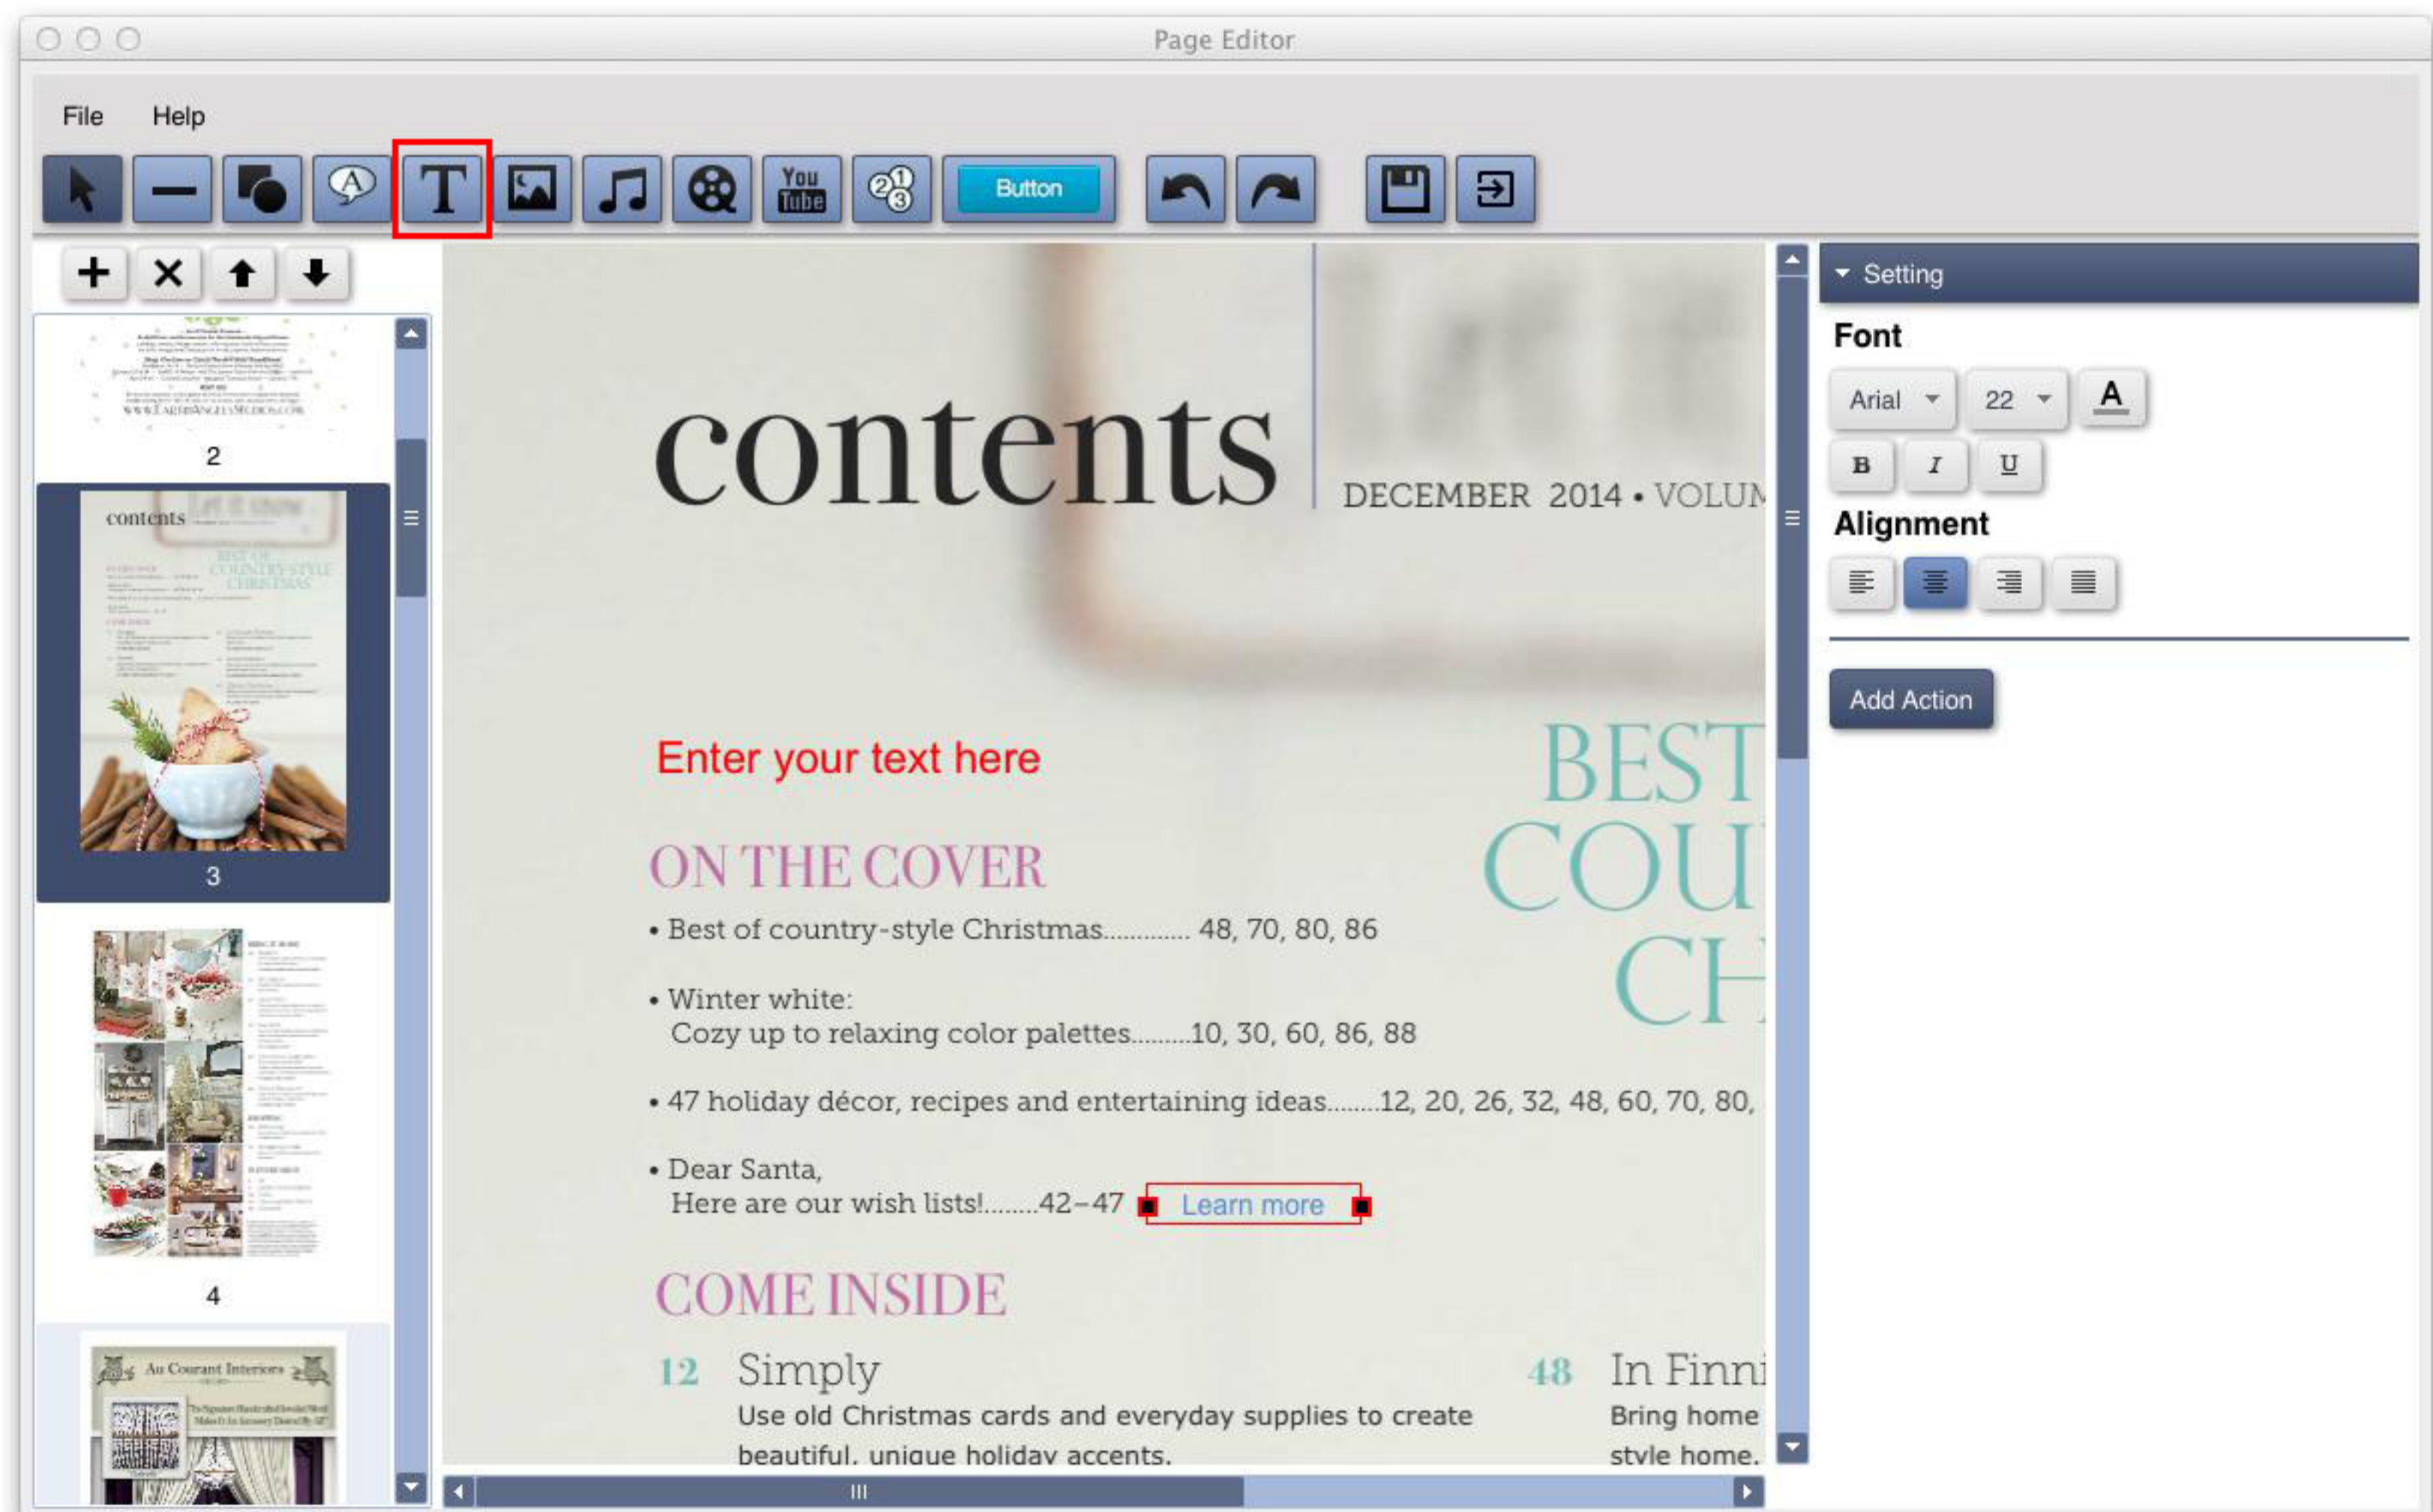

- **Add Image**

Click the Add Image button and click on the page. Click the replace button on the right side to choose your own image.
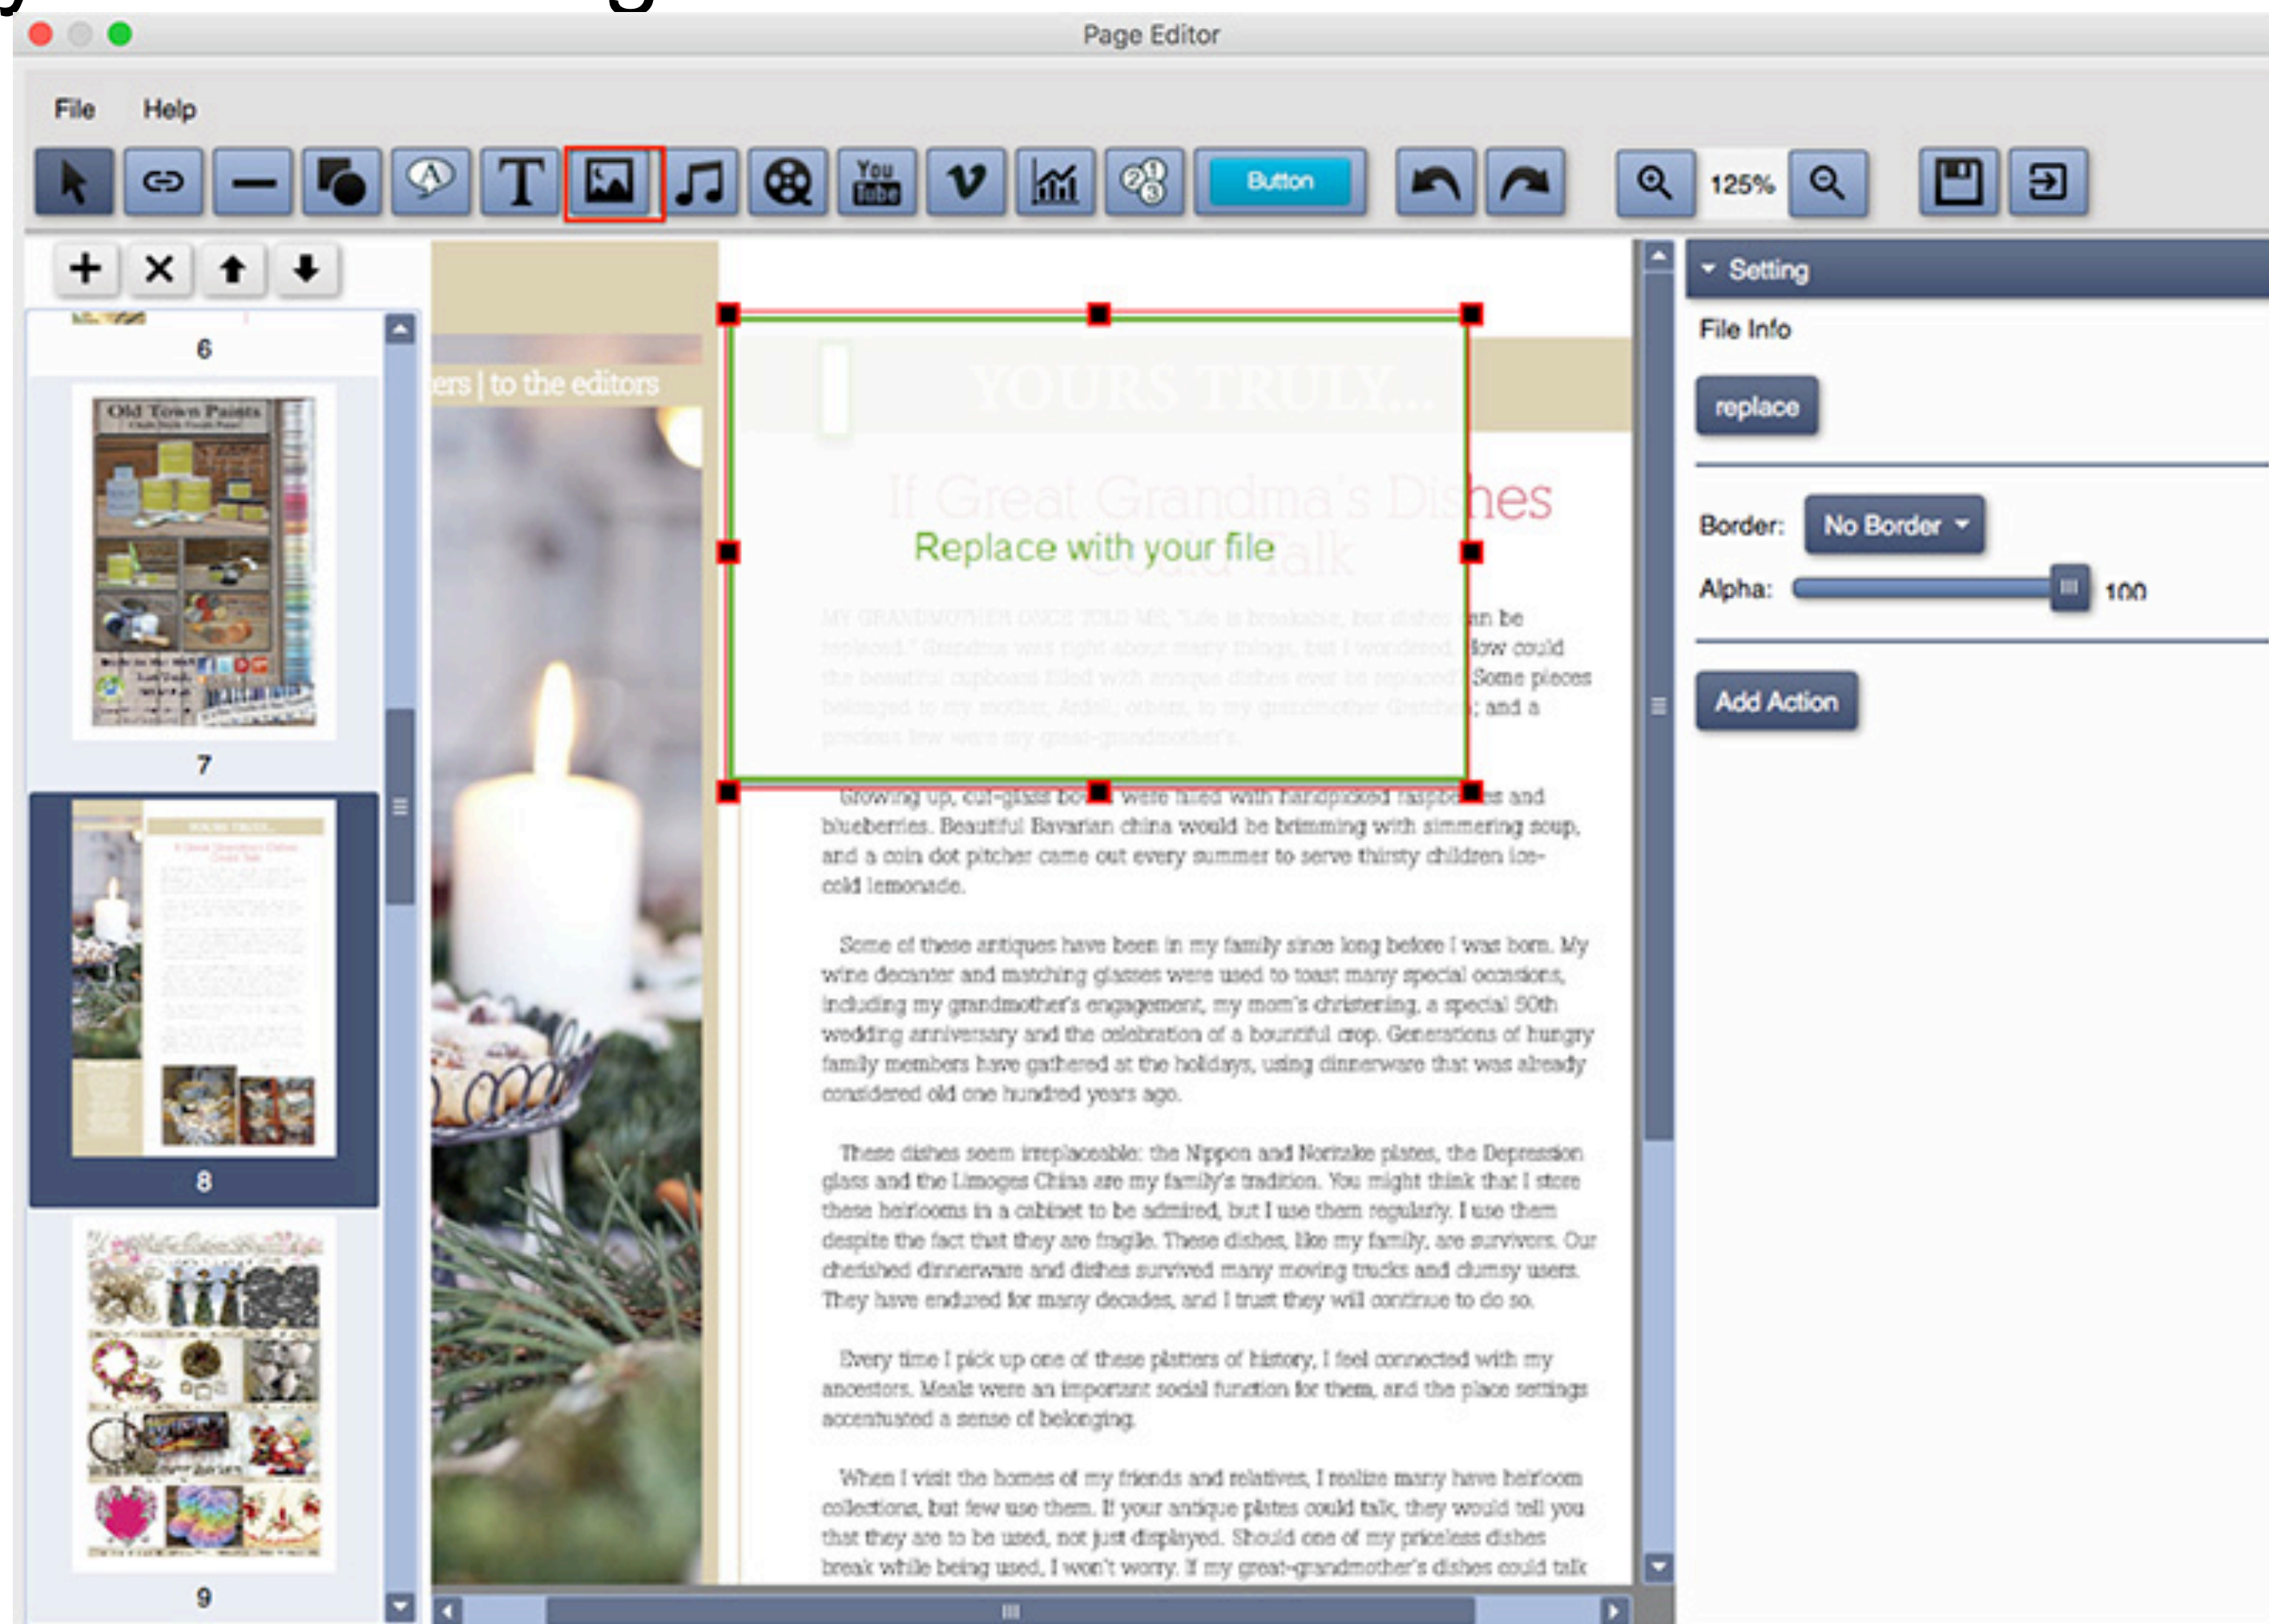

Drag the red square on the image corner to change the size. Under the Setting tab you can set image Border, Alpha value and action.
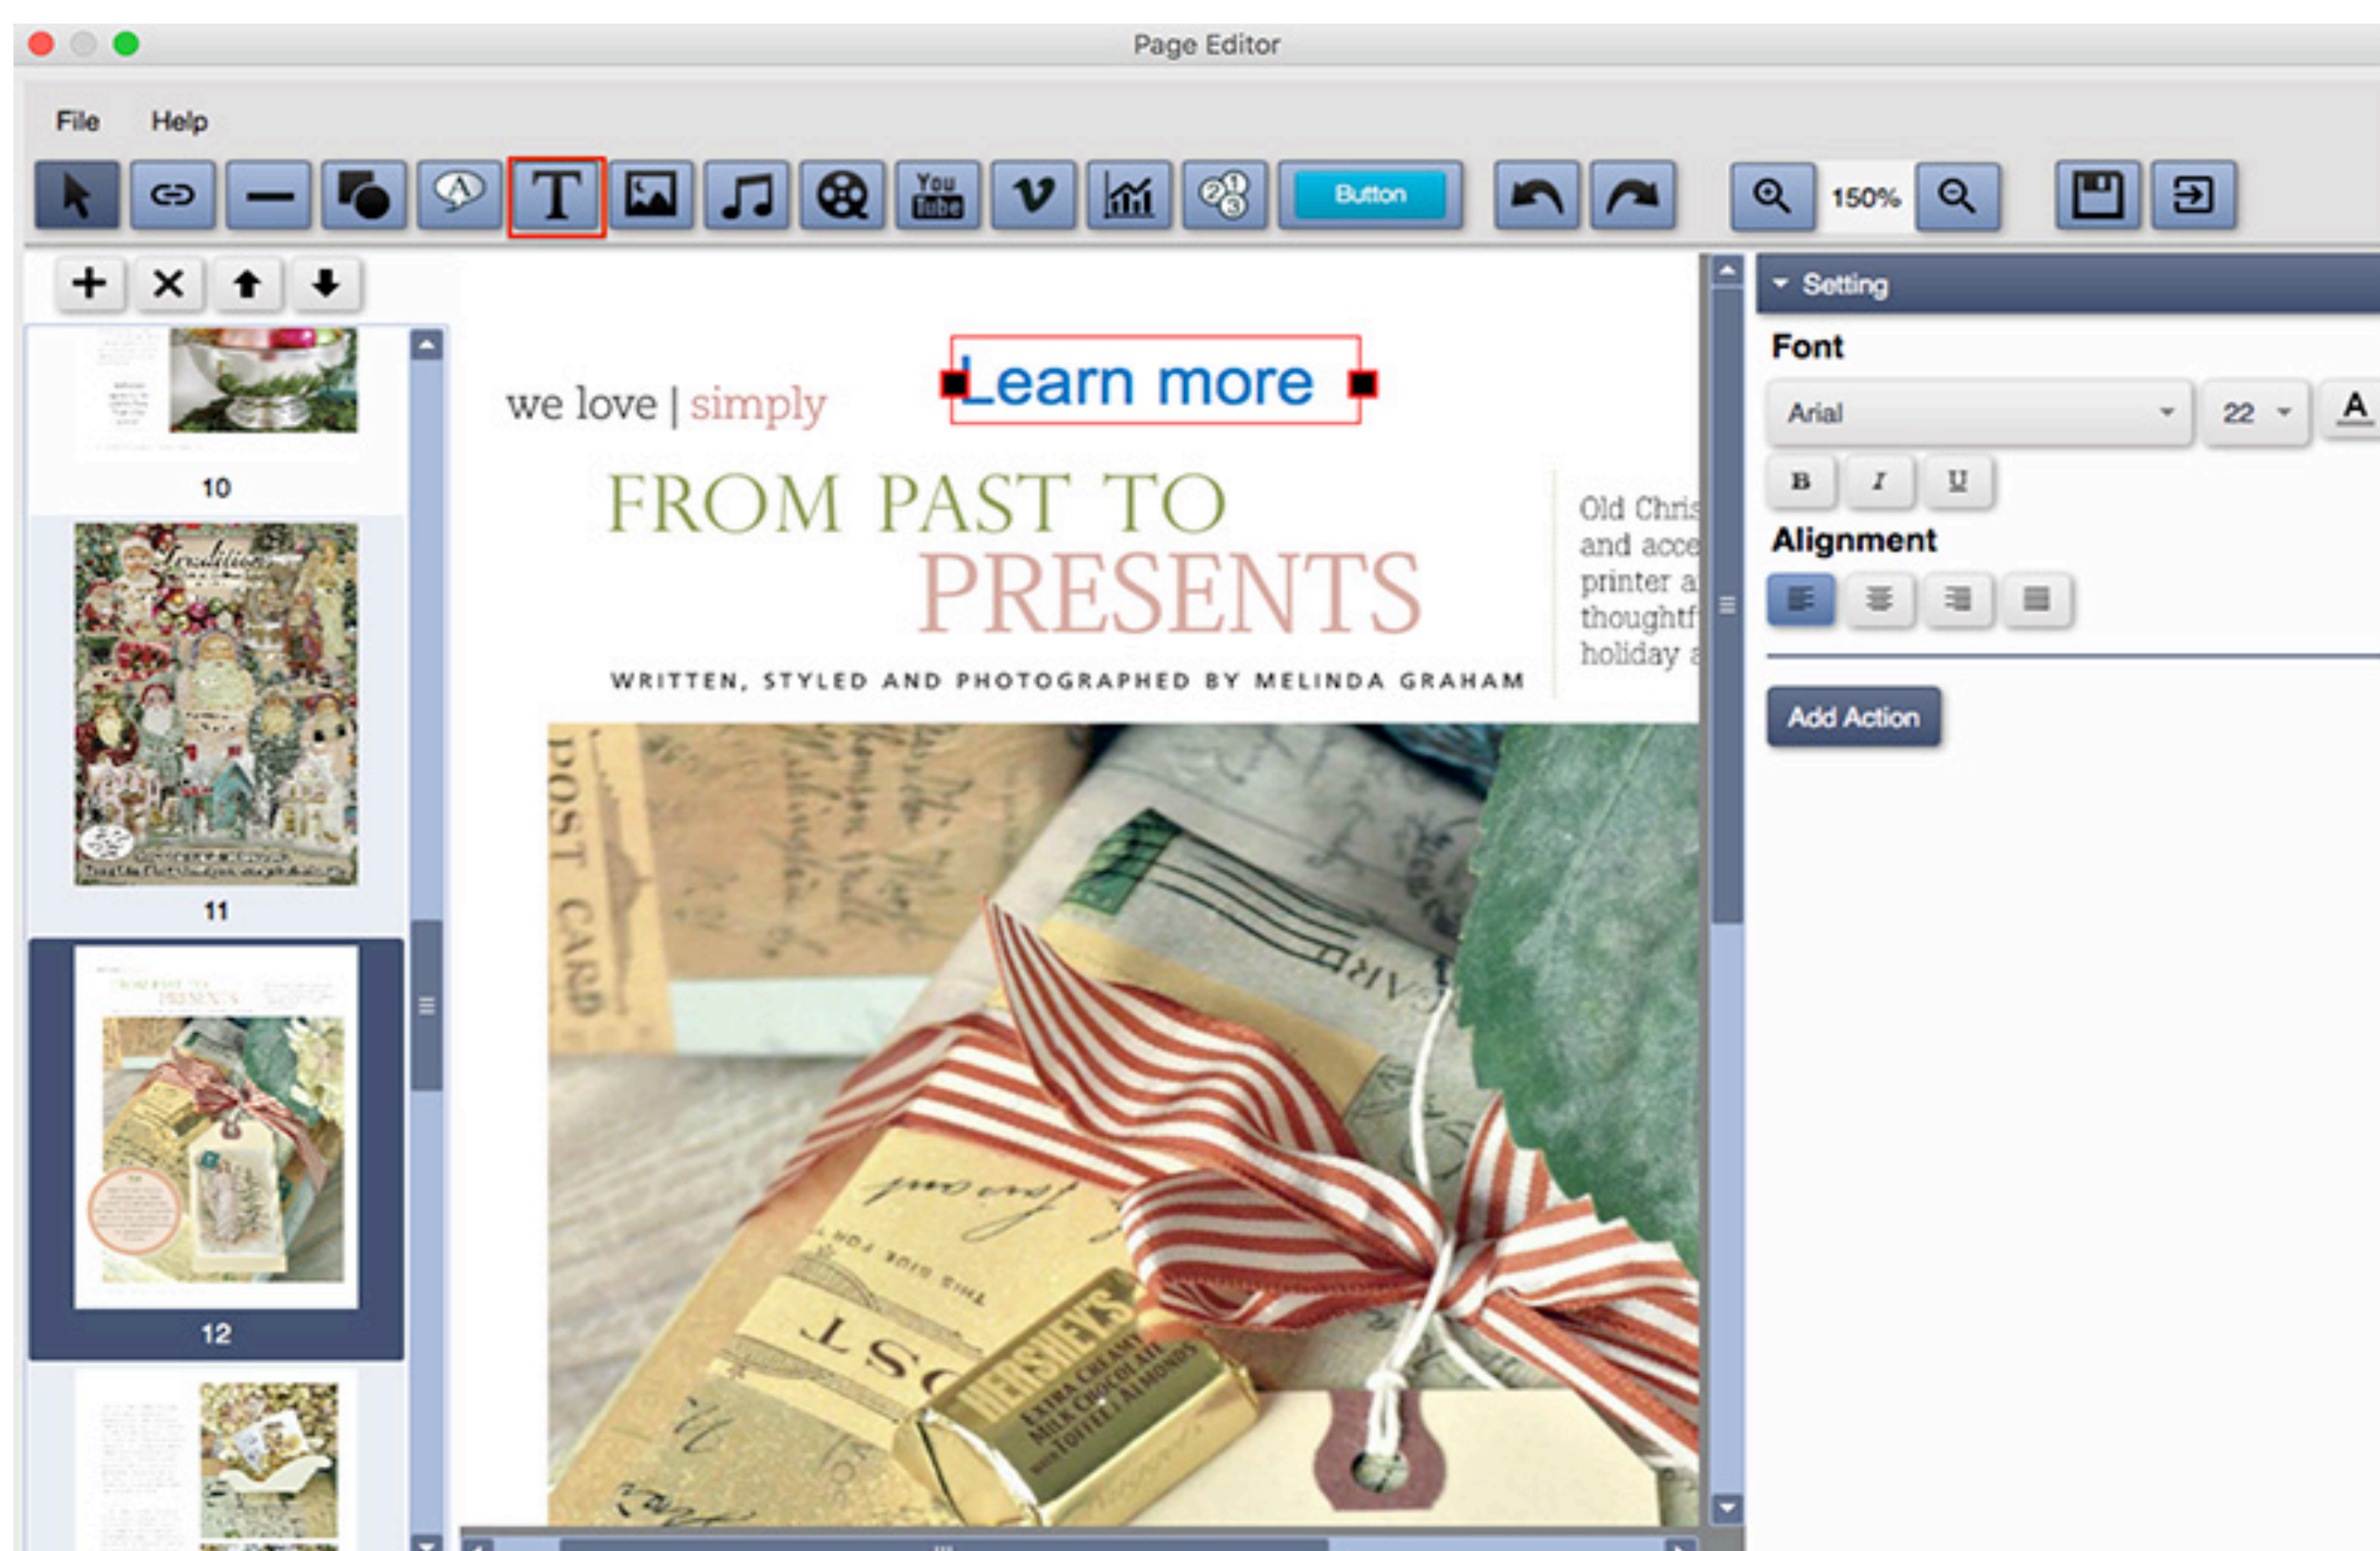

- **Add Music**

Click the Add Music button and click on the page to bring the music player. Click replace button on the right and choose a local MP3 file. The song name will be auto-captured. You can set the music player background color and font size.

Play the music.
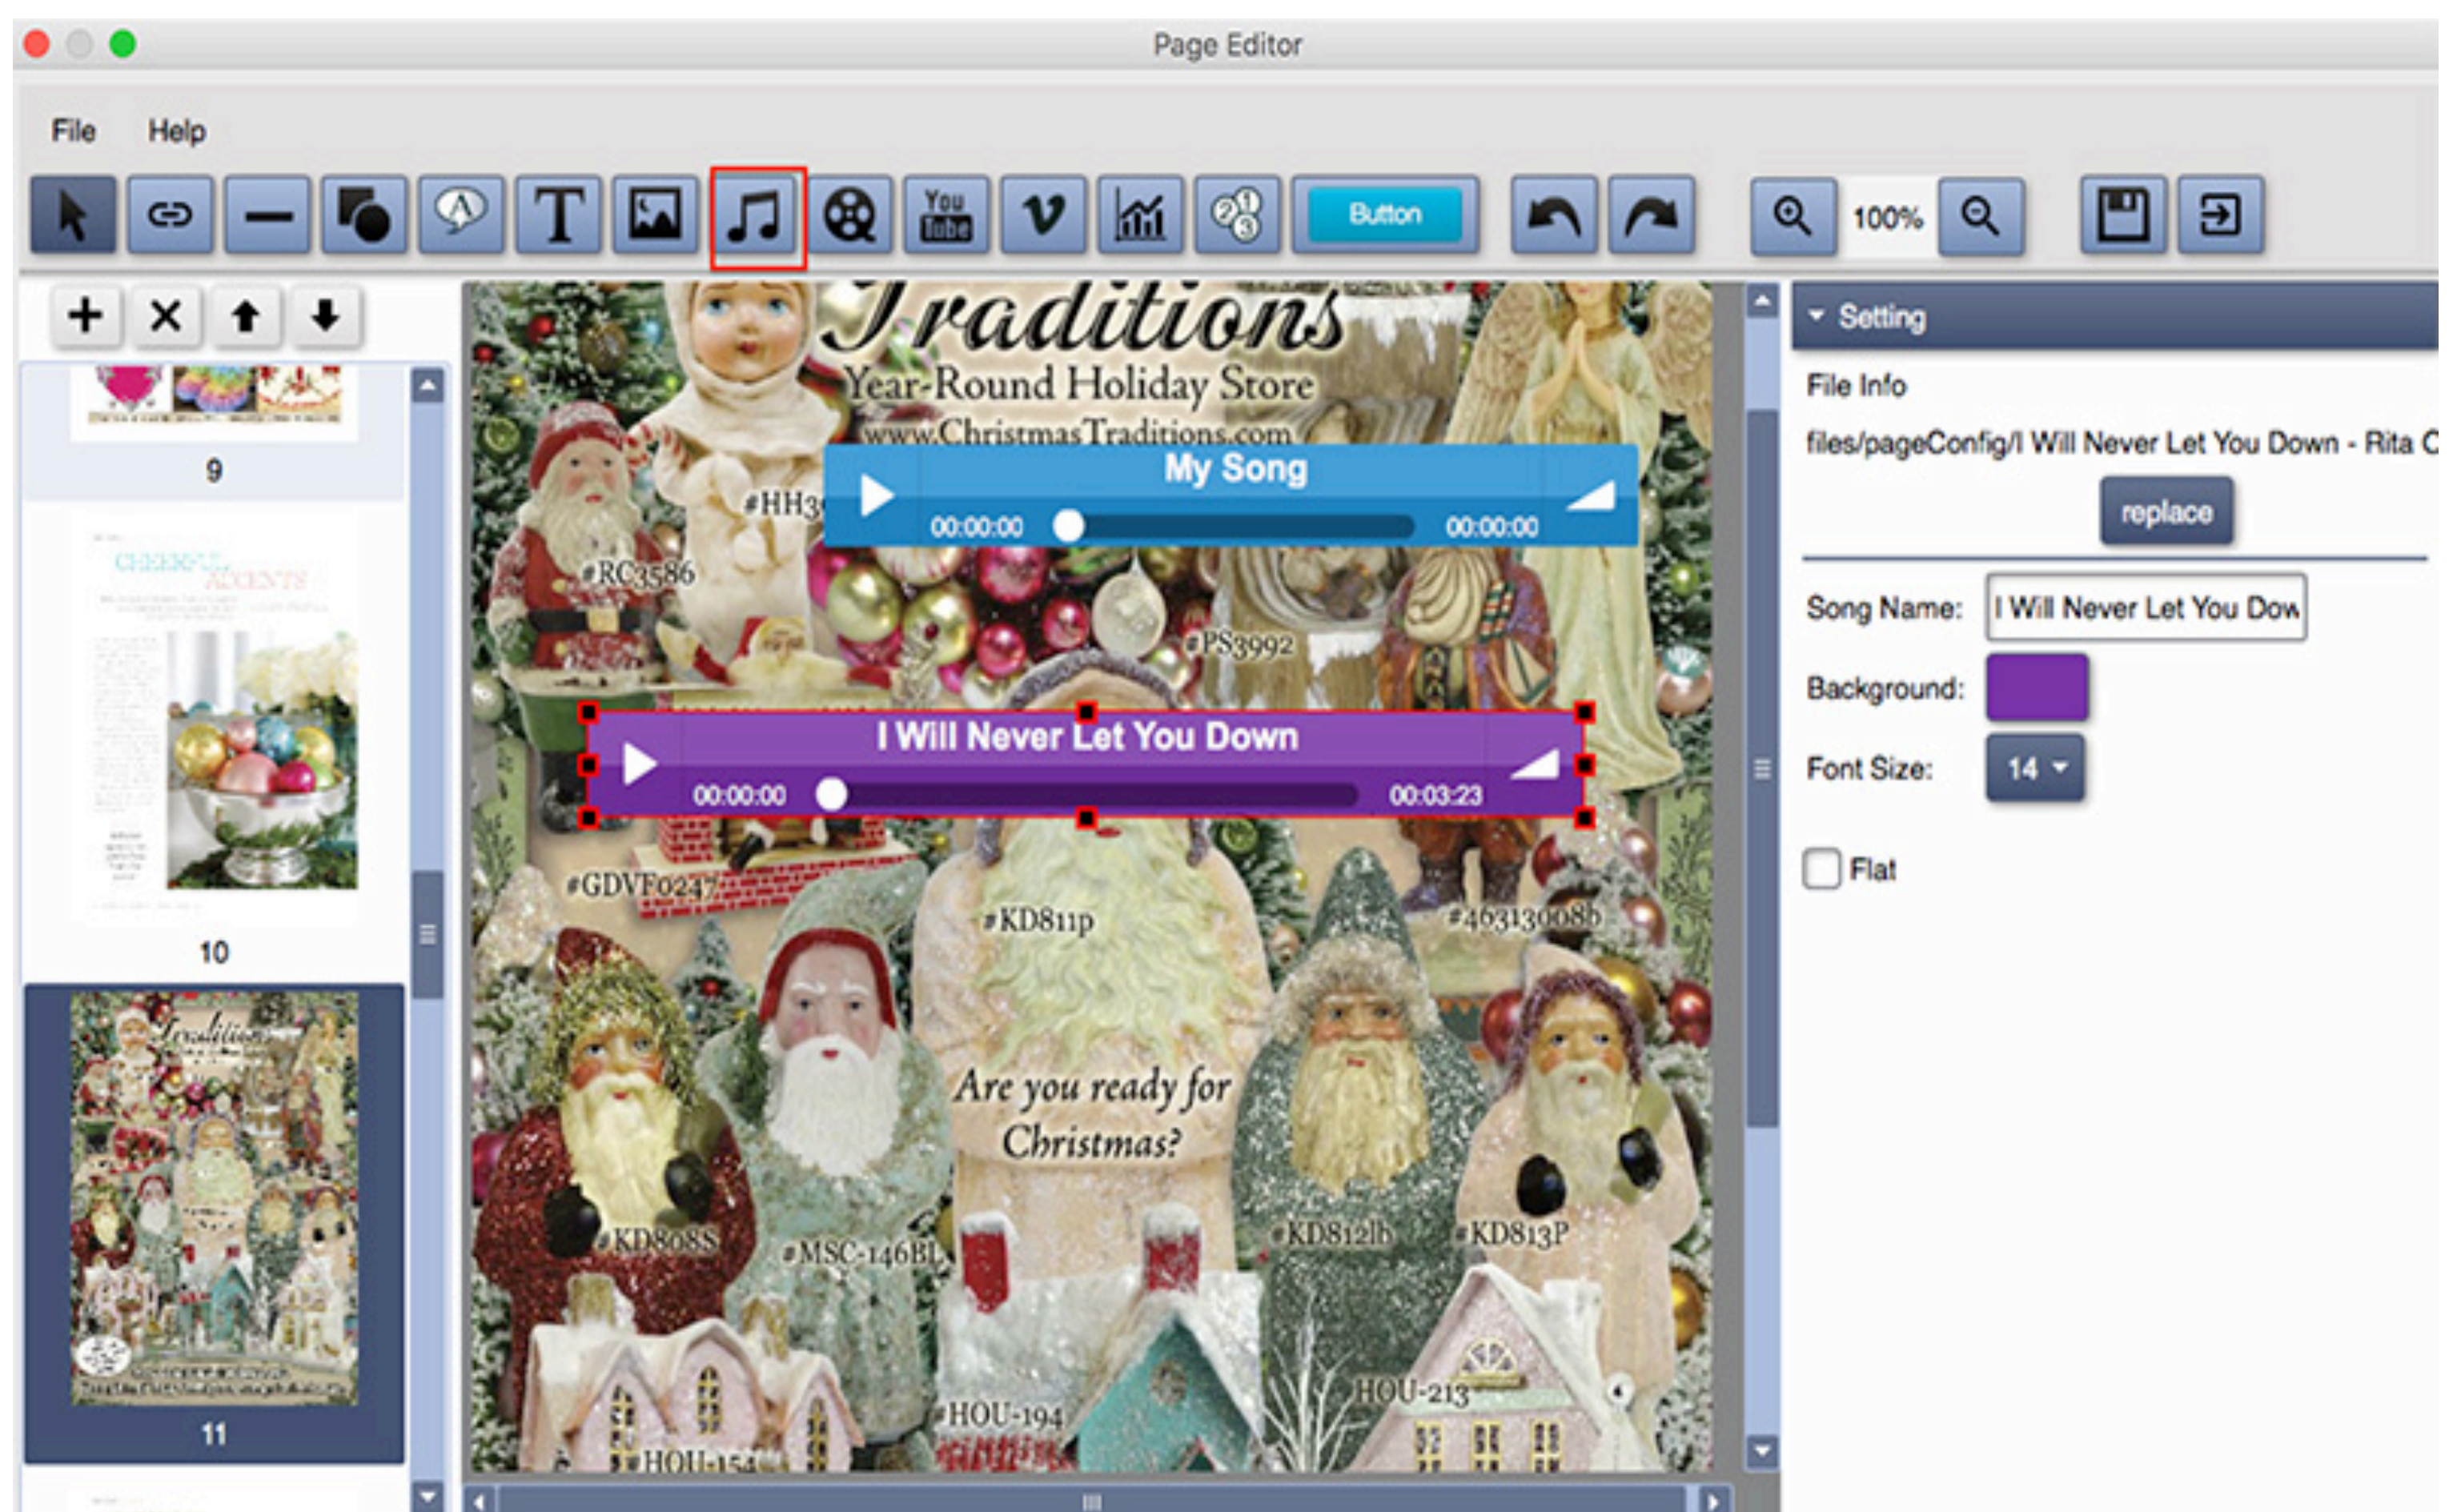

- **Add Video**

Click the Add Video button and draw a rectangle on the page to bring the video player, click replace button on the right and choose a local video. Set Control Panel color and Poster image on the right side.
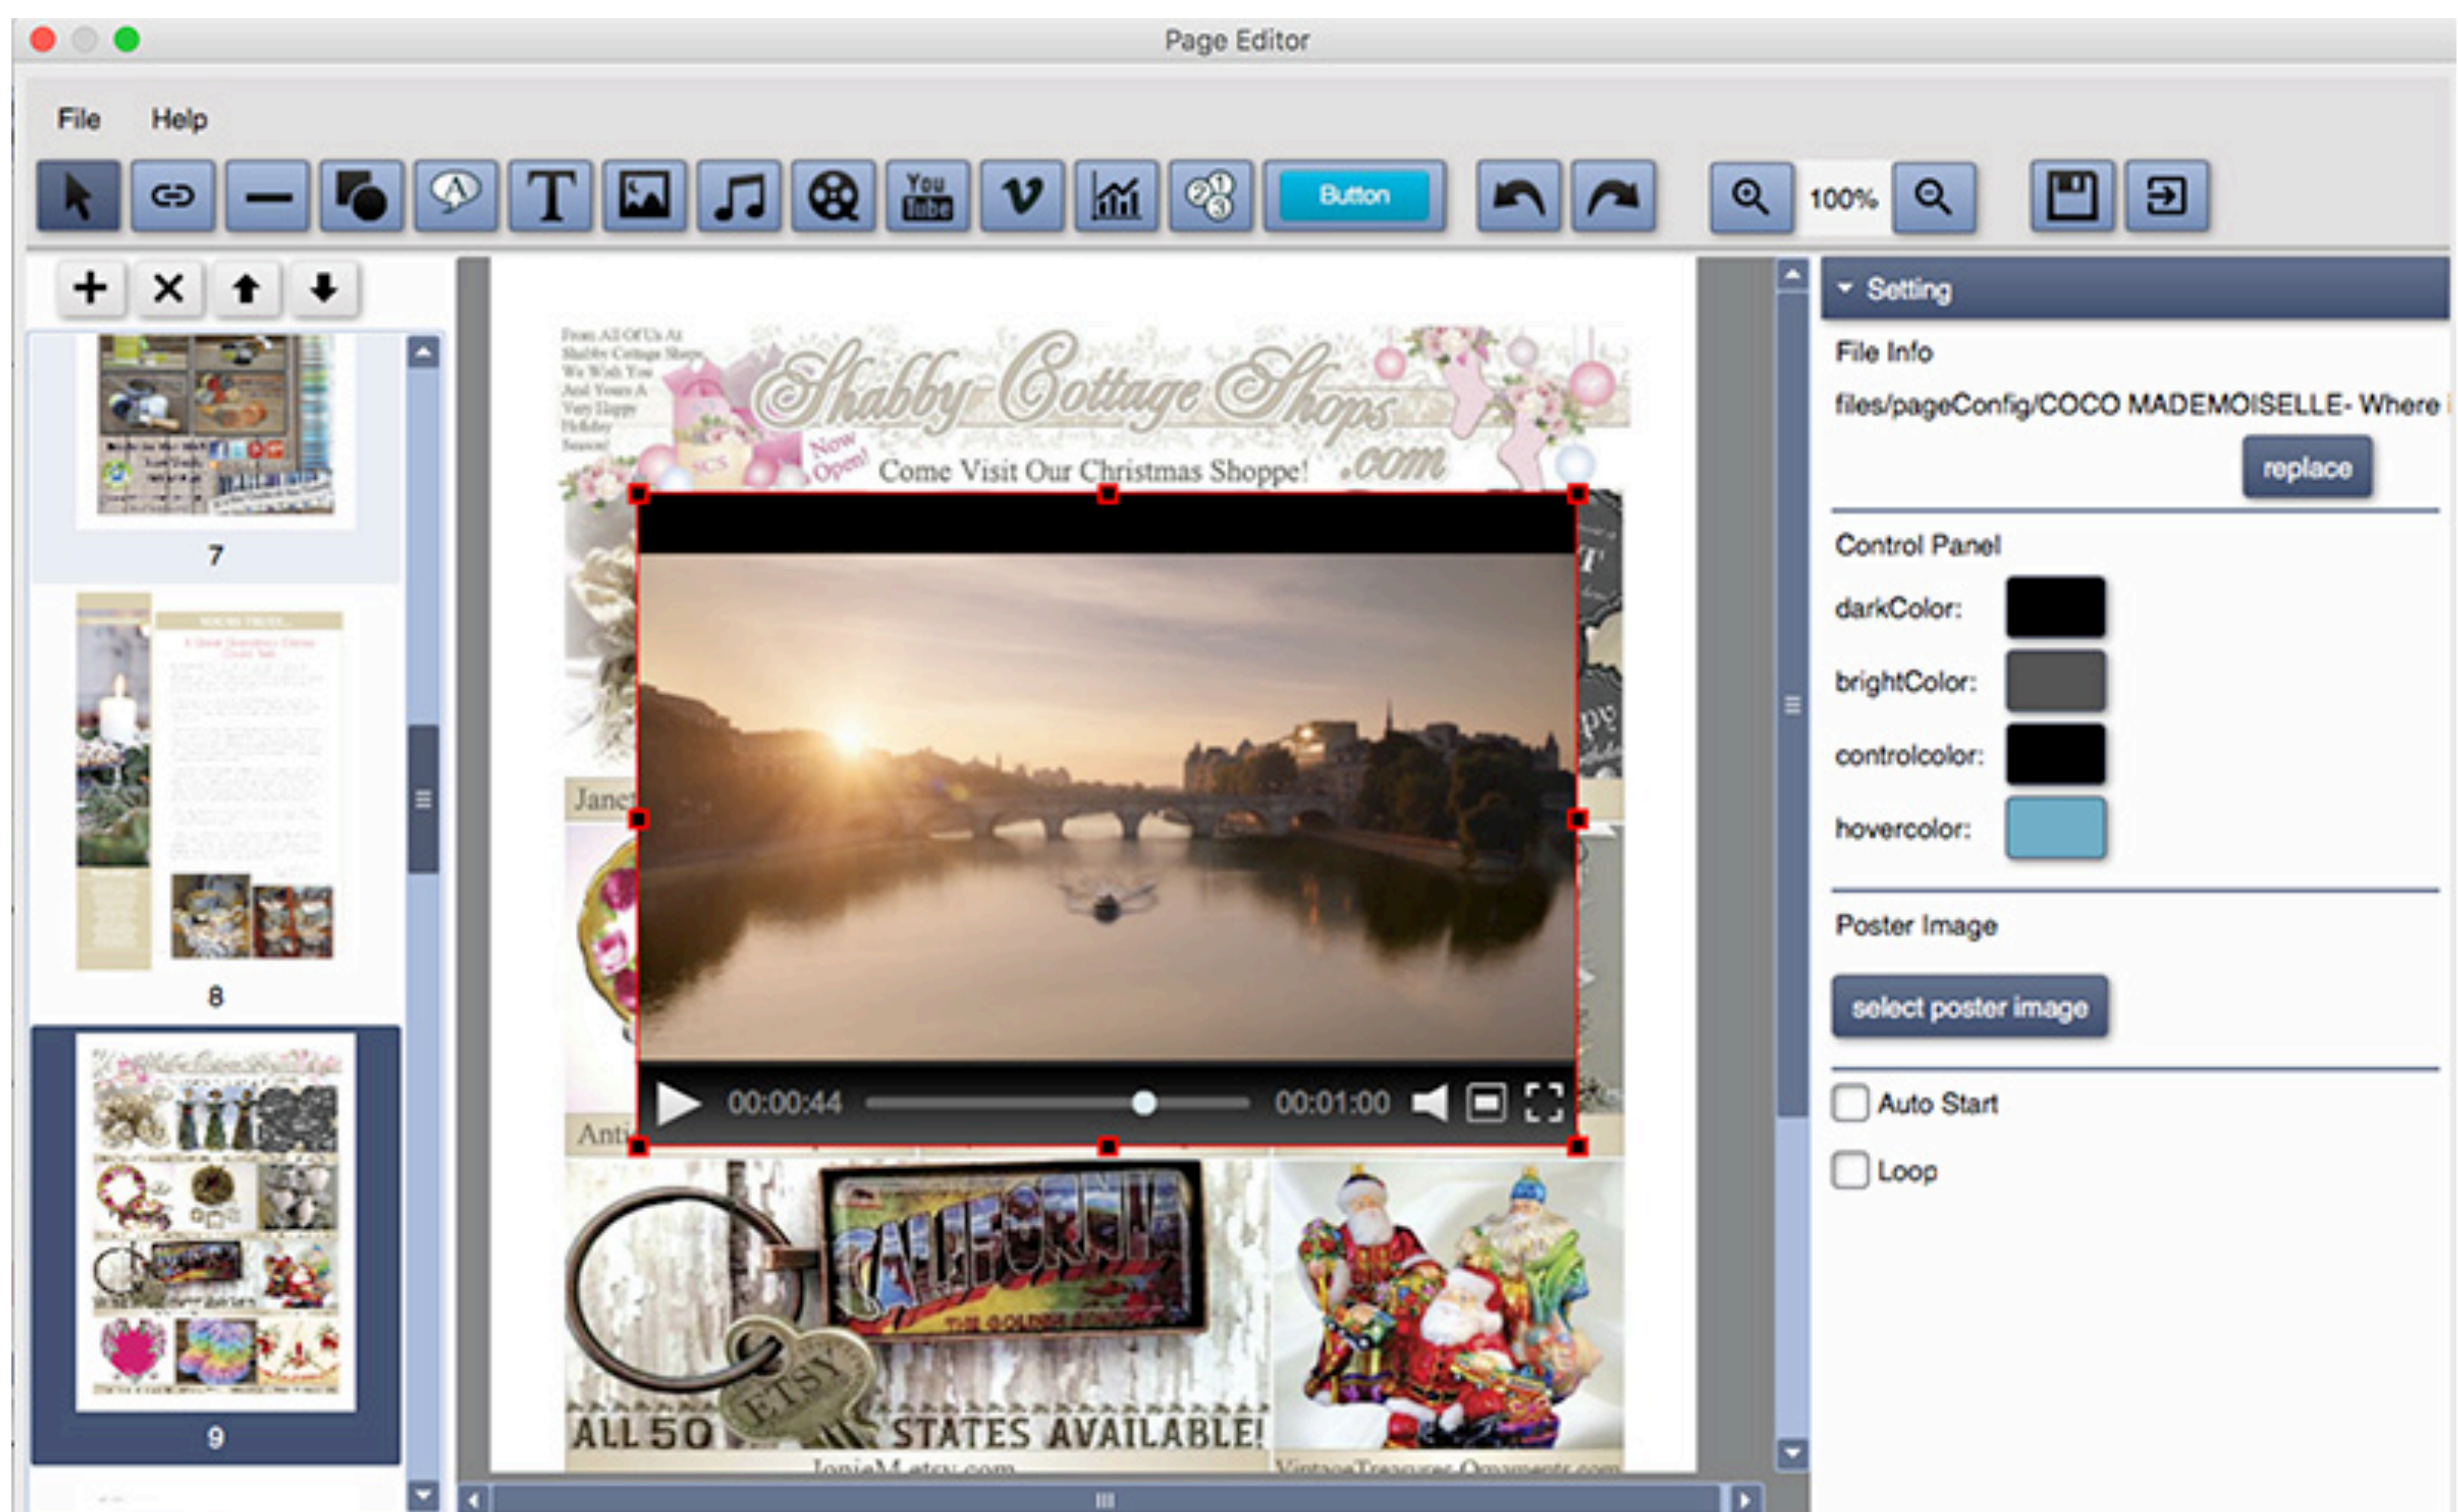

- **Add YouTube Video**

Click Add YouTube Video button and draw a rectangle on the page to bring the video player, open the video you want to embed to flipbook in browser and copy the code after v= of the URL to the right side of the below window. For example, if the URL of the YouTube video is https://www.youtube.com/watch?v=2Rp6qzO0TmI, copy and paste 2Rp6qzO0TmI to the Youtube Video ID area.
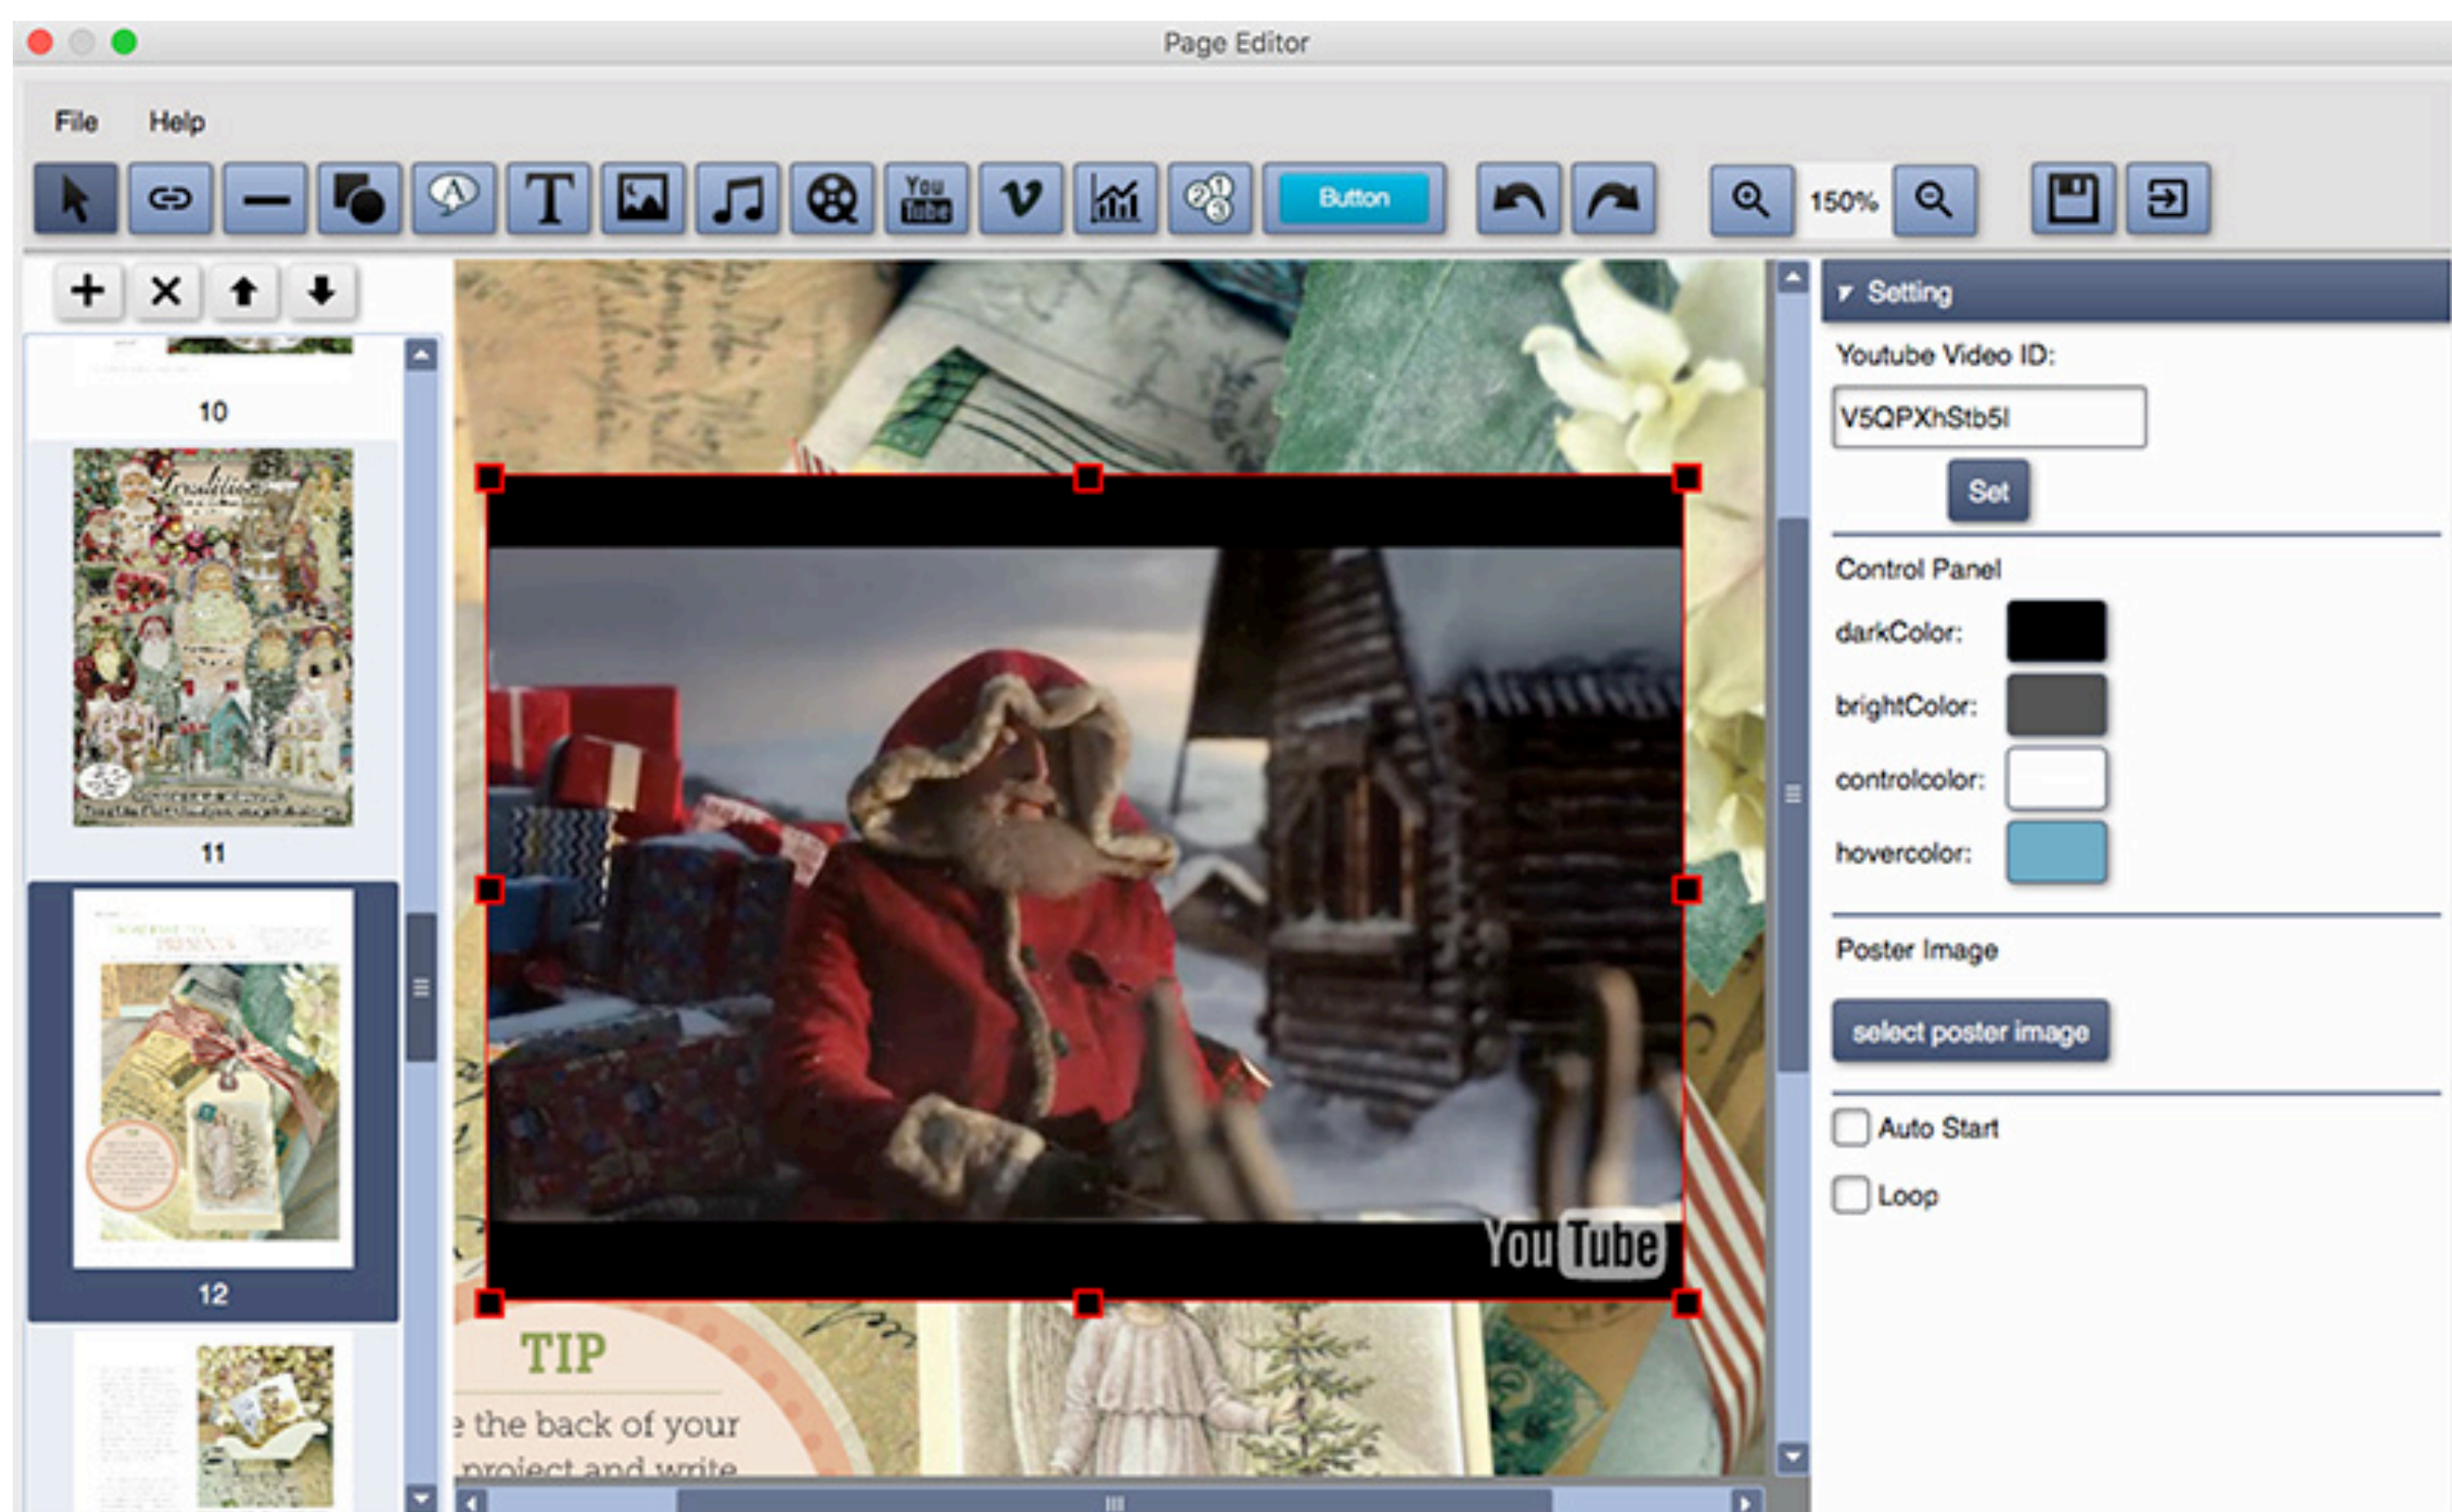

Click [⇥] and save the project. After convert to local flipbook or upload online, you can then view the YouTube video within the flipboook.

- **Add chart**

Click Add chart button, choose one chart type and draw a rectangle on the page.
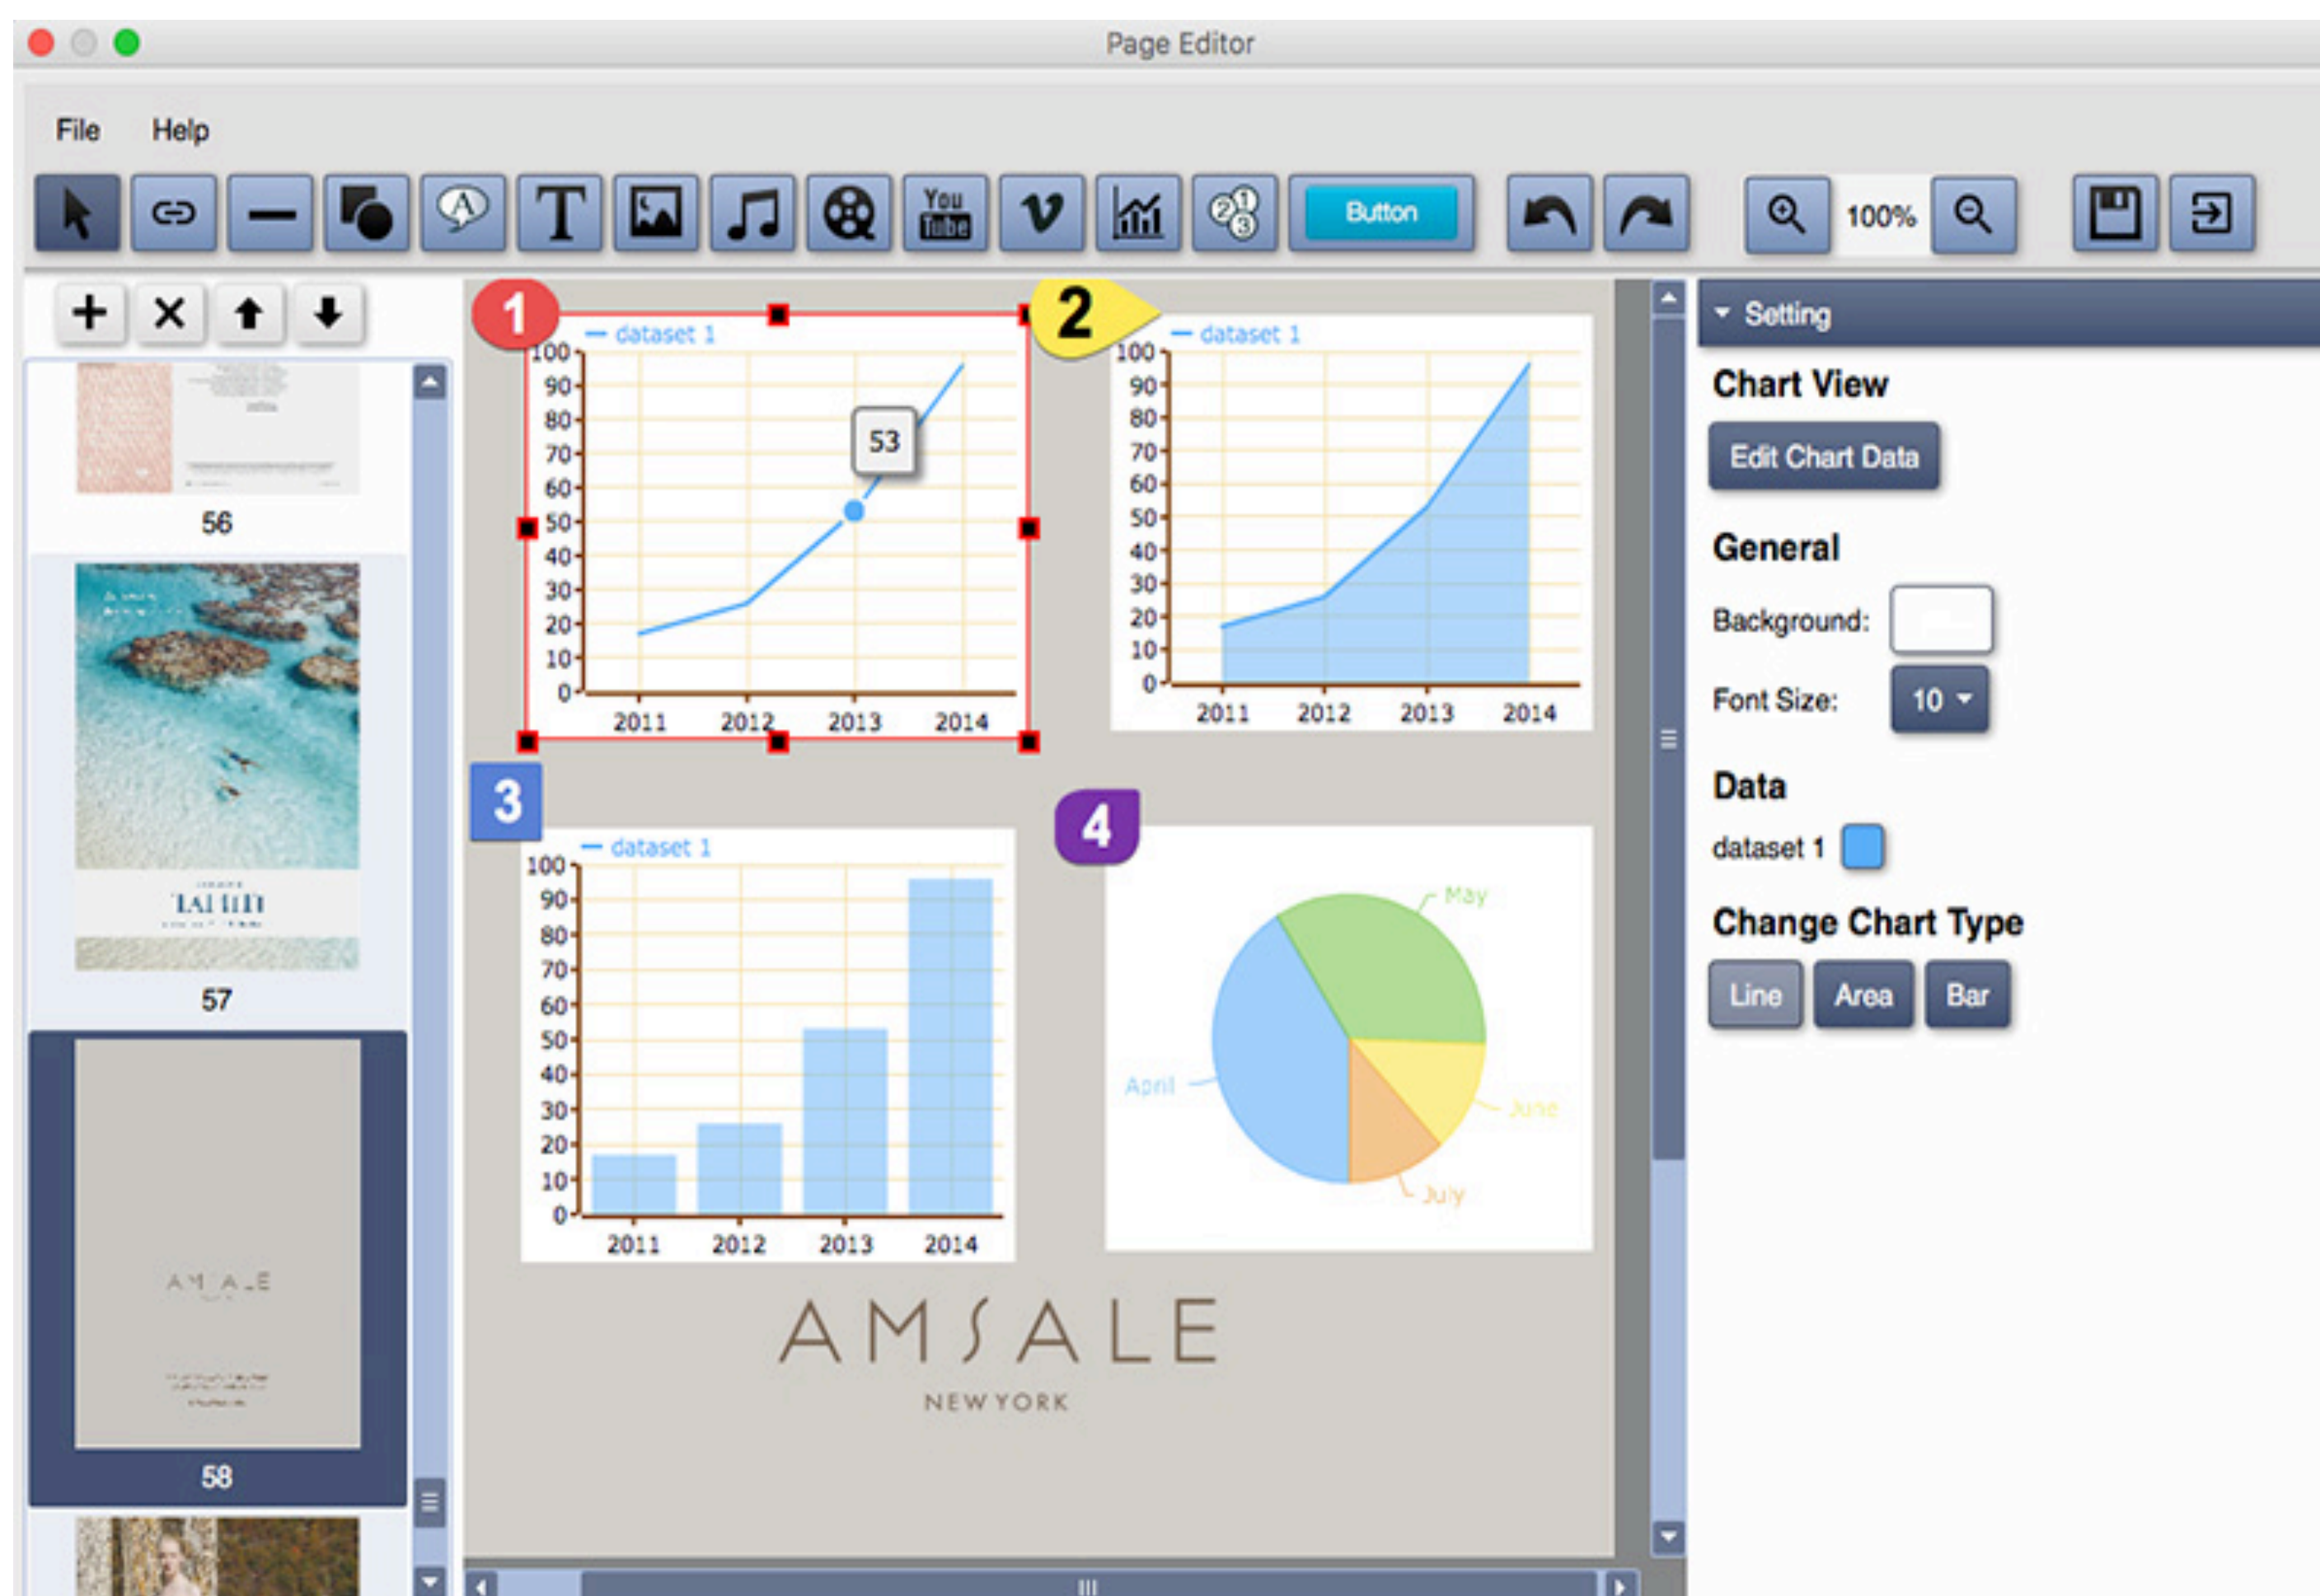

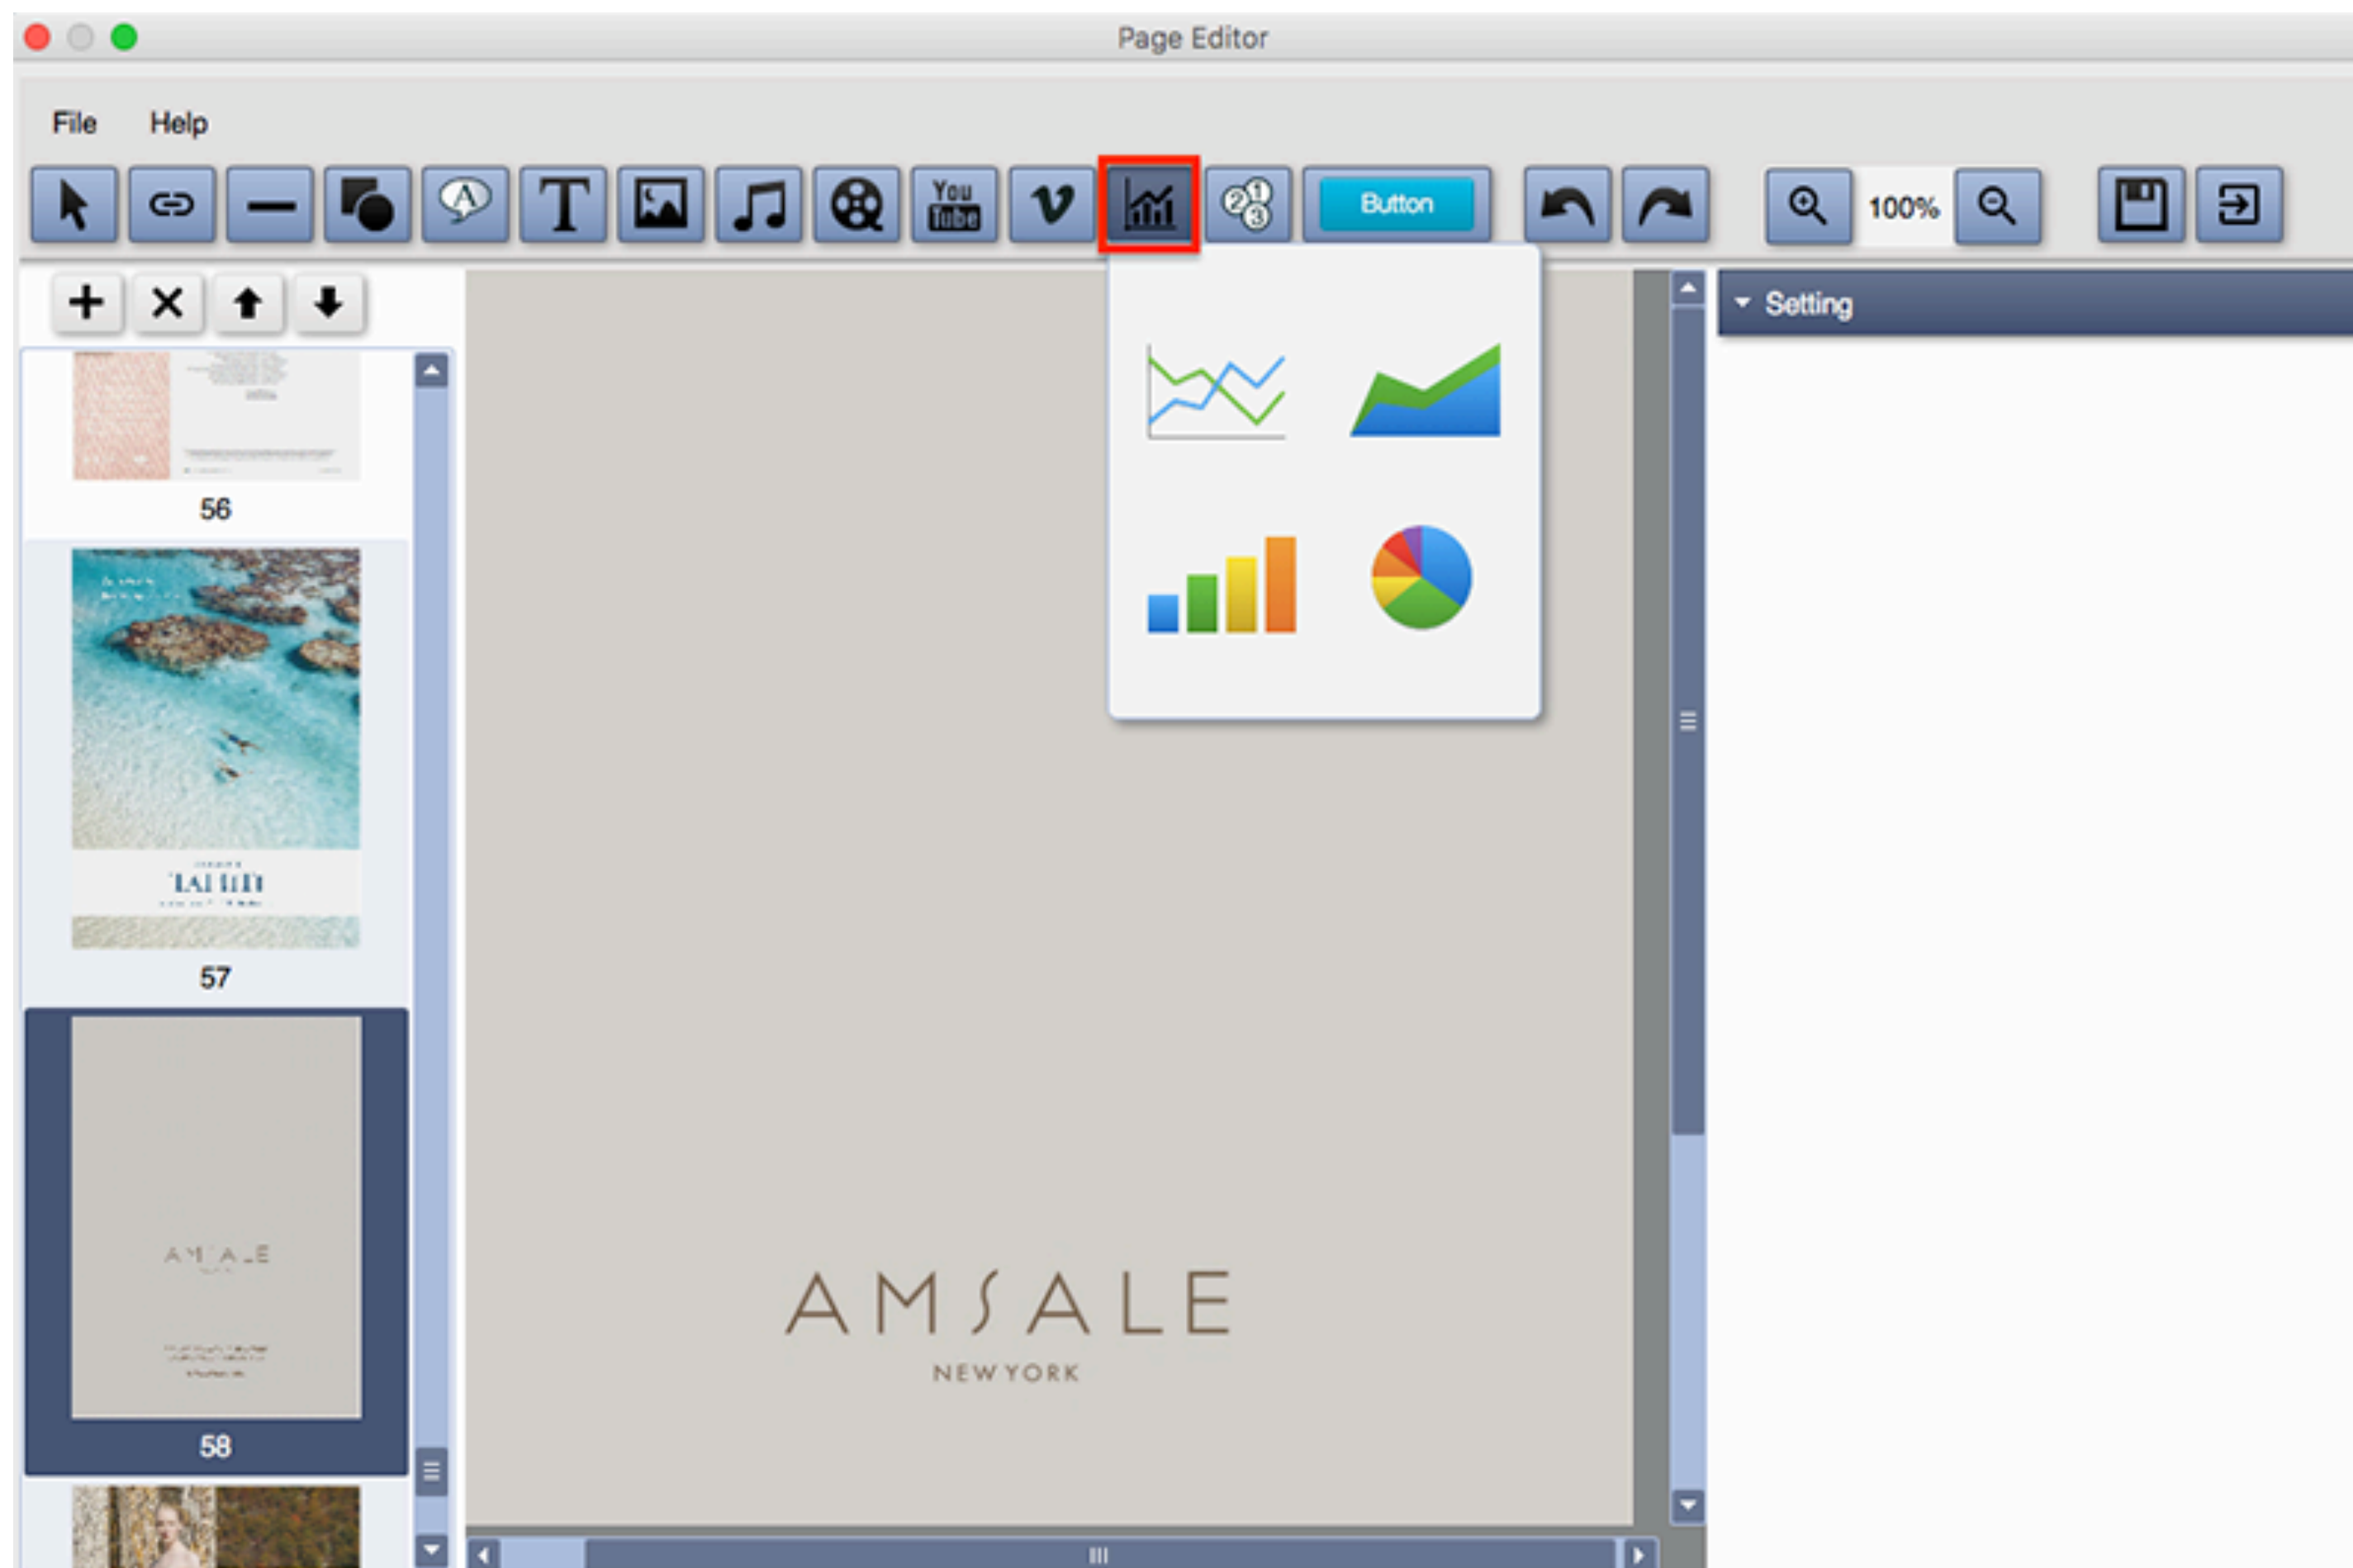

Edit chart data:
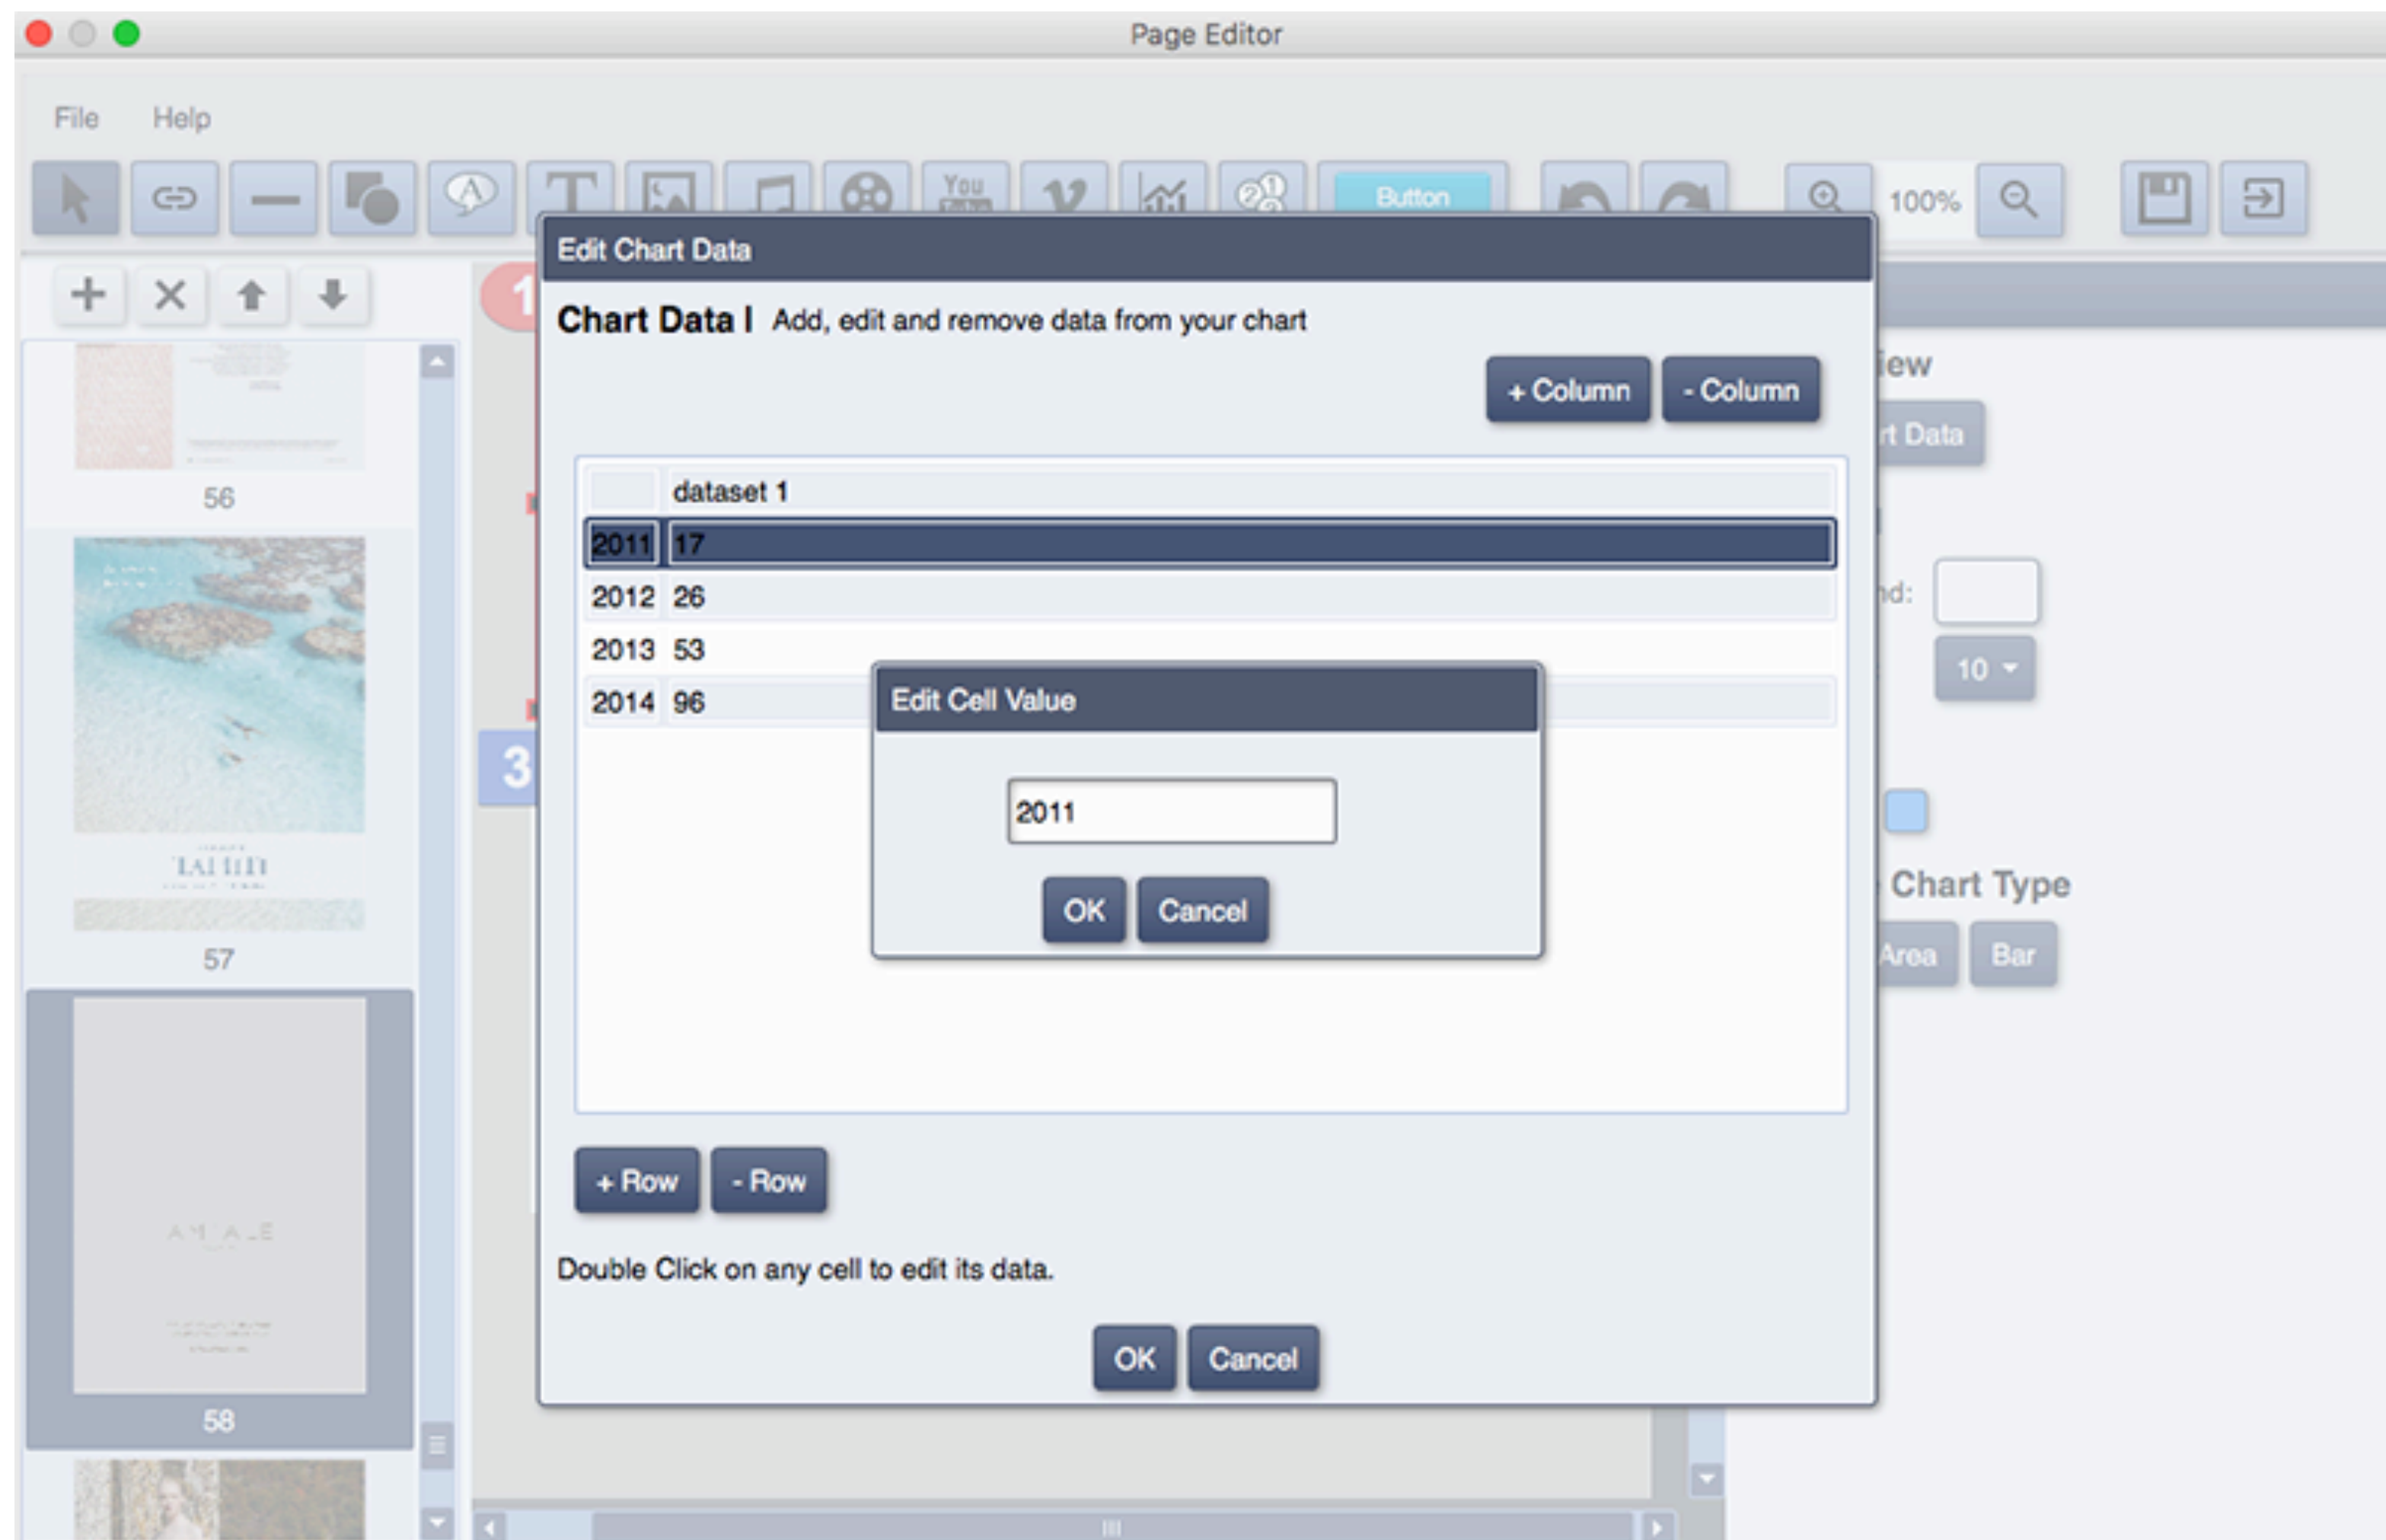

• Add Number icon

Click Add Number icon button, choose one style and click on the page.
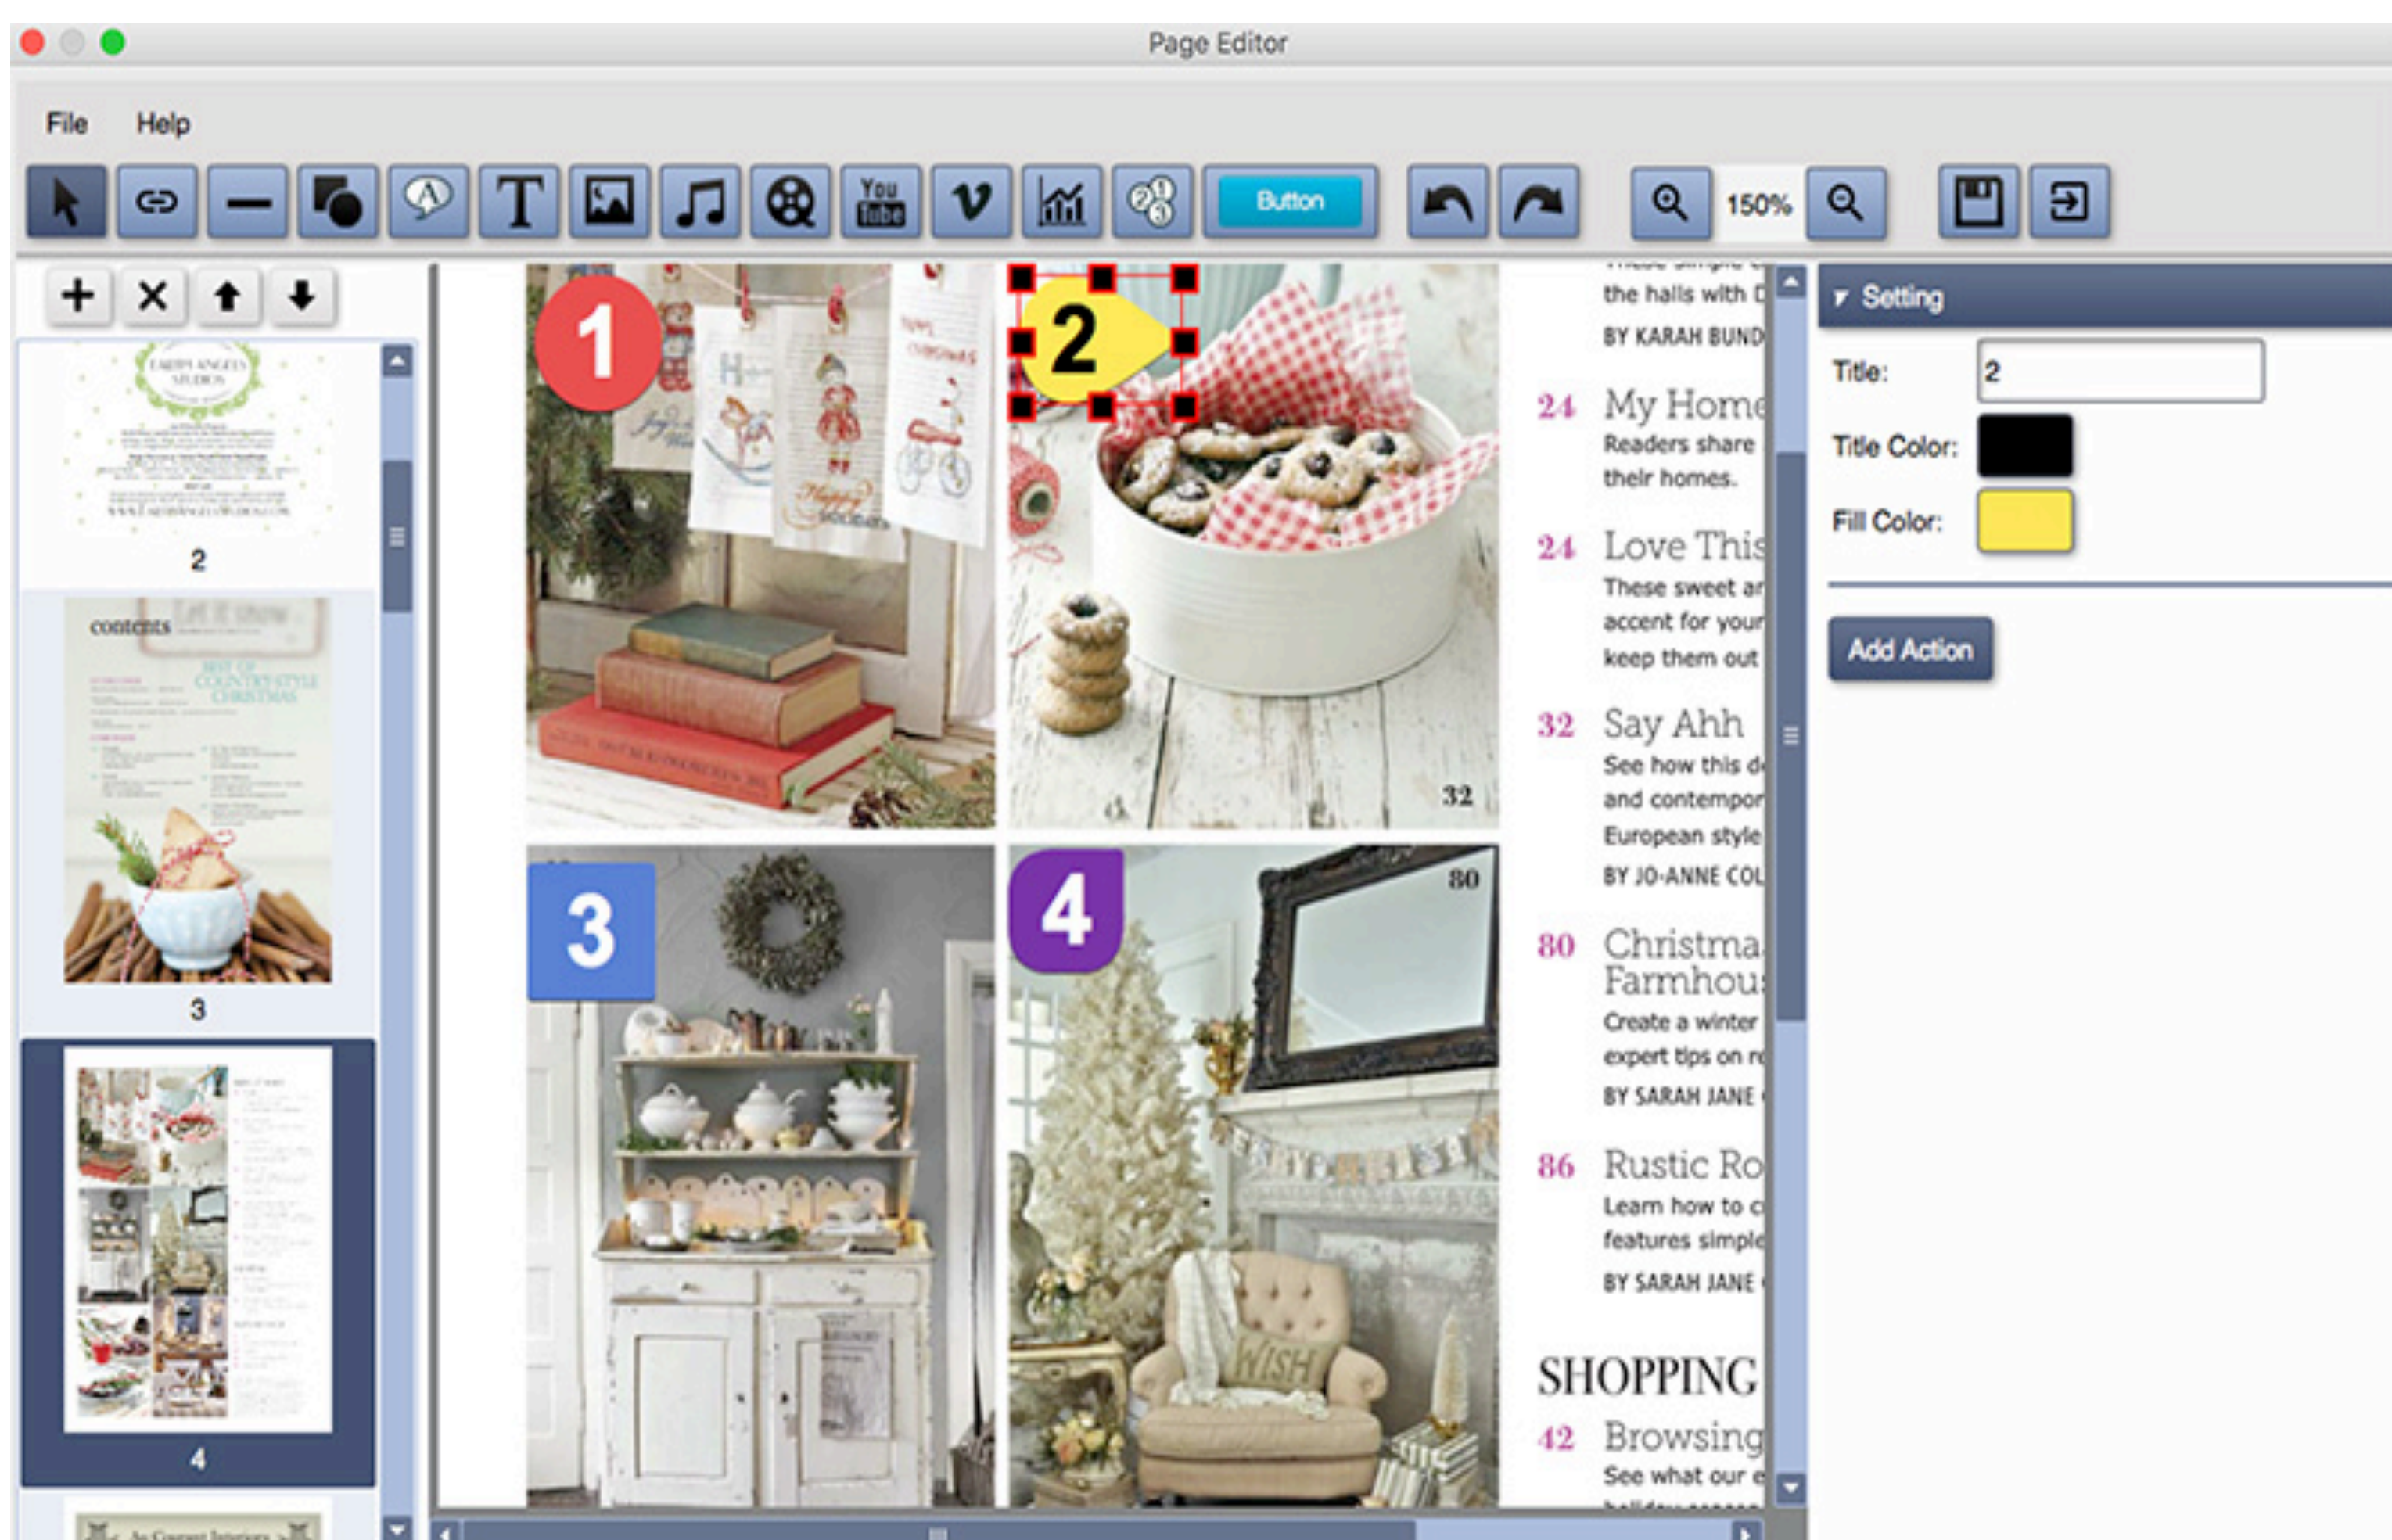

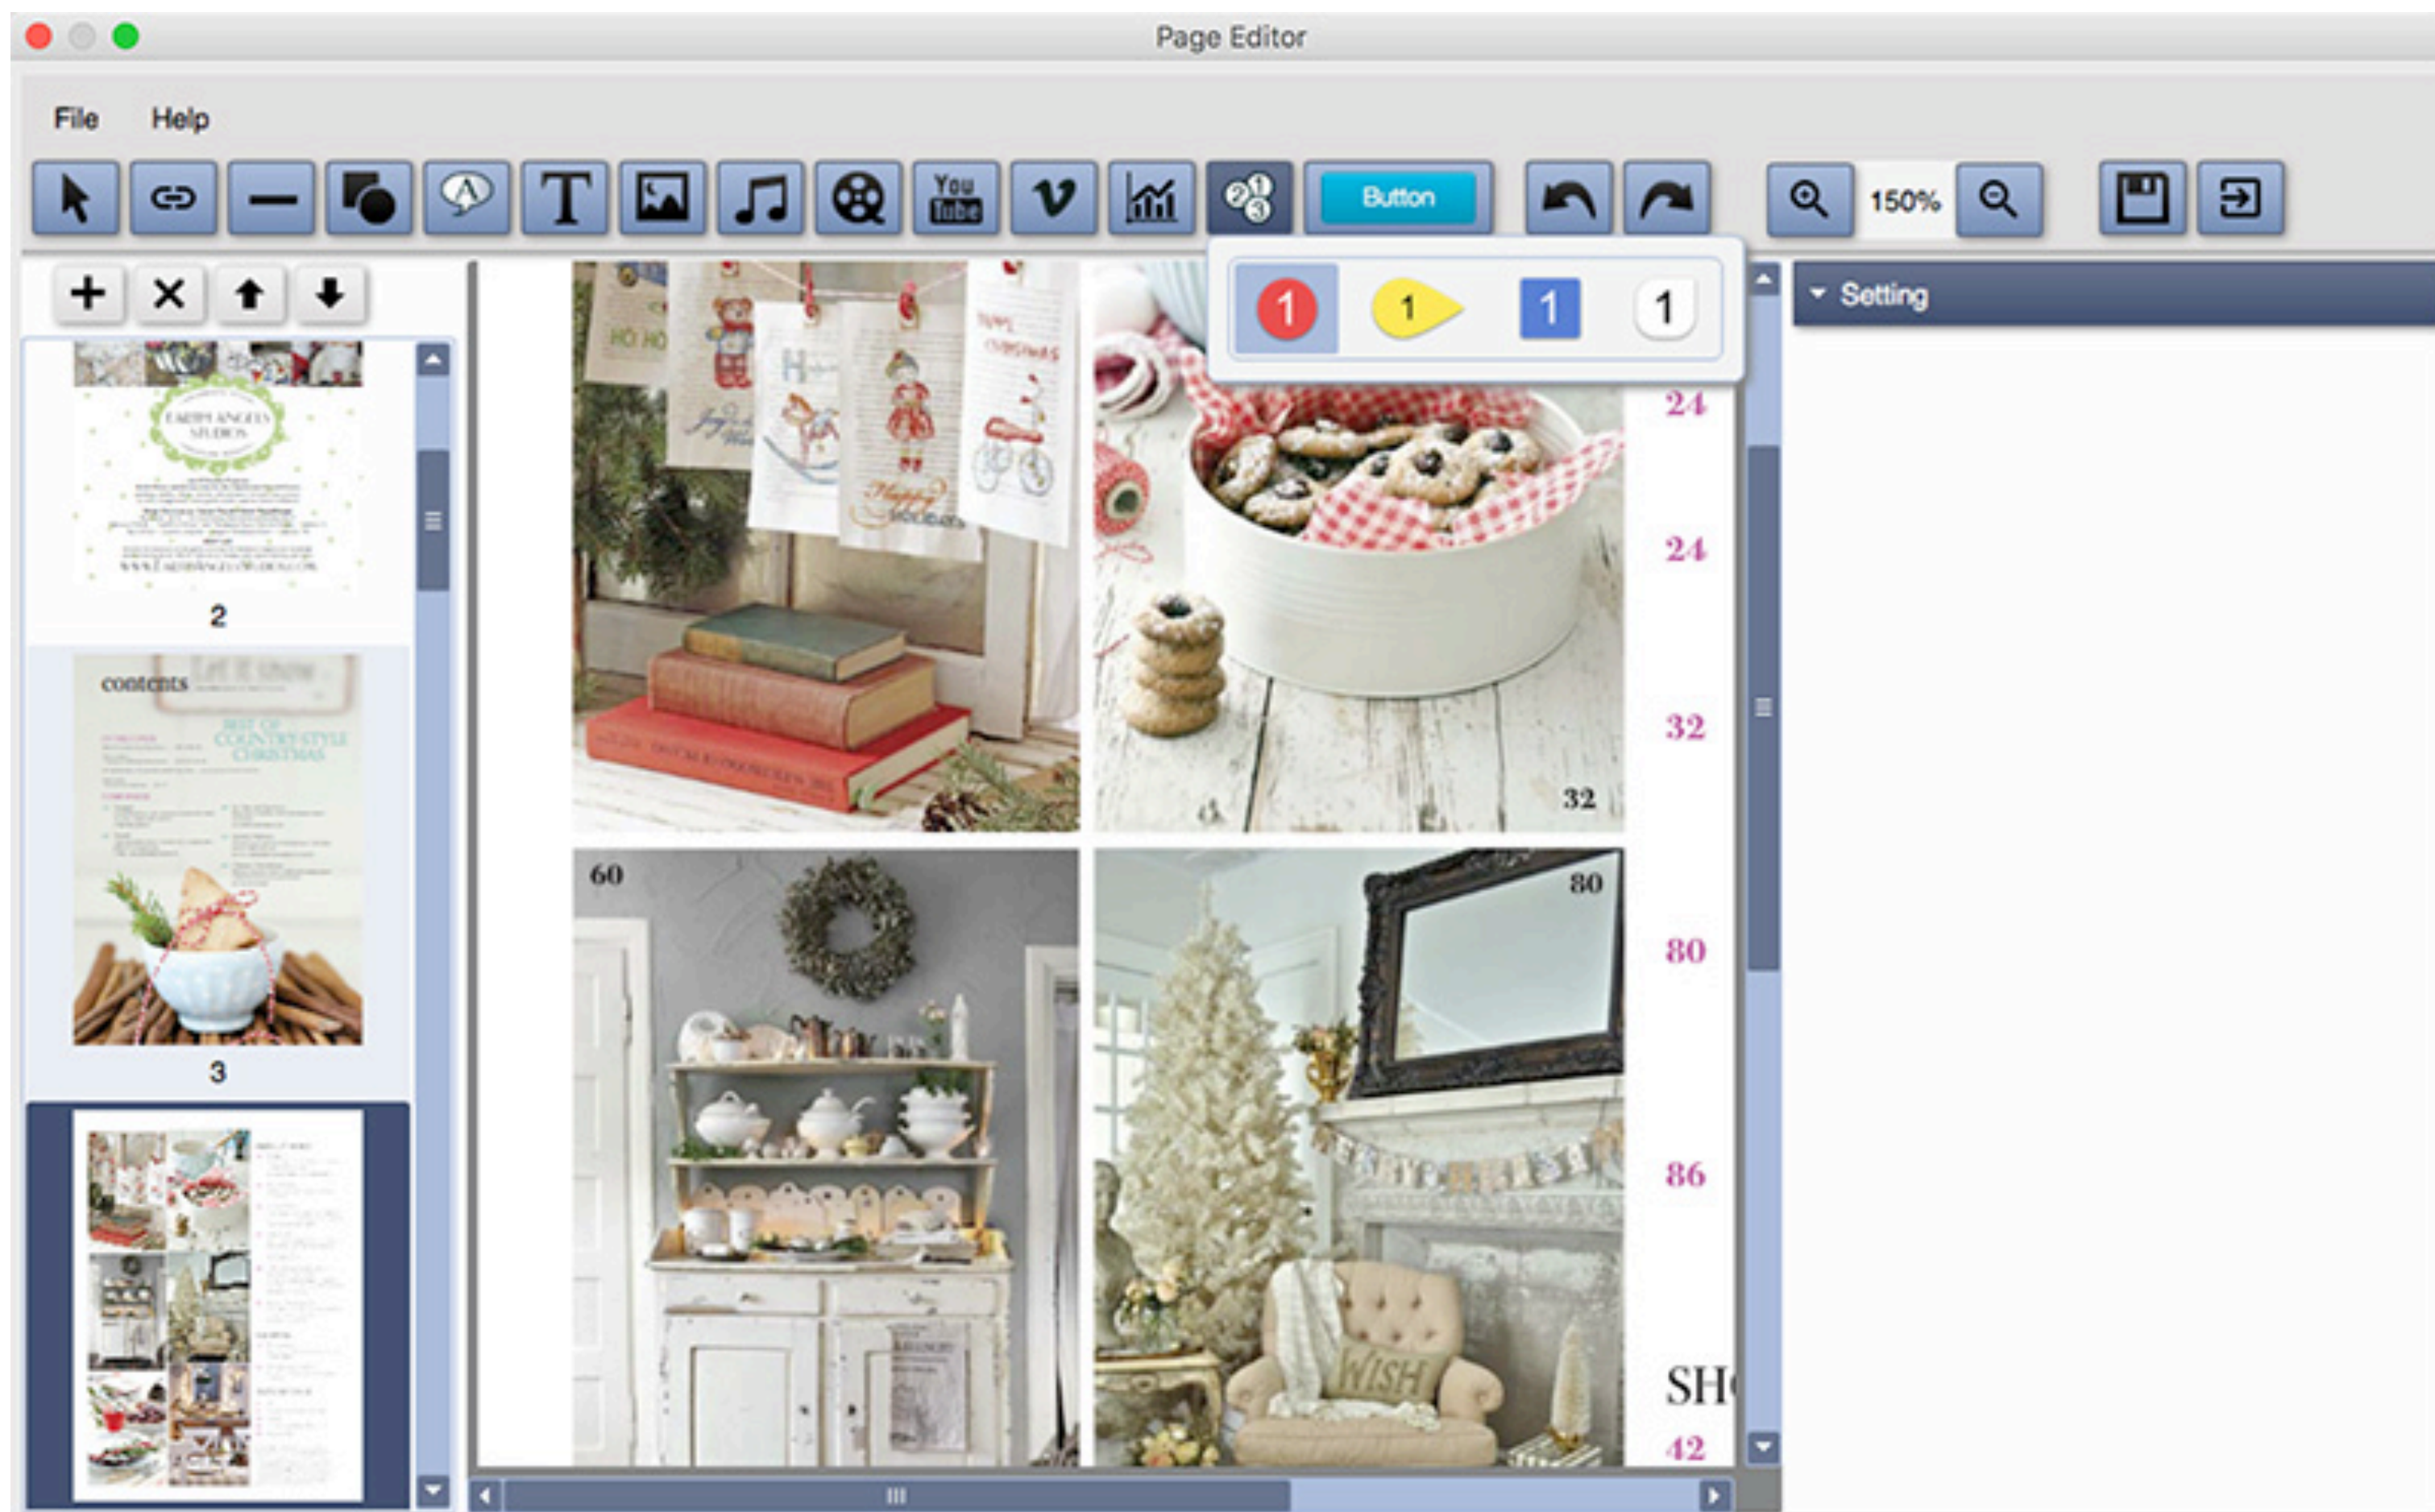

• Add Button

Click Add Button button, choose one style and click on the page to add buttons.
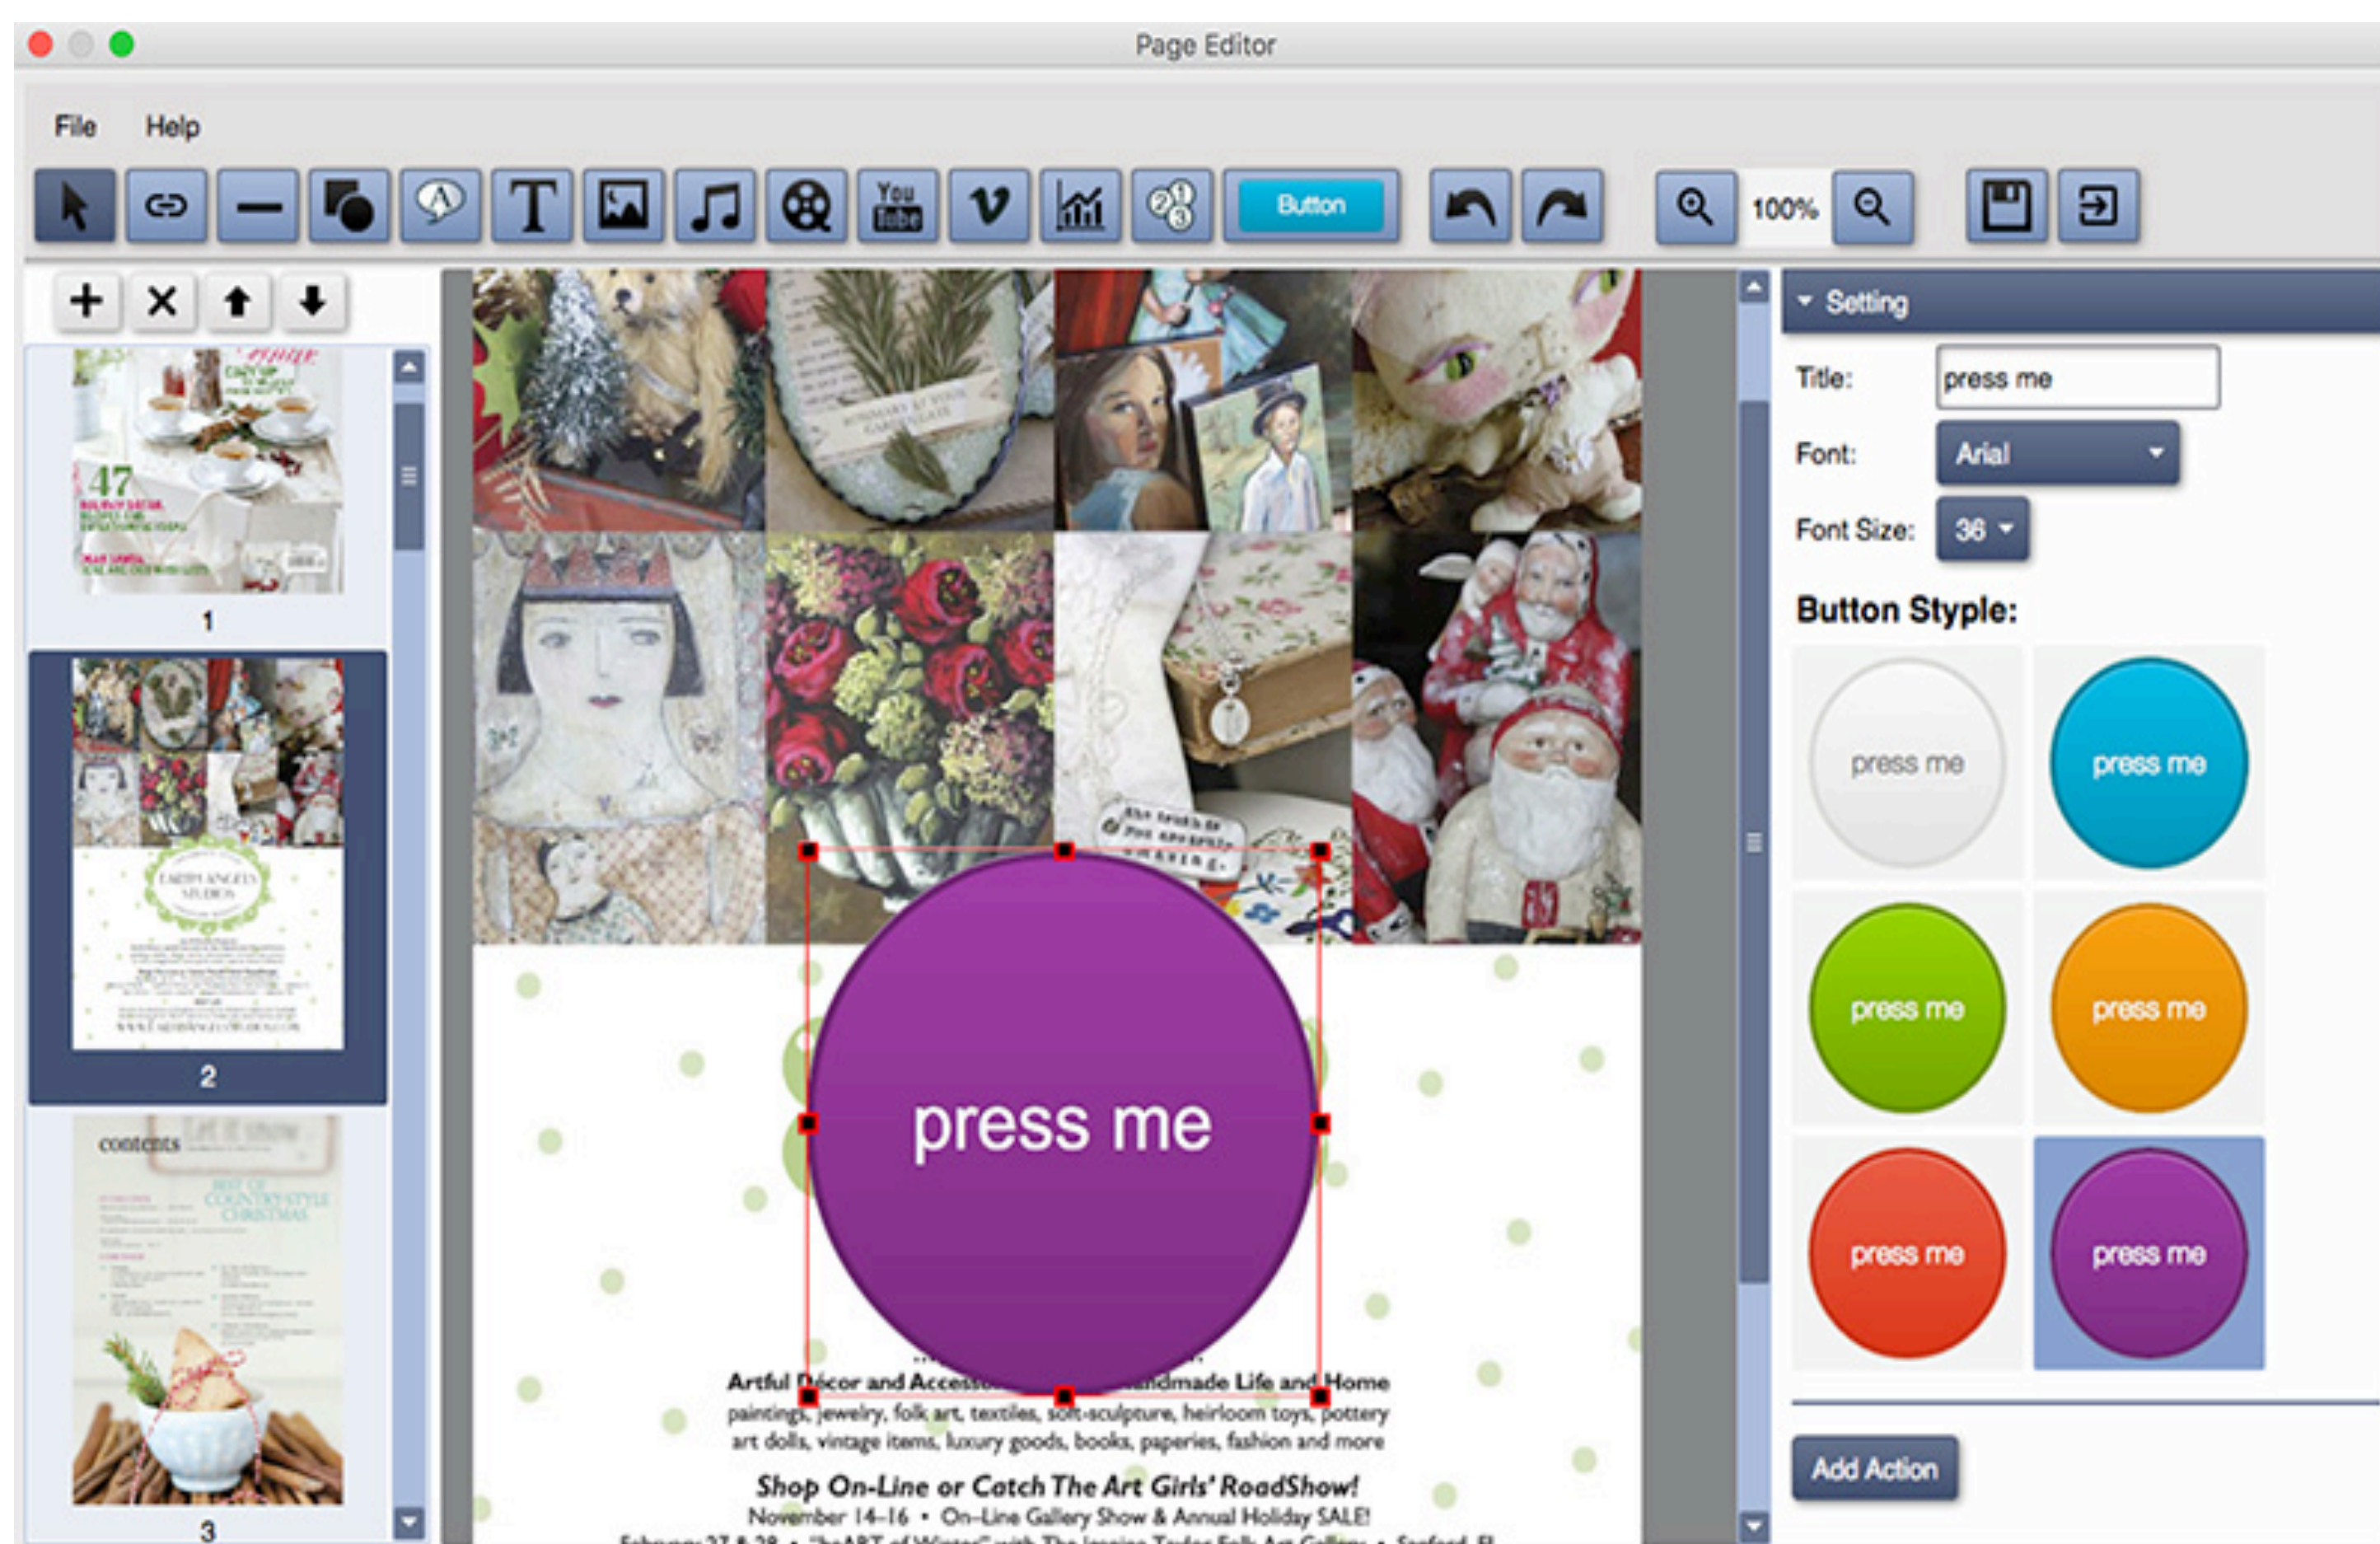

- **Undo&Redo**

Click ![undo icon] to Undo and click ![redo icon] to Redo.

At last, click ![save icon] to save project and click ![exit icon]

to exit Page Editor.

3. Add, delete pages or adjust order

Click the Insert Pages button on the left to insert any image or PDF page to the existing flipping book.

You can choose to add the new page before or after the selected page, or to the top and bottom of the flipbook.
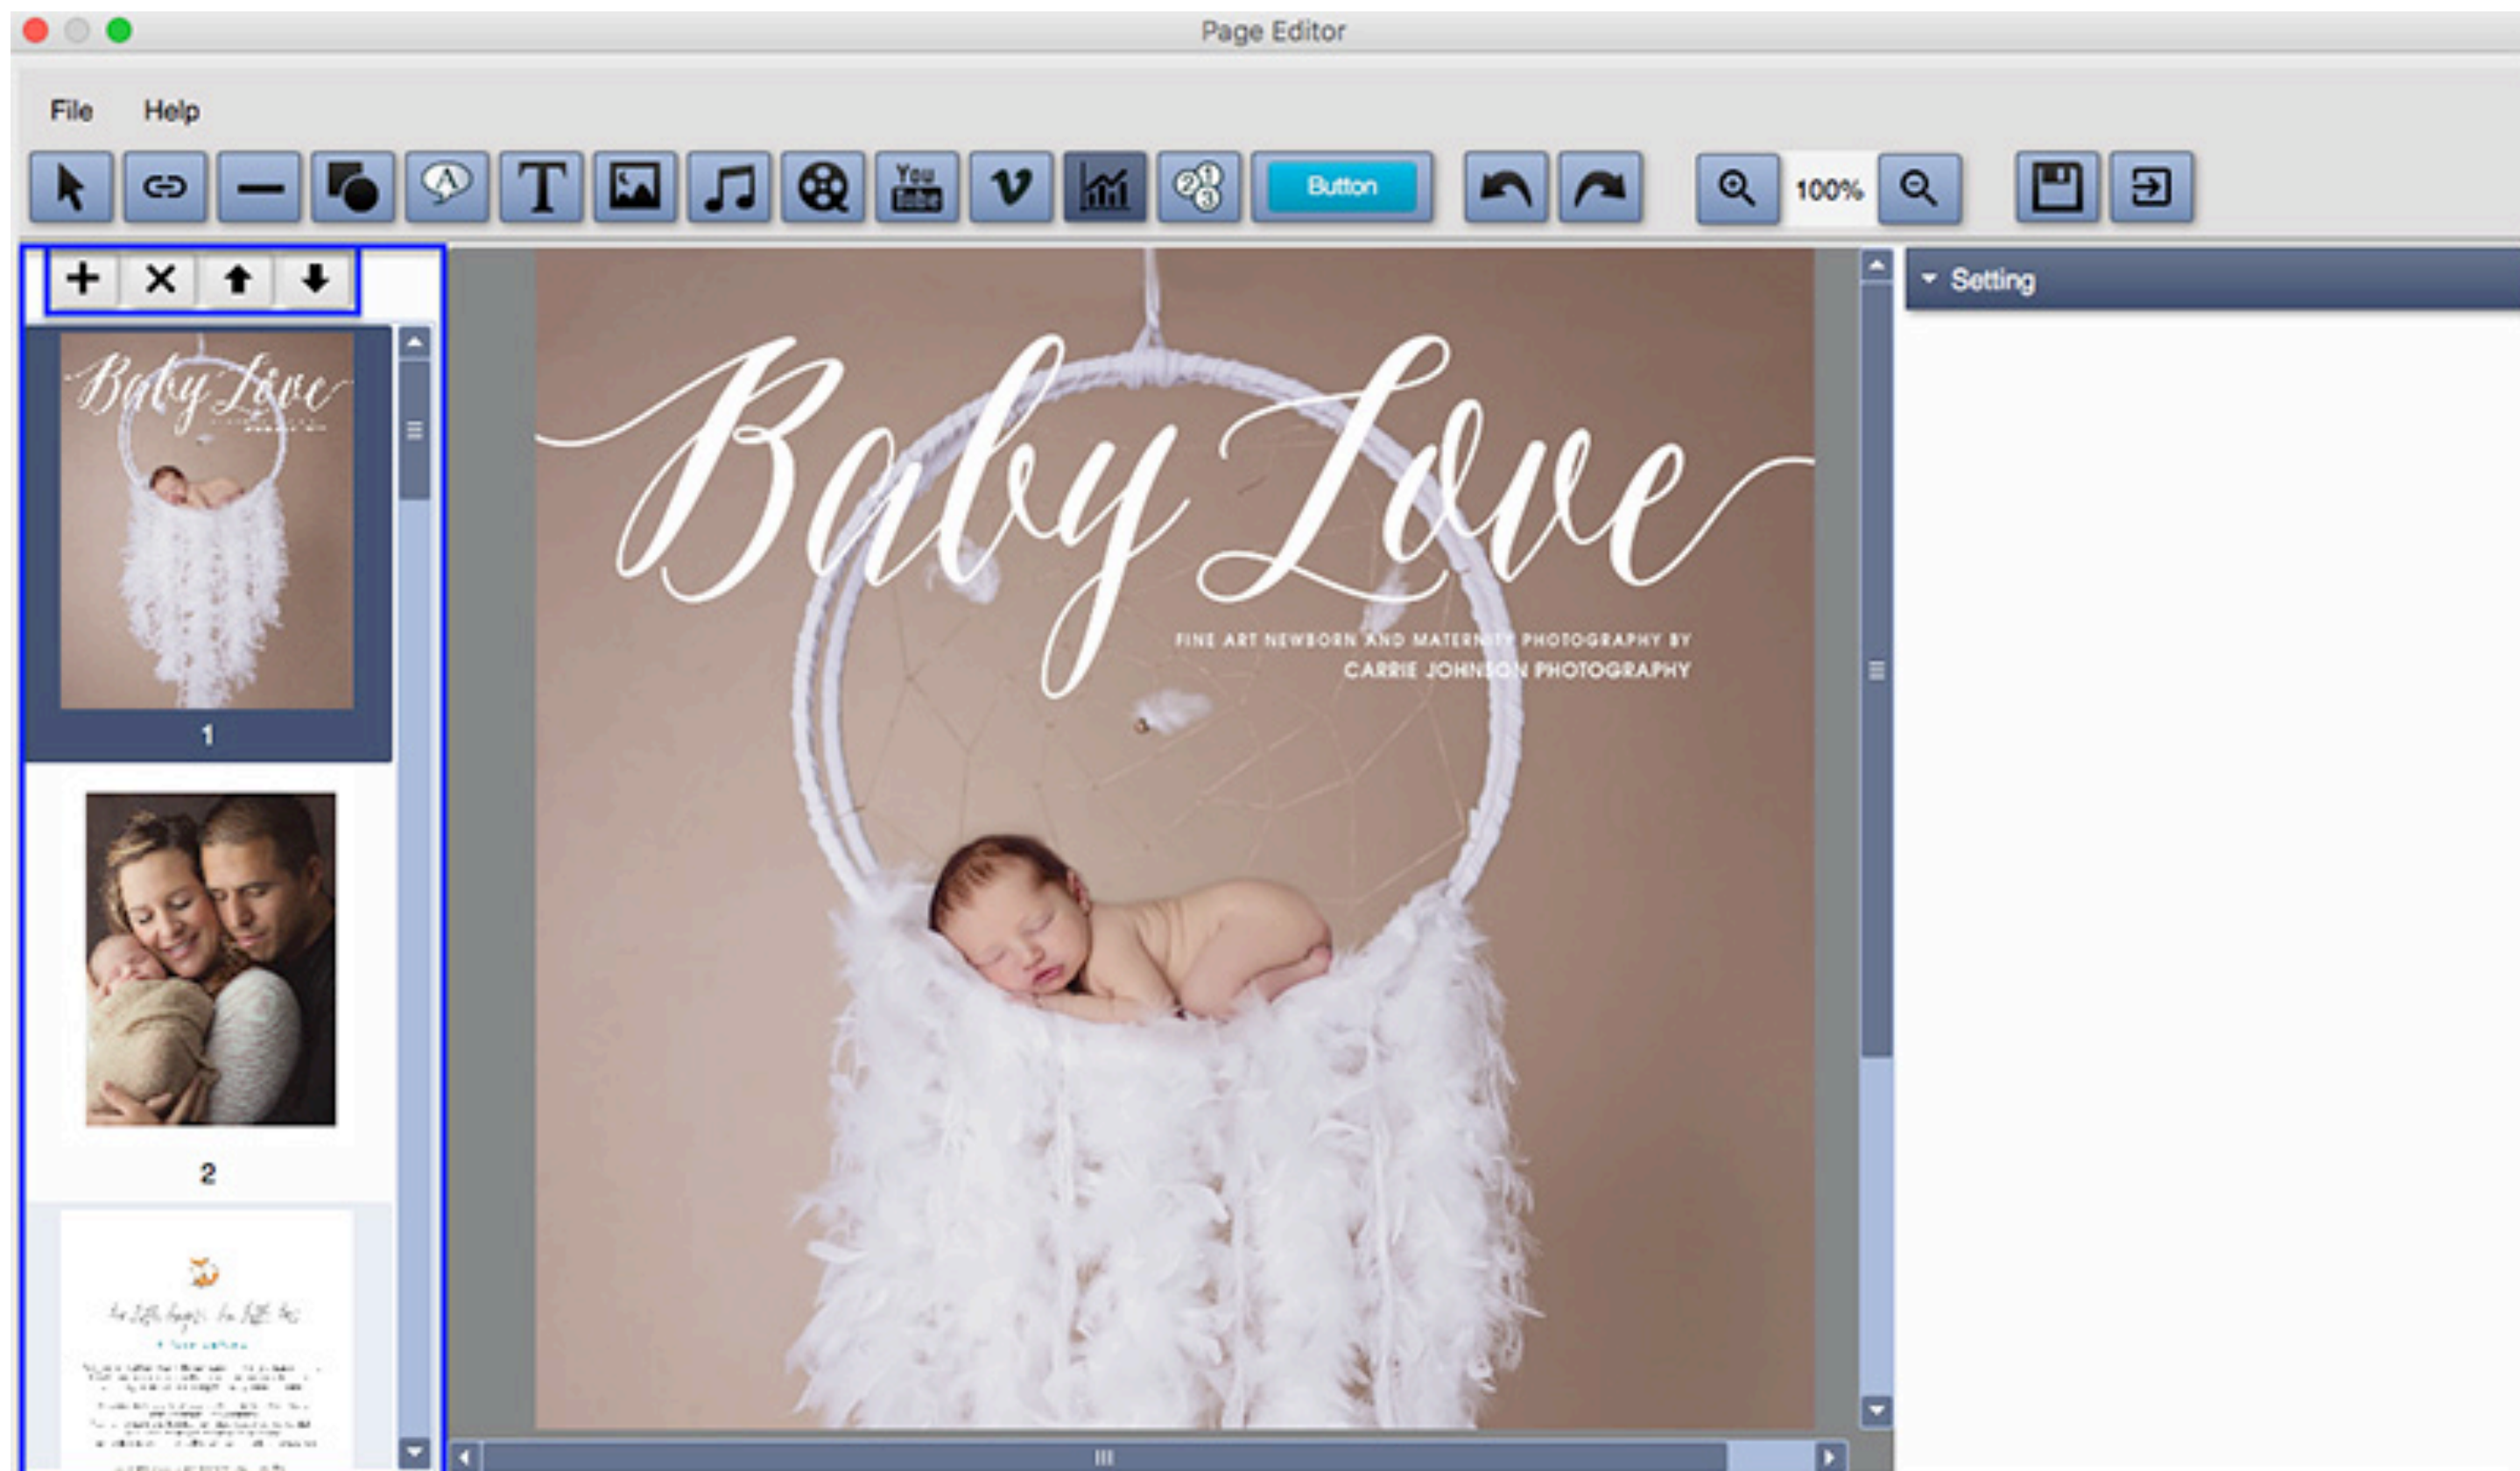

Click the Delete the selected button to delete any unwanted page, or click the Move up and Move down button to adjust page order.
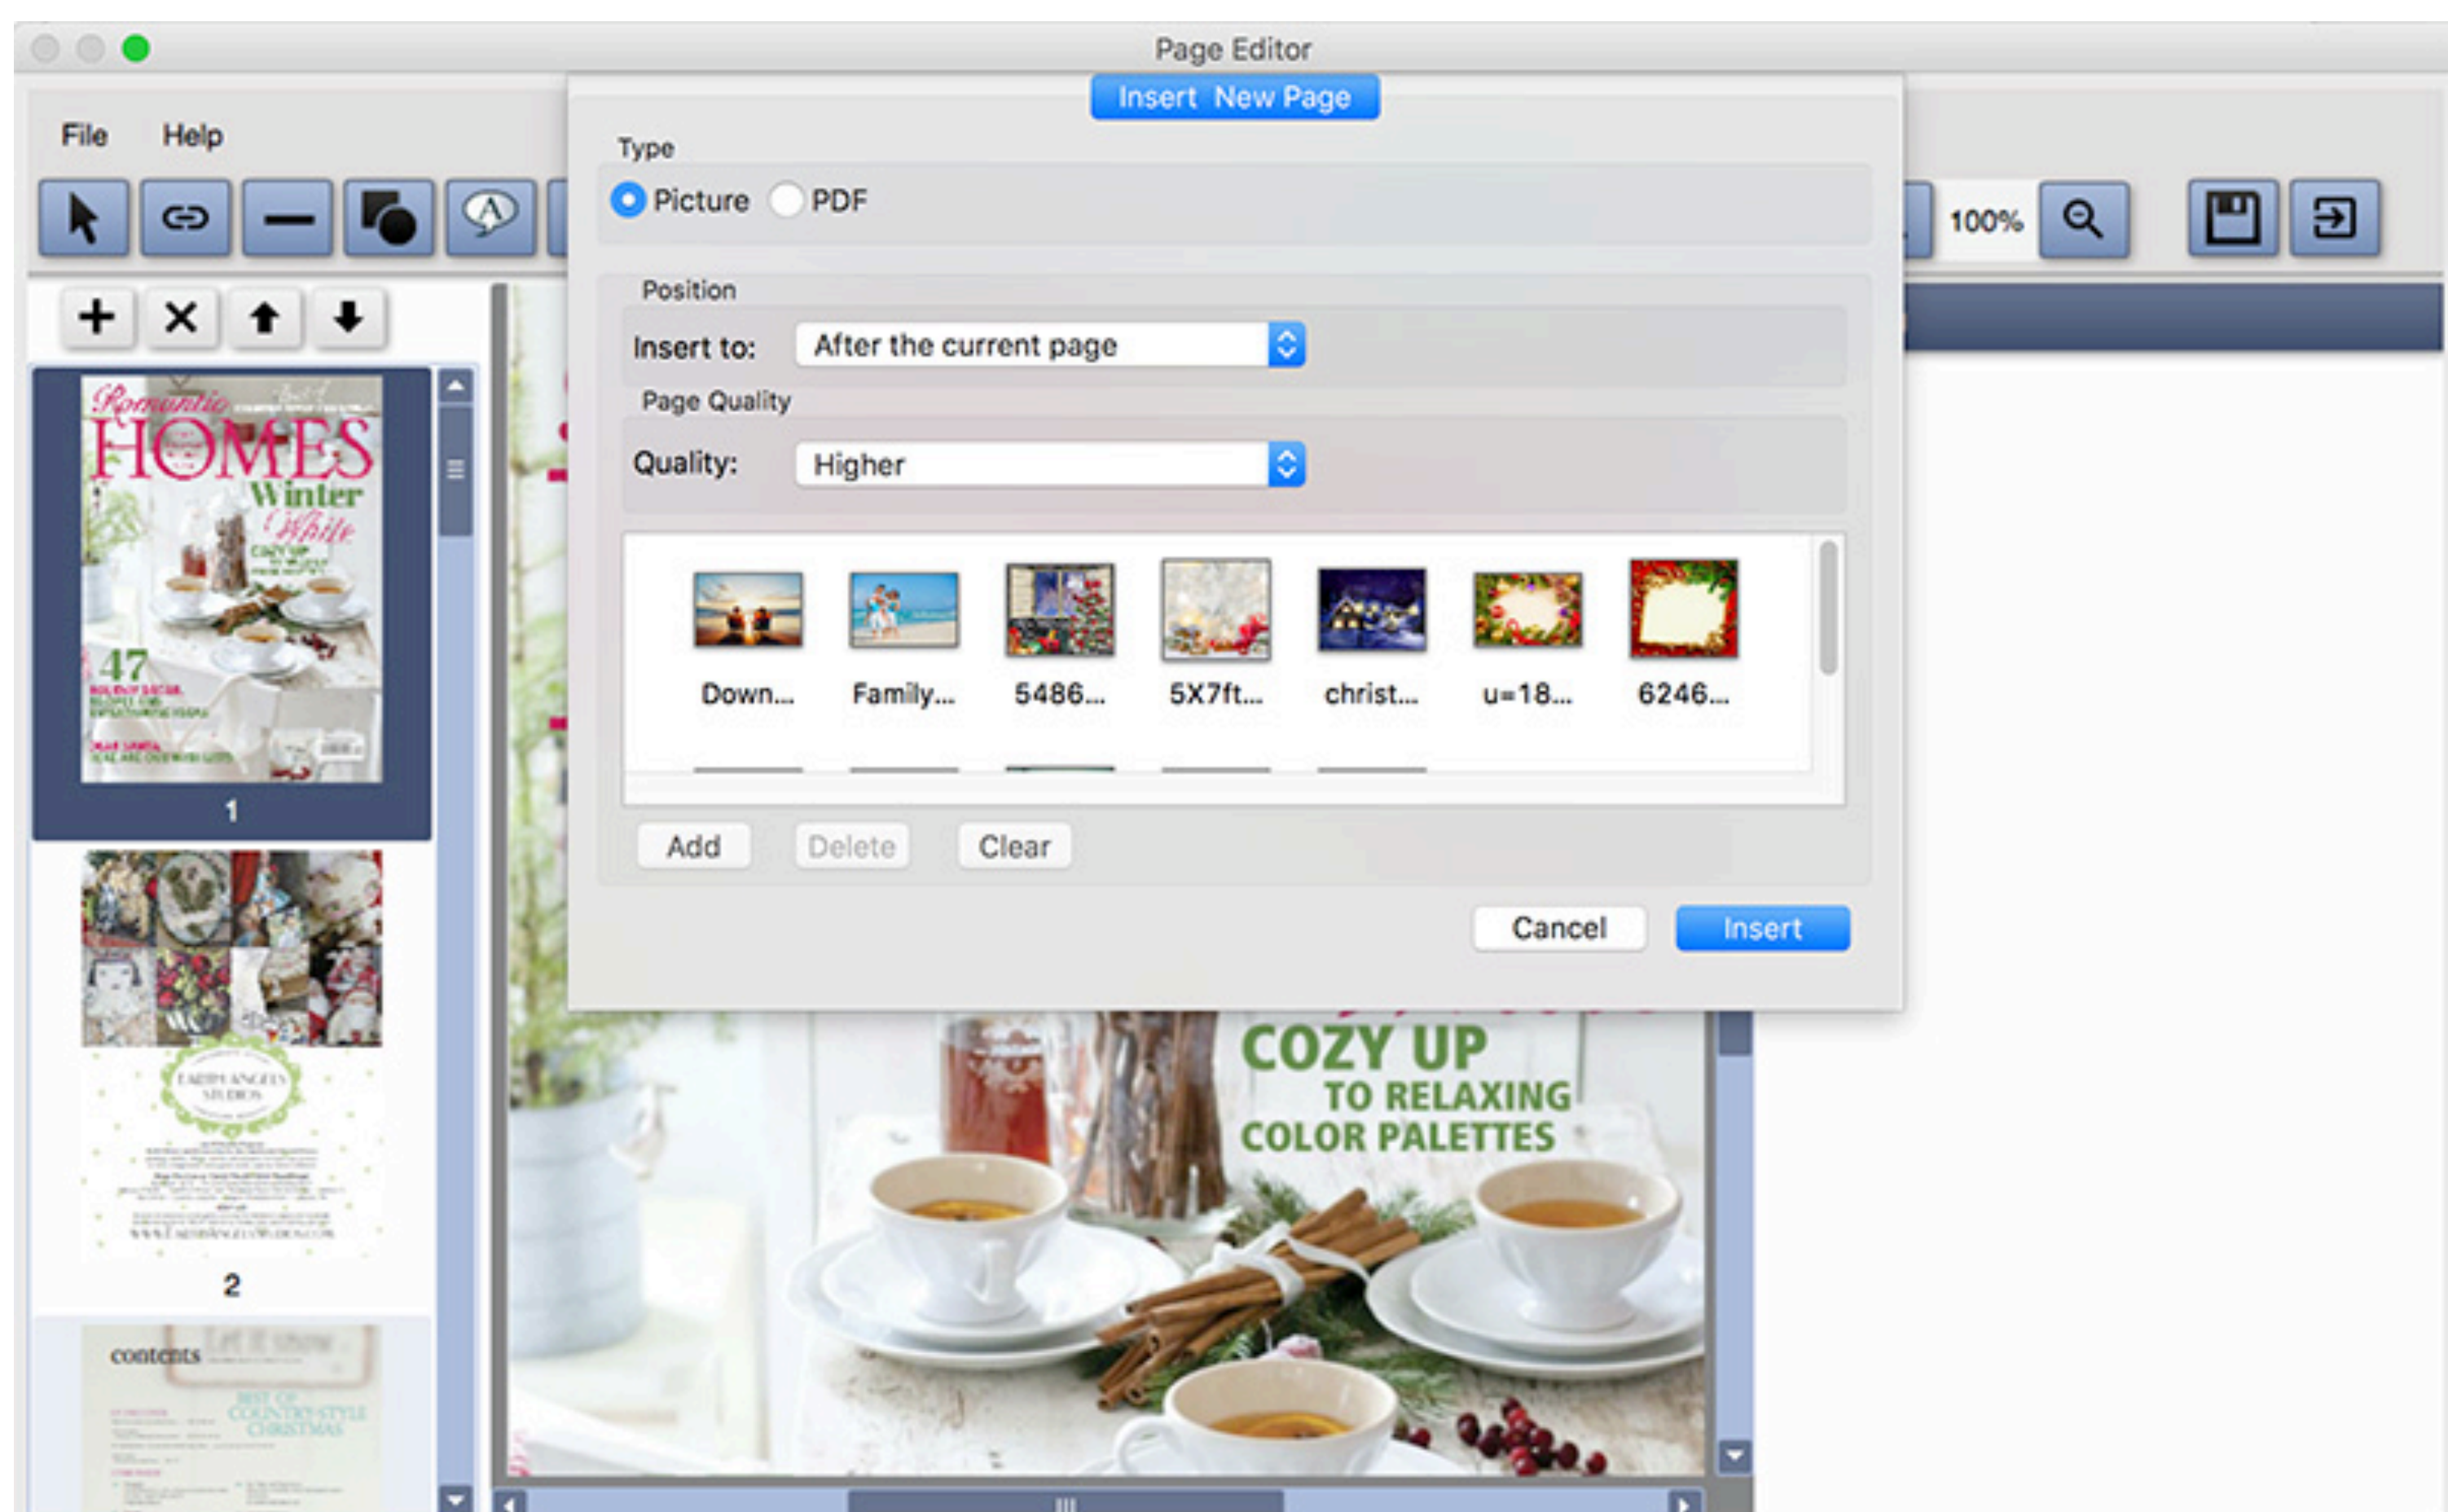

4. Setting, Template, Scene and Bookmark

As you can see in the right side of the interface, there are 3 tabs: Setting, Scene, and bookmark, where you can customize your flipbooks for the best reading effect.

- **Setting.**

This tab contains two parts: Template and detailed settings.

Template means how the flipbook toolbar is displayed. Here are two categories: Geometry and Texture, contains 5 samples respectively. Choose one you like.

Besides, you can export and import samples.

The detailed settings give you more options to customize templates as you like.

- **Toolbar Settings** - Show below buttons on the flipbook toolbar or not.

- **Book Logo Settings** - Add your logo to the top left corner of the flipbook.

  Click the folder icon to choose logo files.
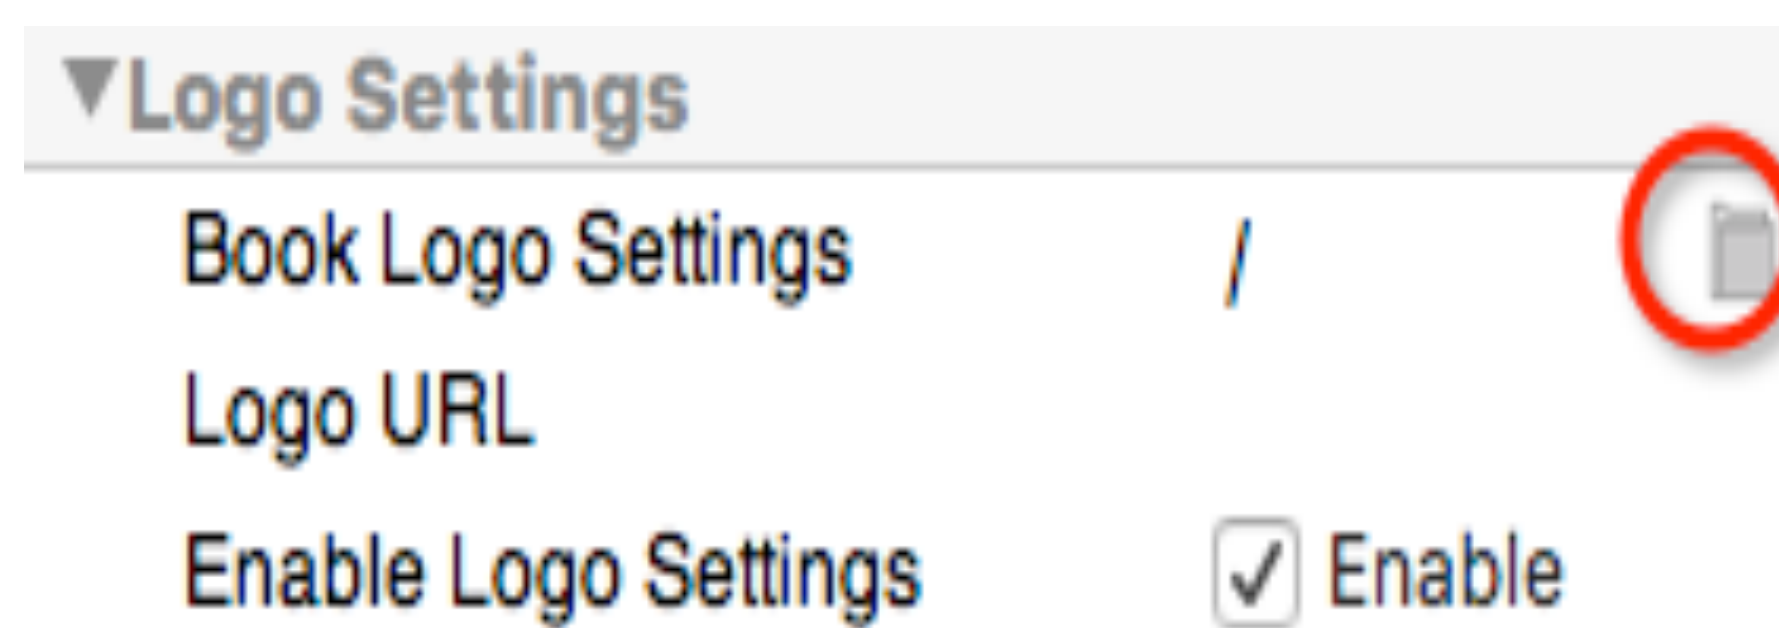

- **Sound Settings** - Add background music to the flipbook. Click the folder after Sound File to select audio files.

The number -1 means play the background music all the time. Set N(N>0): Play N times then stop.

- **Zoom Config** - Set whether the flipbook can be zoomed in or not. The minimum and maximum width can be set as you like.

▼Zoom Config	
Zoom in button enable	☑ Enable
Minimum zoom width	700
Maximum zoom width	1400

- **Language Settings** - Texts on the toolbar of the flipbook support multiple languages, which can be switchable.

▼Language Settings

Click to choose template for the selected PDF

8. Publish WordPress plugin, Joomla, Drupal Module

1. After importing PDF and customize templates and scenes, click the Publish Plugin button to open the below window:

After publishing, install the plugin or module to your WordPress, Joomla or Drupal site.

9. Upload to website using built-in FTP client

Upload to own website or storage space using the built-in FTP client

1. 1stFlip Flipbook Creator Pro for Mac allows you to upload any flipbook to your own hosting server with the built-in FTP client.
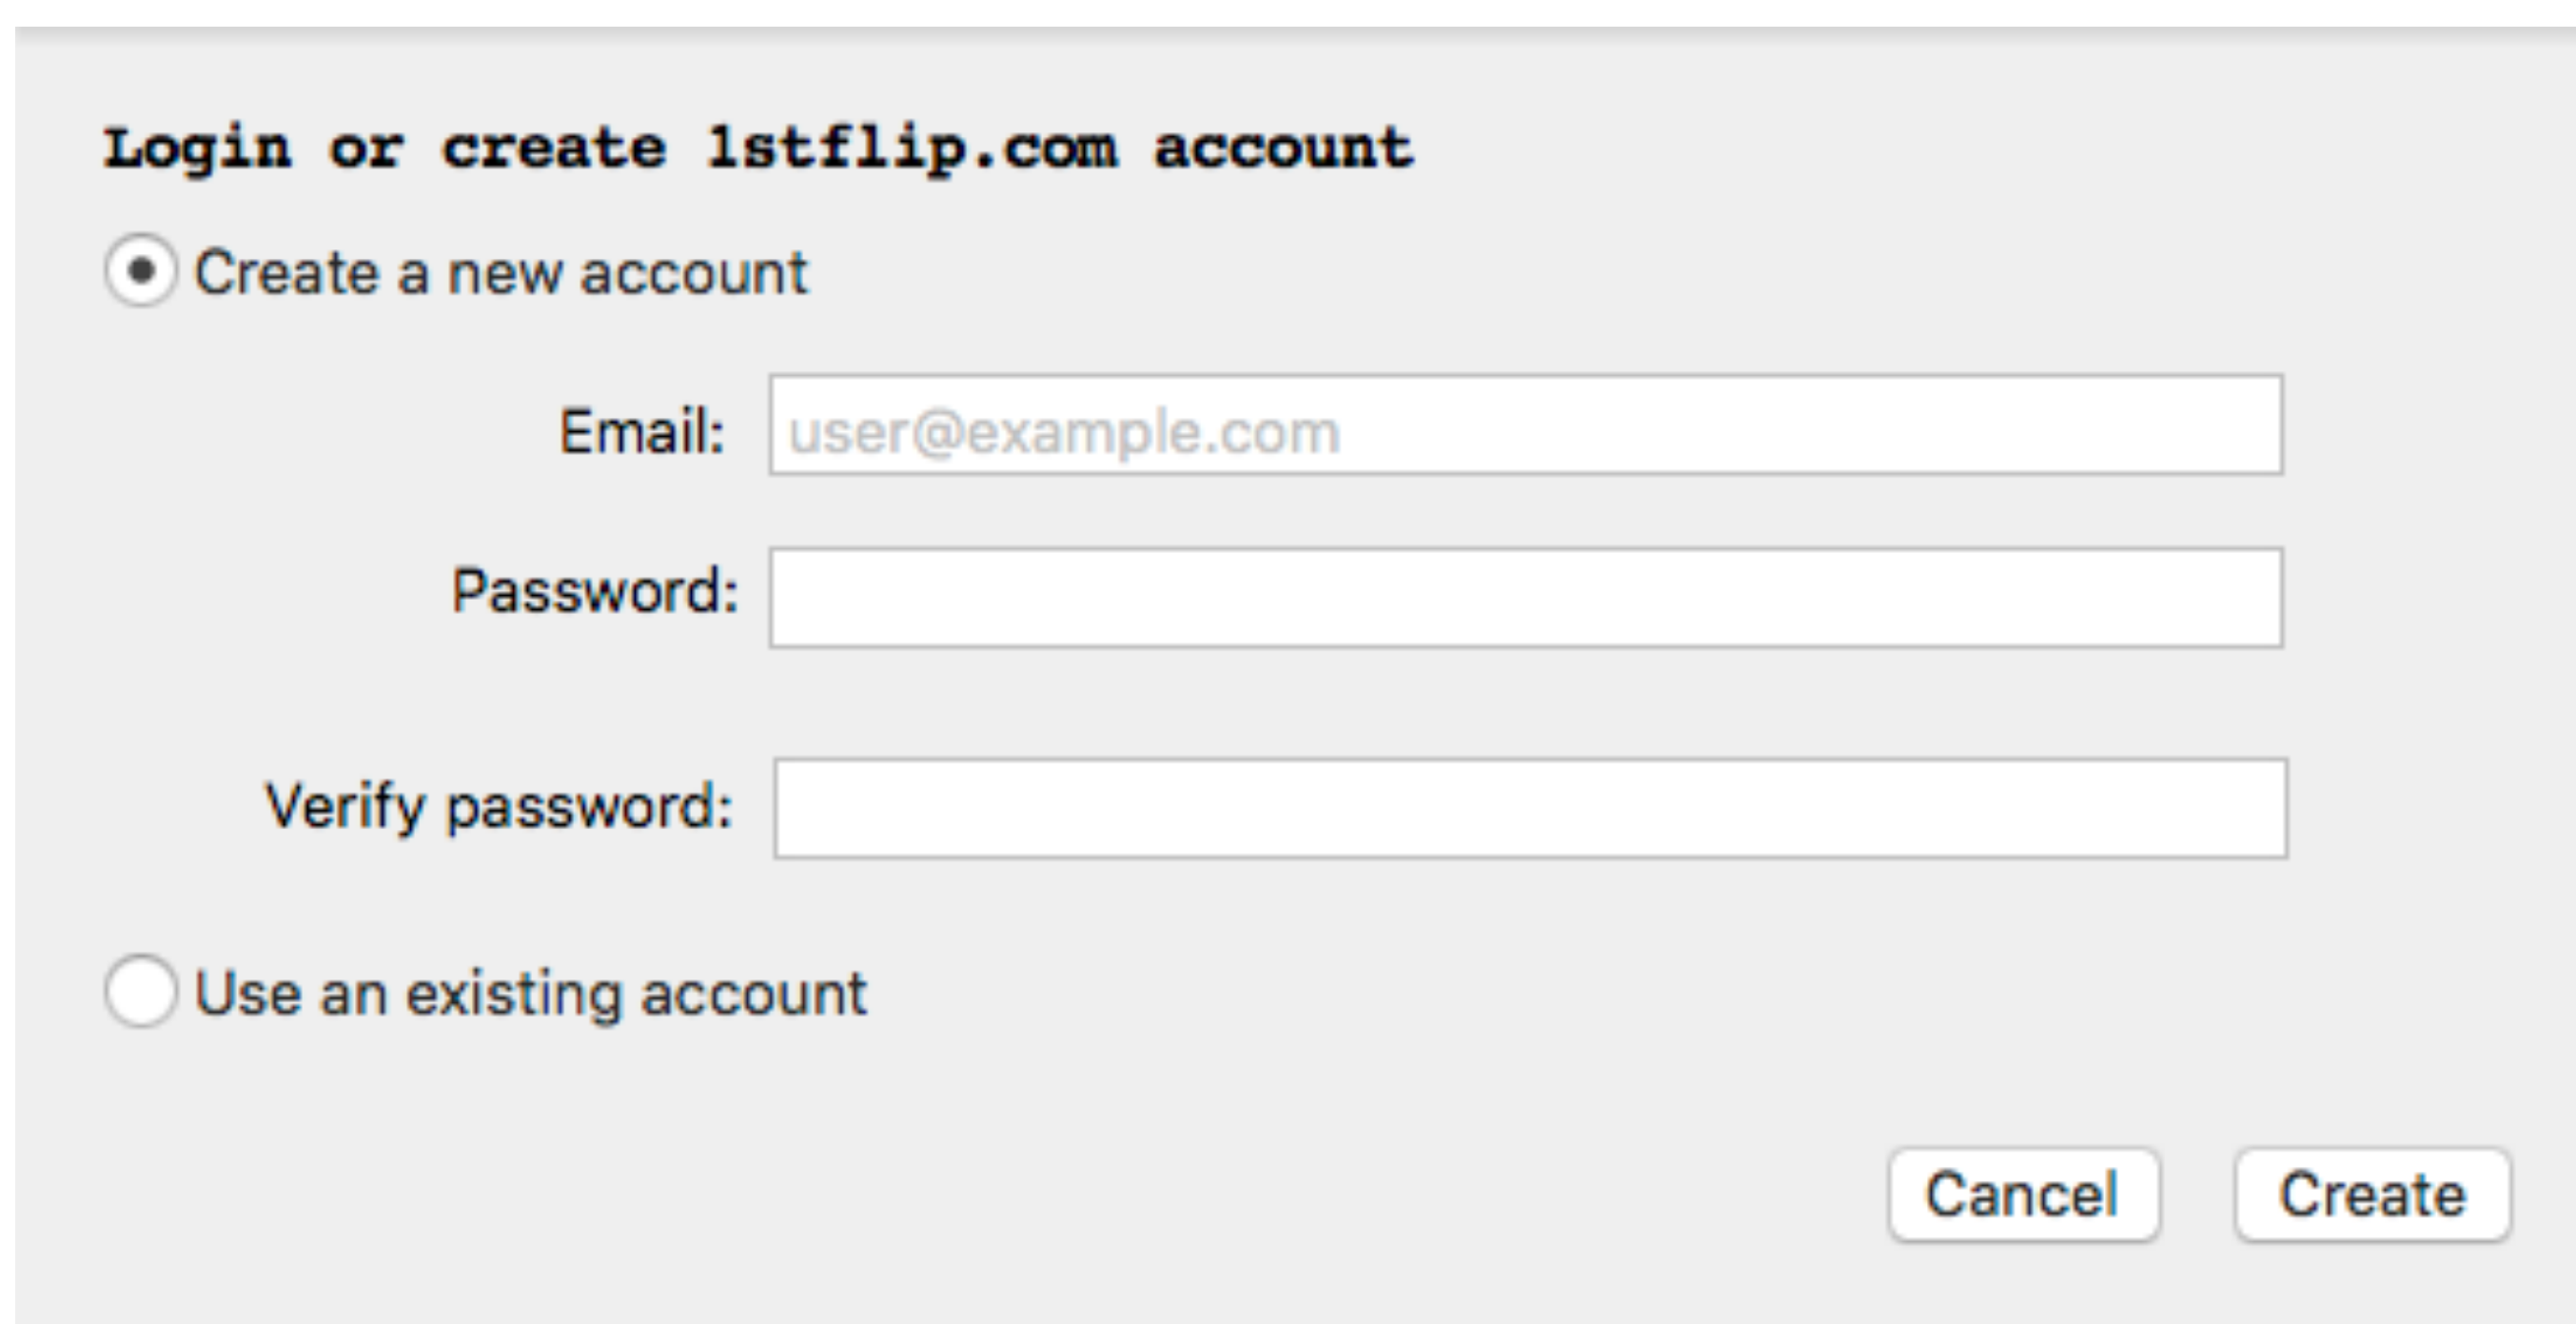

10. Upload to 1stFlip Cloud Server

Upload to 1stFlip Server directly

The Convert button is to make local flipbooks and upload to own website. If you don't have a website, use the Upload button to directly publish the flipbook online, then readers can easily access your flipbooks online.

If you choose to upload your flipbooks to 1stFlip Server, you don't need to click the Convert button. After finishing all of the settings, click the Upload button.

1. You need to create an account with your email first.

Login or create 1stflip.com account

⊙ Create a new account

Email: [user@example.com]

Password: [   ]

Verify password: [   ]

◯ Use an existing account

[Cancel] [Create]

2. Upload the flipbook. You can add some descriptions. Choose Flash-HTML5, Flash only or HTML5 only.
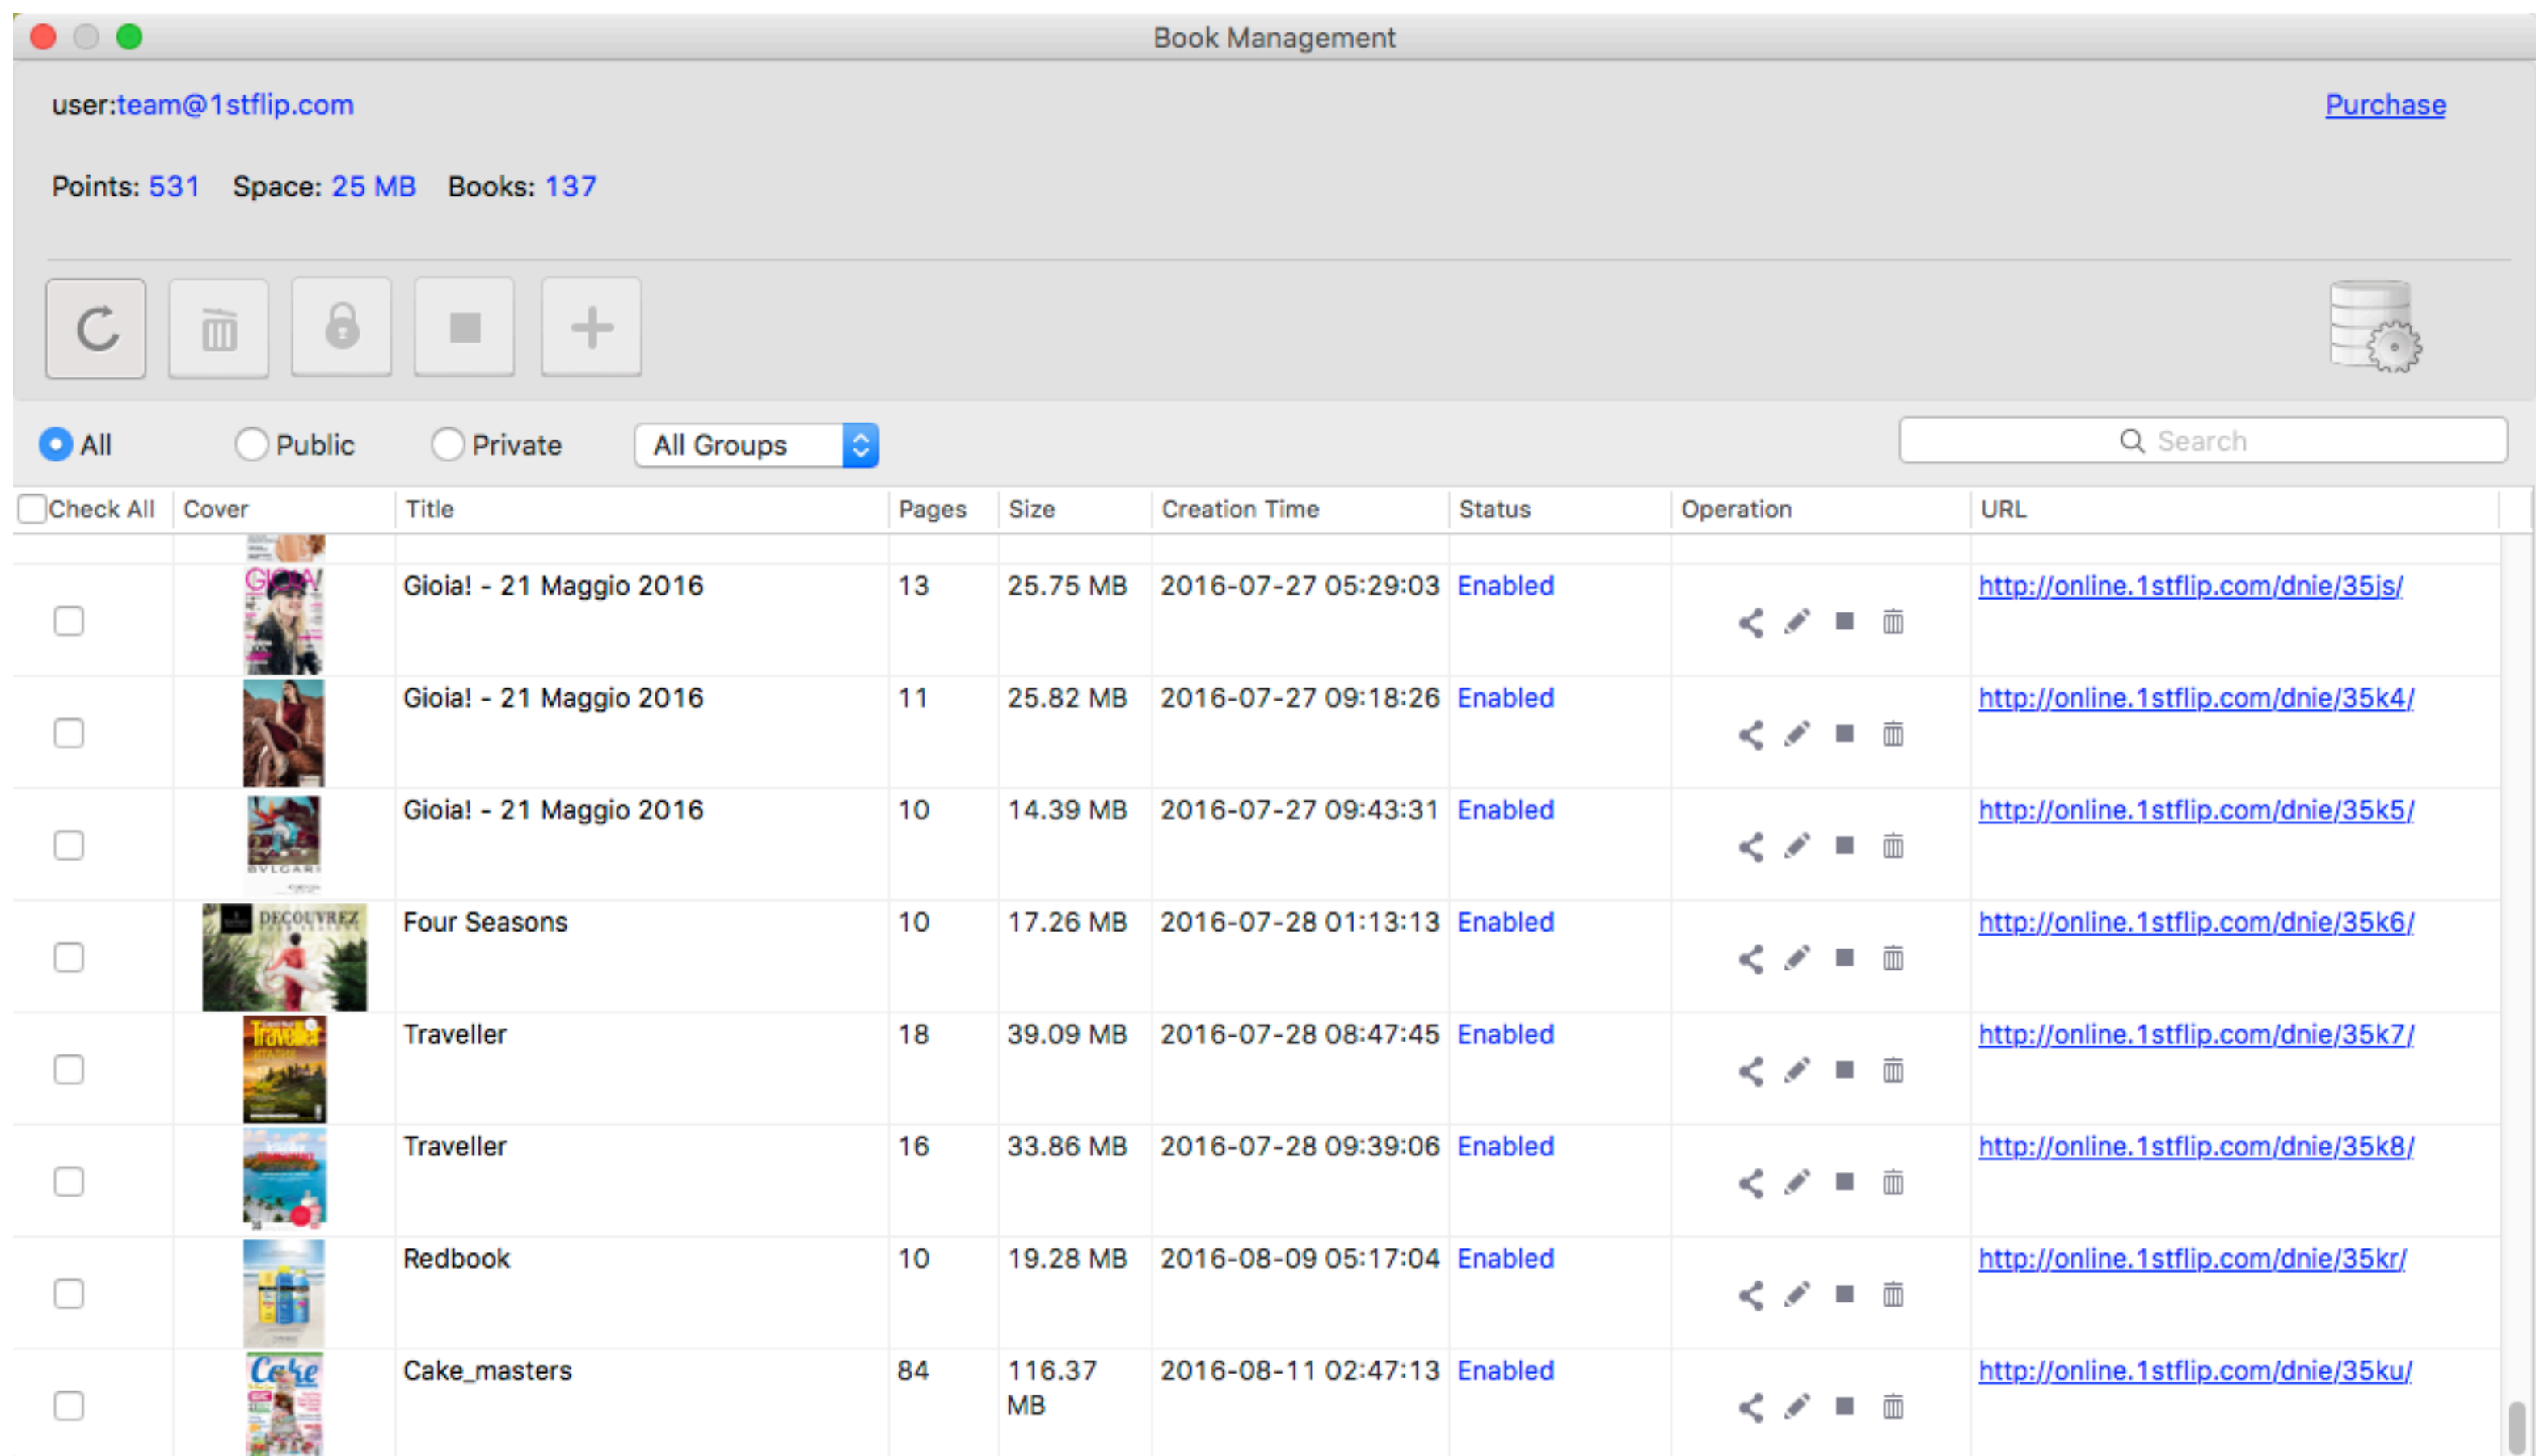

When the upload is finished, you will get the URL of the flipbook. One-click to share the flipbook to social networks or copy the embed code to your website.
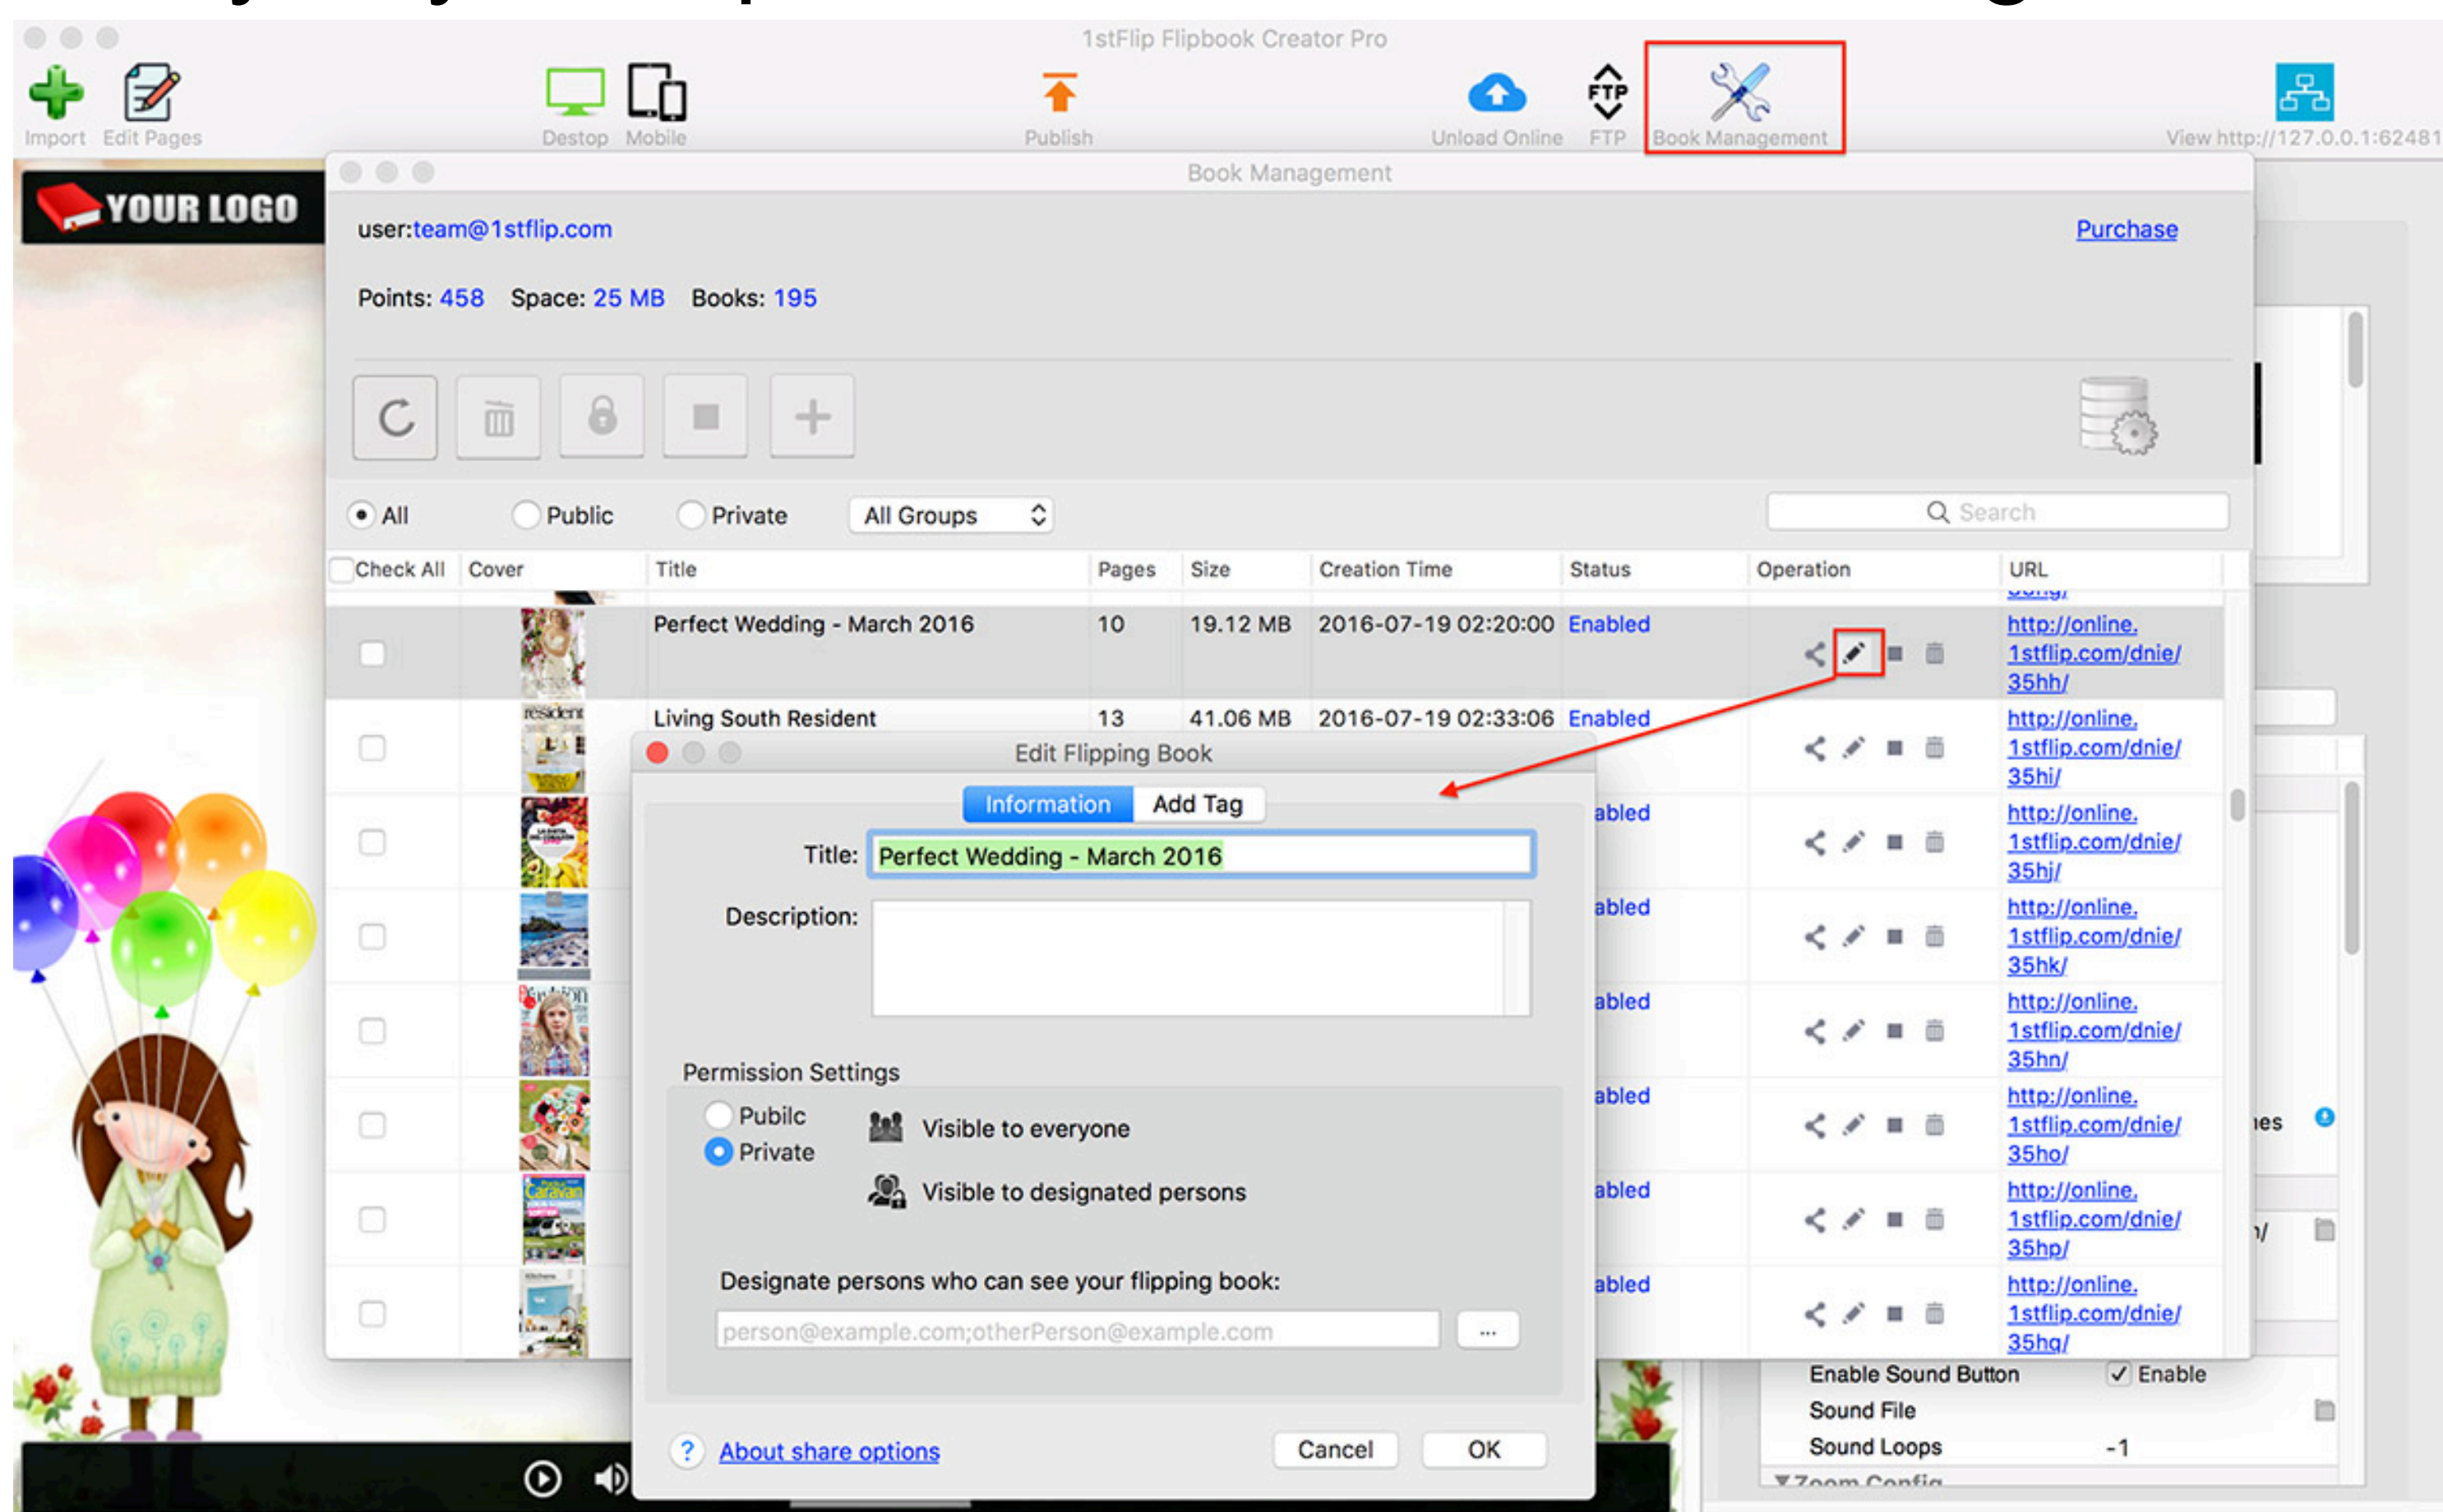

3. Click Online Library button and you will see the uploaded flipbook with detailed information.

Here you can create groups to manage flipbooks, set privacy to your flipbooks, add Hot or New tags, etc.

Notice: It costs you one point to upload one flipbook. You will get 5 points after registration. You can click the Purchase link on the right top corner to purchase more points.
